22.15 (j) The board may participate in an interstate prescription monitoring program data  
22.16 exchange system provided that permissible users in other states have access to the data only  
22.17 as allowed under this section, and that section 13.05, subdivision 6, applies to any contract  
22.18 or memorandum of understanding that the board enters into under this paragraph.

22.19 (k) With available appropriations, the commissioner of human services shall establish  
22.20 and implement a system through which the Department of Human Services shall routinely  
22.21 access the data for the purpose of determining whether any client enrolled in an opioid  
22.22 treatment program licensed according to chapter 245A has been prescribed or dispensed a  
22.23 controlled substance in addition to that administered or dispensed by the opioid treatment  
22.24 program. When the commissioner determines there have been multiple prescribers or multiple  
22.25 prescriptions of controlled substances, the commissioner shall:

22.26 (1) inform the medical director of the opioid treatment program only that the  
22.27 commissioner determined the existence of multiple prescribers or multiple prescriptions of  
22.28 controlled substances; and

22.29 (2) direct the medical director of the opioid treatment program to access the data directly,  
22.30 review the effect of the multiple prescribers or multiple prescriptions, and document the  
22.31 review.

23.1 If determined necessary, the commissioner of human services shall seek a federal waiver  
23.2 of, or exception to, any applicable provision of Code of Federal Regulations, title 42, section  
23.3 2.34, paragraph (c), prior to implementing this paragraph.

23.4 (l) The board shall review the data submitted under subdivision 4 on at least a quarterly  
23.5 basis and shall establish criteria, in consultation with the advisory task force, for referring  
23.6 information about a patient to prescribers and dispensers who prescribed or dispensed the  
23.7 prescriptions in question if the criteria are met.

23.8 (m) The board shall conduct random audits, on at least a quarterly basis, of electronic  
23.9 access by permissible users, as identified in paragraph (b), clauses (1), (2), (3), (4), (7), (8),  
23.10 (10), and (11), to the data in subdivision 4, to ensure compliance with permissible use as  
23.11 defined in this section. A permissible user whose account has been selected for a random  
23.12 audit shall respond to an inquiry by the board, no later than 30 days after receipt of notice  
23.13 that an audit is being conducted. Failure to respond may result in deactivation of access to  
23.14 the electronic system and referral to the appropriate health licensing board, or the  
23.15 commissioner of human services, for further action. The board shall report the results of  
23.16 random audits to the chairs and ranking minority members of the legislative committees  
23.17 with jurisdiction over health and human services policy and finance and government data  
23.18 practices.

23.19 (n) A permissible user who has delegated the task of accessing the data in subdivision  
23.20 4 to an agent or employee shall audit the use of the electronic system by delegated agents  
23.21 or employees on at least a quarterly basis to ensure compliance with permissible use as  
23.22 defined in this section. When a delegated agent or employee has been identified as  
23.23 inappropriately accessing data, the permissible user must immediately remove access for  
23.24 that individual and notify the board within seven days. The board shall notify all permissible  
23.25 users associated with the delegated agent or employee of the alleged violation.

23.26 (o) A permissible user who delegates access to the data submitted under subdivision 4  
23.27 to an agent or employee shall terminate that individual's access to the data within three  
23.28 business days of the agent or employee leaving employment with the permissible user. The  
23.29 board may conduct random audits to determine compliance with this requirement.
