building controls and instrumentation that influence energy consumption, including space,  
equipment and system performance, facility operations, and facility maintenance. The  
request for proposals shall require the vendor to provide a system that provides concurrent  
building monitoring, energy consumption optimization, space utilization, and equipment  
performance information.

Subd. 2. **Open platform system with data analytics.** The request for proposals  
must require the vendor to provide: (1) an open platform system with the capability to  
integrate and coordinate a variety of control systems, including their data, and the ability  
to manage all state buildings and their control systems; and (2) a system that uses data  
analytics to integrate corrective action notification and work order management.

Subd. 3. **Proof of concept phase.** The request for proposals shall require the  
selected vendor, at no cost to the state, to begin work on the contract by implementing  
its proposed system on one to three instrumented state buildings to demonstrate the

savings provided by the system. The system provided by the vendor must be capable of application to all state-owned buildings.

Subd. 4. **Full implementation and payment.** The request for proposal must require the state to implement the system provided by the vendor in all buildings owned by the state if the work done under the requirements of subdivision 3 provides material savings to the state. After the full implementation of the system provided by the vendor, the vendor shall be paid by the state from the savings attributable to the work done by the vendor, according to the terms and performance measures negotiated in the contract.

Subd. 5. **Selection of vendor.** The commissioner of administration shall select a vendor from the responses to the request for proposal by September 1, 2011.

Subd. 6. **Progress report.** The commissioner shall provide a report describing the progress made under this section to the governor and the chairs and ranking minority members of the legislative committees with jurisdiction over the commissioner of administration by January 15, 2012.

The request for proposal shall require the vendor to provide a system for:

(1) a life-cycle solution for vehicle management, covering all stages from procurement through disposal of state vehicles; and

(2) the integration of data analytics to provide vehicle tracking, usage, and proactive maintenance management.

Subd. 2. **Proof of concept phase.** The request for proposals must specify that the vendor, at no cost to the state, must implement its system in one vehicle maintenance facility on a sample group of vehicles to demonstrate the cost-savings potential of the recommendations.

Subd. 3. **Full implementation and payment.** The request for proposal must require the state to implement the recommendations provided by the vendor if the work done under the requirements of subdivision 2 provides material savings to the state. After the full implementation of the system provided by the vendor, the vendor shall be paid by the state from the savings attributable to the work done by the vendor, according to the terms and performance measures negotiated in the contract.
