

(c) If the first iron nugget production scale demonstration facility to qualify for this exemption is proposed at a stationary source that has permitted taconite pellet furnaces, permanent shutdown of those pellet furnaces, prior to start-up of the iron nugget production scale demonstration facility, shall be a requirement in the iron nugget production scale demonstration facility air quality permit. The shutdown of these furnaces shall not be creditable in calculating the "net emissions increase," as defined in Code of Federal Regulations, title 40, section 52.21, for this project.

(d) The Pollution Control Agency shall strive in the permitting process to assure the lowest mercury emissions reasonably possible.

(e) Permit applications must comply with applicable law, except that an iron nugget production scale demonstration facility that meets the criteria in this section is exempt from environmental review under Minnesota Statutes, chapter 116D and Minnesota Rules, chapter 4410, and the company is not required to perform an environmental review before permits are issued for the iron nugget production scale demonstration facility.

(f) The construction and operation of the iron nugget production scale demonstration facility will demonstrate whether the technology is technically and economically feasible at this larger scale. Environmental data from the operation of the iron nugget production scale demonstration facility may be used in the environmental review and permitting of commercial scale facilities built elsewhere in Minnesota.

(g) The exemption does not affect any existing permit requirement that may require environmental review for a commercial scale iron nugget facility at an existing taconite facility located within the area adjacent to the north shore of Lake Superior classified as the lake orientation zone in the Department of Natural Resources report entitled "North Shore Characterization Study."

EFFECTIVE DATE. This section is effective the day following final enactment.
