

**Subd. 4. STRENGTHEN RESEARCH AND DEVELOPMENT PARTNERSHIPS BETWEEN INDUSTRY AND ACADEMIA.** (a) Continued research and development is a prerequisite to the commercialization of new products and the growth of technology-based companies.

(b) State government must play a significant role in supporting applied research and development initiatives. To maximize the impact, these initiatives in research and development must be closely tied to the research needs of the state's technology-based companies.

**Subd. 5. DEVELOPMENT OF LITERATE AND TECHNOLOGY SKILLED WORK FORCE.** (a) To compete in the future, communities will have to increasingly rely on knowledge-based economies. Not only will the work force of the future need to be more technically skilled than at present, but the basic level of literacy will also have to continually increase.

(b) State government must continue to invest extensively in Minnesota's human capital and must produce more scientists and engineers. This investment is required throughout the educational system.

**Subd. 6. TAKE ADVANTAGE OF OPPORTUNITIES IN TECHNOLOGY DEVELOPMENT.** (a) Investment in programs that match federal funds for scientific and technological initiatives, match industry support, or otherwise support the development of research facilities is crucial to scientific and technological development in Minnesota.

(b) The state must have the ability to act on individual opportunities that may occur from time to time and that would enhance Minnesota's technology infrastructure.
