### 1300.2100 PURPOSE AND APPLICATION.

Subpart 1. **Purpose.** Parts 1300.2100 to 1300.3100 govern responsibilities undertaken pursuant to Minnesota Statutes, sections 16B.59 to 16B.73. They relate to the administration and enforcement of the Minnesota State Building Code.

The purpose of the code is to provide minimum standards to safeguard life and limb, health, property, and public welfare by regulating and controlling the design, construction, quality of materials, use and occupancy, location, and maintenance of all structures within a jurisdiction that adopts and enforces the code, and certain equipment specifically covered by the code.

The purpose of the code is not to create or otherwise establish or designate any particular class or group of persons who will or should be especially protected or benefited by the terms of the code.

Subp. 2. **Application.** The code applies statewide and supersedes the building code of any municipality. The code does not apply to agriculture buildings except with respect to state inspections required or rulemaking authorized.

**Statutory Authority:** *MS s 16B.61*

**History:** *15 SR 74*

### 1300.2300 SCOPE.

The code applies to the construction, alteration, moving, demolition, repair, and use of any building or structure within a municipality, except work located primarily in a public way, public utility towers and poles, mechanical equipment not specifically regulated in the code, and hydraulic flood control structures.

If different sections of the code specify different materials, methods of construction, or other requirements, the most restrictive section governs. If there is a conflict between a general requirement and a specific requirement, the specific requirement applies.

If reference is made in the code to the appendix, the provisions in the appendix do not apply unless a local authority has specifically adopted them.

**Statutory Authority:** *MS s 16B.61*
