5205.0550	INSTALLATION LIMITATIONS.		HOPPERS
5205.0560	INSPECTION.	5205.1400	INSPECTION OF HOPPERS.
			WORKPLACE ACCIDENT AND INJURY REDUCTION PROGRAM
		5205.1500	STANDARD INDUSTRIAL CLASSIFICATION LIST.

5205.0010 ADOPTION OF FEDERAL OCCUPATIONAL SAFETY AND HEALTH STANDARDS BY REFERENCE.

Subpart 1. **Title 29.** The Minnesota Department of Labor and Industry Occupational Safety and Health Codes and rules are amended by incorporating and adopting by reference, and thereby making a part thereof, Title 29 of the Code of Federal Regulations as listed in subparts 2 to 7.

Subp. 2. **Part 1910.** Part 1910: Occupational Safety and Health Standards as published in Volume 43, No. 206 of the Federal Register on October 24, 1978, and corrected in Volume 43, No. 216 on November 7, 1978, which incorporates changes, additions, deletions, and corrections made up to November 7, 1978; and subsequent changes made prior to May 31, 1993:

A. Federal Register, Volume 43:

(1) Federal Register, Vol. 43, No. 234, dated 12/5/78; "Corrections to 1910.1043; Occupational Exposure to Cotton Dust."

(2) Federal Register, Vol. 43, No. 234, dated 12/5/78; "Corrections to 1910.1046; Occupational Exposure to Cotton Dust in Cotton Gins."

(3) Federal Register, Vol. 43, No. 237, dated 12/8/78; "Corrections to Tables of Exposure Limits for Air Contaminants, 1910.1000."

(4) Federal Register, Vol. 43, No. 220, dated 11/14/78; "Lead Standard, 1910.1025."

B. Federal Register, Volume 44:

(1) Federal Register, Vol. 44, No. 19, dated 1/26/79; "Corrections to Lead Standard, typographical."

(2) Federal Register, Vol. 44, No. 50, dated 3/13/79; "Modifications to Lead Standard, Portions of Standard Stayed."

(3) Federal Register, Vol. 44, No. 168, dated 8/28/79; "Corrections to Lead Standard, Exemption of Construction Industry."

(4) Federal Register, Vol. 44, No. 138, dated 7/17/79; "Occupational Exposure to Chlorine, Lifting of Stay."

(5) Federal Register, Vol. 44, No. 206, dated 10/23/79; "Appendixes to Lead Standard."

(6) Federal Register, Vol. 44, No. 232, dated 11/30/79; "Corrections to Appendixes to Lead Standard."

C. Federal Register, Volume 45:

(1) Federal Register, Vol. 45, No. 20, dated 1/29/80; "Servicing Multipiece Rim Wheels, 1910.177."

(2) Federal Register, Vol. 45, No. 28, dated 2/8/80; "Mechanical Power Presses; Corrections to Final Rule."

(3) Federal Register, Vol. 45, No. 121, dated 6/20/80; "Commercial Diving Operations: Correction to Final Rule."

(4) Federal Register, Vol. 45, No. 179, dated 9/12/80; "Revisions to Subpart L, Fire Protection; Subpart E, Means of Egress; and Subpart H, Hazardous Materials."

D. Federal Register, Volume 46:

(1) Federal Register, Vol. 46, No. 11, dated 1/16/81; "Subpart S, Electrical."

(2) Federal Register, Vol. 46, No. 118, dated 6/19/81; "Deletion of 1910.1046; Occupational Exposure to Cotton Dust in Cotton Gins."

(3) Federal Register, Vol. 46, No. 141, dated 7/23/81; "Occupational Exposure to Lead, New Trigger Levels for Medical Removal Protection; 1910.1025."

(4) Federal Register, Vol. 46, No. 152, dated 8/7/81; "Corrections to Subpart S, Electrical."

(5) Federal Register, Vol. 46, No. 162, dated 8/21/81; "Occupational Noise Exposure, Hearing Conservation Amendment; 1910.95."

(6) Federal Register, Vol. 46, No. 238, dated 12/11/81; "Occupational Exposure to Lead, Final Rule Amended."

E. Federal Register, Volume 47:

(1) Federal Register, Vol. 47, No. 173, dated 9/7/82; "Hazardous Materials; Attendant Exemption and Latch-Open Devices; 1910.106(g)(2) and (g)(3)(vi)."

(2) Federal Register, Vol. 47, No. 219, dated 11/12/82; "Occupational Exposure to Lead: Respirator Fit Testing, 1910.1025(f)(3)."

(3) Federal Register, Vol. 47, No. 228, dated 11/26/82; "Exemption of Educational/Scientific Diving from Subpart T, Part 1910."

(4) Federal Register, Vol. 47, No. 233, dated 12/3/82; "Occupational Exposure to Lead: Administrative Stay of Compliance Plans for Certain Industries; 1910.1025(c)(e)(i)(B) & (E)."

MINNESOTA RULES 1993

261

SAFETY AND HEALTH STANDARDS 5205.0010

F. Federal Register, Volume 48:

(1) Federal Register, Vol. 48, No. 15, dated 1/21/83; "Occupational Exposure to Coal Tar Pitch Volatiles; Modification of Final Interpretation: 1910.1022."

(2) Federal Register, Vol. 48, No. 25, dated 2/4/83; "Occupational Exposure to Cotton Dust; Stay for Knitting and Hosiery Industry; 1910.1043."

(3) Federal Register, Vol. 48, No. 46, dated 3/8/83; "Occupational Exposure to Lead; Corrections to Respirator Fit Testing Requirements; 1910.1025 and Occupational Noise Exposure, Hearing Conservation Amendment; 1910.95(c)."

(4) Federal Register, Vol. 48, No. 125, dated 6/28/83; "Hearing Conservation Amendment, Corrections to Final Rule."

G. Federal Register, Volume 49:

(1) Federal Register, Vol. 49, No. 4, dated 1/6/84; "Commercial Diving Operations; Deletion of 1910.411."

(2) Federal Register, Vol. 49, No. 24 dated 2/3/84; "Servicing of Single Piece and Multipiece Rim Wheels; 1910.177."

(3) Federal Register, Vol. 49, No. 29, dated 2/10/84; "Revocation of Advisory and Repetitive Standards."

(4) Federal Register, Vol. 49, No. 37, dated 2/23/84; "Occupational Exposure to Cotton Dust; Partial Administrative Stay of 1910.1043(m)(2)(ii)."

(5) Federal Register, Vol. 49, No. 109, dated 6/5/84; "Occupational Exposure to Lead; Effective Date of Compliance Plan Requirements for Primary and Secondary Smelting and Battery Manufacturing Industries, 1910.1025(e)(3)(ii)(B) and (E)."

(6) Federal Register, Vol. 49, No. 122, dated 6/22/84; "Occupational Exposure to Ethylene Oxide (1910.1047), Final Rule."

H. Federal Register, Volume 50:

(1) Federal Register, Vol. 50, No. 6, dated 1/9/85; "Educational/Scientific Diving: Guidelines for Scientific Diving (Appendix B) Subpart T of Part 1910."

(2) Federal Register, Vol. 50, No. 22, dated 2/1/85; "Power Lawnmowers: Amendments; 1910.243(e)."

(3) Federal Register, Vol. 50, No. 48, dated 3/12/85; "Occupational Exposure to Ethylene Oxide (1910.1047); Amendment of Effective Dates."

(4) Federal Register, Vol. 50, No. 72, dated 4/15/85; "Occupational Exposure to Cotton Dust (1910.1043); Extension of Administrative Stay."

(5) Federal Register, Vol. 50, No. 178, dated 9/13/85; "Coke Oven Emissions (1910.1029); Deletion of Portions of Standard."

(6) Federal Register, Vol. 50, No. 198, dated 10/11/85; Occupational Exposure to Ethylene Oxide (1910.1047); Labeling Requirements."

(7) Federal Register, Vol. 50, No. 240, dated December 13, 1985; "Occupational Exposure to Cotton Dust; 29 Code of Federal Regulations 1910.1043."

I. Federal Register, Volume 51:

(1) Federal Register, Vol. 51, No. 119, dated June 20, 1986; "Occupational Exposure to Asbestos, Tremolite, Anthophyllite, and Actinolite (1910.1001 and 1926.58); Final Rules."

(2) Federal Register, Vol. 51, No. 128, dated July 3, 1986; "Occupational Exposure to Cotton Dust (1910.1043), Corrections and Information Collection Requirements Approval."

(3) Federal Register, Vol. 51, No. 132, dated July 10, 1986; "Occupational Exposure to Ethylene Oxide (1910.1047), Technical Amendments and Corrections to Final Rule."

(4) Federal Register, Vol. 51, No. 133, dated July 11, 1986; "Electrical Standards for Construction, Part 1926, Subpart K."

(5) Federal Register, Vol. 51, No. 181, dated September 18, 1986; "Commercial Diving Standard (1910.430); Technical Amendments to Final Rule."

(6) Federal Register, Vol. 51, No. 182, dated September 19, 1986; "Accident Prevention Tags (1910.145); Amendment to Final Rule."

(7) Federal Register, Vol. 51, No. 188, dated September 29, 1986; "Record Keeping Requirements for Tests, Inspections, and Maintenance Checks (1910.68, 1910.106, 1910.157, 1910.179, 1910.180, 1910.181, 1910.217, 1910.218, 1910.252, and 1910.440)."

(8) Federal Register, Vol. 51, No. 201, dated October 17, 1986; "Occupational Exposure to Asbestos, Tremolite, Anthophyllite, and Actinolite (1910.1101); Partial Administrative Stay of Final Rules and Redesignation and Amendment of Final Rule."

(9) Federal Register, Vol. 51, No. 244, dated December 19, 1986; "Hazardous Waste Operations and Emergency Response (1910.120); Interim Final Rule."

J. Federal Register, Volume 52:

(1) Federal Register, Vol. 52, No. 83, dated April 30, 1987; "Occupational Exposure to Asbestos, Tremolite, Anthophyllite, and Actinolite; Extension of the Partial Stay and Amendment of Final Rule."

(2) Federal Register, Vol. 52, No. 85, dated May 4, 1987; "Hazardous Waste Operations and Emergency Response; Corrections to Interim Final Rule (29 CFR 1910.120)."

(3) Federal Register, Vol. 52, No. 91, dated May 12, 1987; "Occupational Exposure to Asbestos, Tremolite, Anthophyllite, and Actinolite; Corrections and Information Collection Requirements Approval."

(4) Federal Register, Vol. 52, No. 176, dated September 11, 1987; "Occupational Exposure to Benzene (1910.1028); Final Rule."

(5) Federal Register, Vol. 52, No. 187, dated September 28, 1987; "Revision of Telecommunications Training Records (1910.268); Final Rule."

(6) Federal Register, Vol. 52, No. 233, dated December 4, 1987; "Occupational Exposure to Formaldehyde (1910.1048); Final Rule."

(7) Federal Register, Vol. 52, No. 251, dated December 31, 1987; "Grain Handling Facilities (1910.272); Final Rule."

K. Federal Register, Volume 53:

(1) Federal Register, Vol. 53, No. 41, dated March 2, 1988; "Occupational Exposure to Formaldehyde; Approval of Information Collection Requirements, Technical Amendment (1910.1048)."

(2) Federal Register, Vol. 53, No. 49, dated March 14, 1988; "Presence Sensing Device Initiation of Mechanical Power Presses (1910.211, 1910.217); Final Rule."

(3) Federal Register, Vol. 53, No. 66, dated April 6, 1988; "Occupational Exposure to Ethylene Oxide (1910.1047)."

(4) Federal Register, Vol. 53, No. 70, dated April 12, 1988; "Safety Testing or Certification of Certain Workplace Equipment and Materials; Deletion of Specific Testing Laboratory Names; Definition of Nationally Recognized Testing Laboratory; Determination of Eligible Testing Organizations (1910.7)."

(5) Federal Register, Vol. 53, No. 96, dated May 18, 1988; "Grain Handling Facilities; Notice of Approval of Information Collection Requirements by OMB and Corrections to Appendices as published on December 31, 1987 (1910.272)."

(6) Federal Register, Vol. 53, No. 139, dated July 20, 1988; "Occupational Exposure to Asbestos, Tremolite, Anthophyllite, and Actinolite (1910.1001 and 1910.1101); Extension of Partial Stay and Amendment of Final Rule."

(7) Federal Register, Vol. 53, No. 143, dated July 26, 1988; "Occupational Exposure to Ethylene Oxide (1910.1047); Approval of Information Collection Requirements; Amendment of Effective Date of Information Collection Requirements."

(8) Federal Register, Vol. 53, No. 170, dated September 1, 1988; "Occupational Exposure to Formaldehyde (1910.1048); Notice of Deferral of Effective Date for Certain Laboratories."

(9) Federal Register, Vol. 53, No. 174, dated September 8, 1988; "Servicing of Multipiece and Single Piece Rim Wheels (1910.177); Technical Amendments to Final Rule."

(5) Federal Register, Vol. 57, No. 71, dated April 13, 1992: "Occupational Exposure to Bloodborne Pathogens; Approval of Information Collection Requirements."

(6) Federal Register, Vol. 57, No. 87, dated May 5, 1992: "Occupational Exposure to Formaldehyde; Extension of Administrative Stay."

(7) Federal Register, Vol. 57, No. 102, dated May 27, 1992: "Occupational Exposure to Formaldehyde (1910.1048); Response to Court Remand."

(8) Federal Register, Vol. 57, No. 105, dated June 1, 1992: "Process Safety Management of Highly Hazardous Chemicals; Explosives and Blasting Agents (1910.119); Administrative Stay and Request for Comments."

(9) Federal Register, Vol. 57, No. 110, dated June 8, 1992: "Occupational Exposure to Asbestos, Tremolite, Anthophyllite and Actinolite (1910.1001); Final Rule."

(10) Federal Register, Vol. 57, No. 112, dated June 10, 1992: "Occupational Exposure to Formaldehyde (1910.1048); Correction."

(11) Federal Register, Vol. 57, No. 118, dated June 18, 1992: "Occupational Exposure to Formaldehyde (1910.1048); Corrections."

(12) Federal Register, Vol. 57, No. 126, dated June 30, 1992: "Occupational Exposure to Asbestos, Tremolite, Anthophyllite and Actinolite (1910.1001); Correction."

(13) Federal Register, Vol. 57, No. 127, dated July 1, 1992: "Occupational Exposure to Bloodborne Pathogens (1910.1030); Correction."

(14) Federal Register, Vol. 57, No. 127, dated July 1, 1992: "Air Contaminants (1910.1000); Corrections."

(15) Federal Register, Vol. 57, No. 127, dated July 1, 1992: "Update of Addresses for Obtaining Technical Manuals (1910.1450 and 1910.1500); Corrections."

(16) Federal Register, Vol. 57, No. 154, dated August 10, 1992: "Occupational Exposure to 4,4' Methylenedianiline (MDA) (1910.1050); Final Rule."

(17) Federal Register, Vol. 57, No. 166, dated August 26, 1992: "Process Safety Management of Highly Hazardous Chemicals; Explosives and Blasting Agents; Final Rule; Petition for Administrative Stay; Effective Date of Stayed Provisions."

(18) Federal Register, Vol. 57, No. 178, dated September 14, 1992: "Occupational Exposure to Cadmium (1910.1027); Final Rule."

(19) Federal Register, Vol. 57, No. 211, dated October 30, 1992: "Occupational Exposure to Cadmium (1910.1027); Approval of Information Collection Requirements."

(20) Federal Register, Vol. 57, No. 213, dated November 3, 1992, "Occupational Exposure to 4,4' Methylenedianiline (MDA); Approval of Information Collection Requirements."

P. Federal Register, Volume 58:

(1) Federal Register, Vol. 58, No. 59, dated March 30, 1993, "Control of Hazardous Energy Sources (Lockout/Tagout); Supplemental Statement of Reasons."

(2) Federal Register, Vol. 58, No. 77, dated April 23, 1993, "Occupational Exposure to Cadmium; Corrections and Amendments to Final Rule."

Subp. 3. **Part 1915.** Part 1915: Occupational Safety and Health Standards for Shipyard Employment as published in Volume 47, No. 76 of the Federal Register on April 20, 1982, and subsequent changes made prior to December 31, 1986, which consolidates Part 1915 and Part 1916, and subsequent changes made prior to May 31, 1993:

A. Federal Register, Vol. 51, No. 188, dated September 29, 1986; "Record Keeping Requirements for Tests, Inspections, and Maintenance Checks (1915.113 and 1915.172); Final Rule."

B. Federal Register, Vol. 57, No. 178, dated September 14, 1992: "Occupational Exposure to Cadmium (1915.1027); Final Rule."

C. Federal Register, Vol. 57, No. 211, dated October 30, 1992: "Occupational Exposure to Cadmium (1915.1027); Approval of Information Collection Requirements."

D. Federal Register, Vol. 58, No. 77, dated April 23, 1993, "Occupational Exposure to Cadmium; Corrections and Amendments to Final Rule."

Subp. 4. **Part 1917.** Part 1917: Safety and Health Standards for Marine Terminals as published in Volume 48, No. 129 of the Federal Register on July 5, 1983; and subsequent changes made prior to April 1, 1988:

Federal Register, Vol. 52, No. 186, dated September 25, 1987; "Servicing of Single Piece and Multipiece Rim Wheels at Marine Terminals (1917.44); Final Rule."

Federal Register, Vol. 52, No. 251, dated December 31, 1987; "Grain Handling Facilities (1917.1 and 1917.72-[removed]); Final Rule."

Subp. 5. **Part 1918.** Part 1918: Safety and Health Regulations for Longshoring as published in Part II, Volume 39, No. 119 of the Federal Register on June 19, 1974 incorporating changes, additions, deletions and corrections made up to June 3, 1974; and subsequent changes made prior to June 1, 1984:

A. Federal Register, Vol. 42, No. 141, dated 7/22/77; "Commercial Diving Operations, adding 1918.99."

B. Federal Register, Vol. 43, No. 88, dated 5/5/78; "Occupational Exposure to Benzene; supersedes standards in Part 1918."

Subp. 6. **Part 1926.** Part 1926: Construction Safety and Health Regulations as published in Part VII, Volume 44, No. 29 of the Federal Register on February 9, 1979, which incorporates changes, additions, deletions, and corrections made up to October 17, 1978, and includes General Industry Occupational Safety and Health Standards (29 CFR Part 1910) which have been identified as applicable to construction work; and subsequent changes made prior to May 31, 1993:

A. Federal Register, Volume 45, No. 222, dated 11/14/80; "Guarding Low-Pitched Roof Perimeters During Performance of Built-Up Roofing Work."

B. Federal Register, Volume 51:

MINNESOTA RULES 1993

5205.0015 APPLICATION OF RULES.

Chapter 5205 applies only to general industry locations. Chapter 5207 applies only to construction locations. Chapters 5206 and 5210 apply to both general industry and construction locations.

Statutory Authority: *MS s 182.655*

History: 12 SR 634

PERSONAL PROTECTIVE EQUIPMENT

5205.0020 HEAD PROTECTION.

Employees working in areas where there is danger of scalp injury if the employee's hair should become entangled in moving machinery parts shall be protected by having their hair contained or secured in a shop cap, snood, or similar device.

Statutory Authority: *MS s 182.655*

5205.0030 HIGH VISIBILITY PERSONAL PROTECTIVE EQUIPMENT.

Subpart 1. **General requirement.** Employees, other than police and fire protection personnel covered by subpart 3, exposed to vehicular traffic when the work area is on the driving lanes or on the shoulders or berms, or on the median adjacent to streets, highways, or roadways shall be provided with and required to wear warning vests or other high visibility garments. For work during the hours of darkness this protective equipment must be made of or marked with reflectorized material.

Subp. 2. **Exception.** Where employees are continually protected from vehicular traffic by permanent or semipermanent barricades, high visibility vests, or other high visibility equipment are not required.

Subp. 3. **Law enforcement, fire protection personnel.** Law enforcement and fire protection personnel shall be provided with, and be required to wear, high visibility, reflectorized outer garments at any time such personnel are engaged in vehicular traffic control.

Statutory Authority: *MS s 182.655*

WALKING, WORKING SURFACES

5205.0040 ELEVATED STORAGE PLATFORM OR RACK.

No employee shall be required or permitted to work on an elevated platform or rack intended primarily for the storage of materials unless the storage area has been provided with the safeguards specified in Code of Federal Regulations, title 29, section 1910.23 (c) (1).

Statutory Authority: *MS s 182.655*

History: 12 SR 634

5205.0050 SHIPS LADDERS.

Subpart 1. **Requirement.** Employers shall replace fixed and portable ladders with ships ladders whenever possible.

The angle of rise of ships ladders shall be between 50 and 60 degrees measured from the horizontal.

Subp. 2. **Soffits.** Where ladders are located one above the other, soffits shall be enclosed except where solid treads and risers are provided.

Subp. 3. **Treads.** Treads shall be uniformly spaced eight to 12 inches vertically. Tread surfaces other than steel grating shall be provided with skid resistance. Treads shall be flat steps with minimum of six inches in width and at least 24 inches long.

Subp. 4. **Handrails.** Handrails shall be provided on both sides of ladders and shall be placed to run parallel with stringers and be positioned 12 to 14 inches measured vertically, from the stringers. Handrail diameters shall be 1-1/4 to 1-5/8 inches o.d. When ships ladders serve door entrances, handrails shall continue to the door.

Subp. 5. **Stringers.** Ladder stringers shall be at least six inches in depth and permanently attached at terminations.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0060 SHIPS LADDERS, SPECIAL REQUIREMENTS.

Ships ladders shall be provided in all buildings where mechanical equipment is located on the roof in order to make all equipment accessible to maintenance and inspection personnel. Ships ladders shall be placed at an angle between 50 and 60 degrees measured from the horizontal. The opening in ceilings and building roofs shall have a minimum area of nine square feet and a minimum width of two feet. No ships ladders shall be located in or pass through elevator shafts, elevator penthouses, or elevator machine rooms.

Inside a penthouse handrails shall continue through ceiling and roof openings to a distance of 36 inches. A guardrail and intermediate rail shall be provided on all open sides with a substantial chain guard on the entrance side.

Statutory Authority: *MS s 182.655*

5205.0065 SUSPENSION SCAFFOLDS.

Subpart 1. **Suspension lines.** The scaffold suspension lines shall be secured to the scaffold and to the roof irons, hooks, or outriggers by bolt type devices or cable eyes and cable clamps. Hooks or safety hooks shall not be permitted as a means of rigging.

Subp. 2. **Outrigger beams or thrustout.** When a suspension scaffold is supported by outrigger beams or thrustouts, each outrigger beam or thrustout must meet the following requirements:

A. Each outrigger beam or thrustout shall be of a size and design to support four times the intended load.

B. The inner end of the outrigger beam must be secured from overturning or tilting laterally.

C. Tiebacks that meet the requirements of Code of Federal Regulations, title 29, section 1926.451(i)(4) shall be securely fastened to the outrigger beam.

D. Counterweights, when used, shall be sufficient to balance four times the intended load, shall be securely fastened to the outrigger beam, marked to indicate their weight, and of a rigid nonflowable material.

Subp. 3. **Lifelines on single point suspension scaffolds.** A lifeline that meets the requirements of Code of Federal Regulations, title 29, section 1926.104(b), shall be installed for single point suspension scaffolds. Employees working on the scaffold shall be provided with a safety belt and lanyard that meet the requirements of Code of Federal Regulations, title 29, section 1926.104, and shall be required to tie off to the lifeline.

Subp. 4. **Broken wire safeties.** When two point scaffolds are equipped with broken wire safeties, the employees may tie off to a substantial member of the scaffold itself. A "substantial member" is a member capable of withstanding the anticipated load. Guardrails are not considered substantial members. The maximum potential fall before the lanyard becomes taut shall be six feet.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0080 WELLS, PITS, SHAFTS, AND OTHER SIMILAR SPACES.

All wells, pits, shafts, and other similar spaces shall be barricaded or covered. Upon completion of exploration and similar operations, temporary wells, pits, shafts, and other similar spaces shall be backfilled.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

GENERAL ENVIRONMENTAL CONTROLS

5205.0100 SUBMISSION OF ENVIRONMENTAL CONTROL MEASURES.

Submission of plans for engineering control of dust, fumes, gas, vapor, or mist generating operations is not required except as noted in part 5205.0110, subpart 4. Tests shall be conducted after the installation of engineering controls to determine whether the control measure is effective in maintaining the exposure concentrations of toxic materials below those limits specified herein.

Statutory Authority: *MS s 182.655; 182.657*

History: *12 SR 634*

5205.0105 VENT PIPE OUTLETS.

Vent pipe outlets for hazardous substances, as defined by part 5206.0100, subpart 7, under pressure, including ammonia and refrigerant compressor systems, shall be so located that the discharge is released at a point outside of the building where it will not reenter the building or work area.

Statutory Authority: *MS s 182.655.*

History: *12 SR 634*

5205.0110 WORKROOM VENTILATION AND TEMPERATURE.

Subpart 1. **Air.** Air shall be provided and distributed in all workrooms as required in this code, unless prohibited by process requirements.

Outside air shall be provided to all workrooms at the rate of 15 cubic feet per minute per person.

Air circulated in any workroom shall be supplied through air inlets arranged, located, and equipped so that the workers shall not be subjected to air velocities exceeding 200 feet per minute except under special circumstances specified in this code or where approved by the Department of Labor and Industry.

Subp. 2. **Temperature and humidity table.** The following tables shall be used as a guide in appraising and controlling health hazards associated with extremes in temperature and humidity.

High Environmental Dry and Wet Bulb Temperatures* That can Be Tolerated in Daily Work by Healthy, Acclimatized Persons Wearing Warm Weather Clothing

**(Including Radiation Effect.)*

***ET = Effective Temperature as defined in "Industrial Ventilation, A Manual of Recommended Practice," as issued by the American Conference of Governmental Industrial Hygienists, Committee on Industrial Ventilation, Lansing, Michigan.*

If thermal radiation appears to be an important factor, the value listed above should be corrected accordingly.

Subp. 3. **Minimum air temperature.** Workroom temperatures shall be maintained as follows:

A. The minimum air temperature of 60 degrees Fahrenheit shall be maintained in all rooms where work of a strenuous nature is performed, unless prohibited by process requirements.

B. The minimum air temperature of 65 degrees Fahrenheit shall be maintained in all other workrooms unless prohibited by process requirements.

Subp. 4. **Recirculated air.** Air from any exhaust system handling materials listed in Code of Federal Regulations, title 29, subpart Z, shall not be recirculated without written permission from the Department of Labor and Industry.

5205.0115 GAS FIRED MACHINES AND APPLIANCES.

The flame of the gas pilot, burner, or burners in gas fired units, except process heaters in refineries and top burners on domestic kitchen type stoves, shall be protected by a quick acting, flame sensitive safeguard that will automatically shut off the fuel supply in case of pilot or burner failure.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0116 CARBON MONOXIDE MONITORING.

Subpart 1. **Internal combustion engine powered industrial trucks.** The employer shall monitor environmental exposure of employees to carbon monoxide whenever internal combustion engine powered industrial trucks as defined in Code of Federal Regulations, title 29, section 1910.178(a)(1) are operated indoors to ensure that carbon monoxide levels do not exceed those given in Code of Federal Regulations, title 29, section 1910.1000, Table Z-1. The air monitoring shall be done at least quarterly and represent exposures during a day of highest usage in the areas where employee carbon monoxide exposure is most likely.

Subp. 2. **Tailpipe exhaust gas analysis.** The employer shall ensure that powered industrial truck engine exhaust gases do not contain more than one percent carbon monoxide for propane fueled trucks or two percent carbon monoxide for gasoline fueled trucks measured at idle and at three-fourths throttle during final engine tuning in a regular maintenance program.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

ILLUMINATION

5205.0120 MINIMUM LEVELS OF ILLUMINATION.

Subpart 1. For traversed spaces. Illumination by daylight or artificial light shall be supplied for traversed spaces, such as hallways, roadways, etc., during working hours, and for work when attended by operators. Minimum levels of illumination, as listed in the following table, are required in all places of employment in Minnesota. Values greater than these minima shall be used when ordered by the Occupational Safety and Health Division.

Illumination on Traversed Spaces

	Recommended Minimum Footcandles
Roadways, yard thoroughfares	2-1
Storage spaces, aisles and passageways in workrooms, excepting exits and passageways leading thereto	3-2
Spaces such as stairways, hallways, exits and passages leading thereto	5-3
Spaces such as locker rooms, wash rooms, toilet rooms, and passageways where there are exposed moving machines, hot pipes, or live electric parts	6-4

Subp. 2. At the working place.

Illumination at the Work

	Recommended Minimum Footcandles
Where discrimination of detail is not essential: Work such as handling material of a coarse nature, grinding clay products, rough sorting, coal and ash handling, foundry charging	5-3
Where slight discrimination of detail is essential: Work such as rough machining, rough assembling, rough bench work, rough forging, grain milling	10-5
Where moderate discrimination of detail is essential: Work such as machining, assembly work, bench work, fine core making in foundries	30
Where close discrimination of detail is essential: Work such as fine lathe work, pattern making, tool making, weaving or sewing light-colored silk or woolen textiles, office work, accounting, typewriting	50
Where discrimination of minute detail is essential: Work such as drafting, weaving or sewing dark colored material, very fine inspection or inspection of very dark goods	100-25

The preceding table gives the range of minimum illumination values that are considered desirable for different classes of work. These values are based upon practice established through years of experience. Elderly persons or persons with defective eyesight require more

light than do those having perfect vision. A range of footcandle values is given for each group of operations. In modern practice it will usually be found desirable to select values in or even beyond the upper portion of the range.

It is recognized that any specific process when carried on in different factories is performed with different degrees of fineness and with other variations, so that one factory may need more illumination than another for the same class of work. In the table, ranges of footcandle values are given to correspond to the variations actually existing in practice. Attention is called to the fact that the values in the table are operating values, that is, they apply to measurements of the lighting system in ordinary use, not simply when the lamps and reflectors are new and clean.

Statutory Authority: *MS s 182.657*

5205.0130 DIFFUSION AND DISTRIBUTION OF LIGHT.

Subpart 1. Requirement. Lighting, whether natural or artificial, shall be such as to provide good distribution of light and to avoid glare and objectional shadows and extreme contrasts. In artificial lighting, lamps shall be so installed in regard to their height, location, and spacing and shall be so equipped with reflectors, shades, or other suitable accessories as to accomplish these objects.

Subp. 2. Glare. Bare light sources, such as exposed lamp filaments, located within the ordinary field of the worker's vision are presumptive evidence of glare. The principal causes of glare are:

A. the light source may be too bright; that is, it may have too high a candlepower per square inch of area;

B. the light source may be too powerful for comfort; that is, it may have too great a total candlepower in the direction of the eye;

C. a given light source may be located at too short a distance from the eye or it may lie too near the center of the field of vision for comfort; that is, within too small an angle from the ordinary line of sight;

D. the contrast between the light source and its darker surroundings may be too great;

E. the time of exposure may be too great; that is, the eye may be subjected to the strain caused by a light source of given strength within the field of vision for too long a time.

Glare from natural lighting may frequently be reduced by the use of refracting or diffusing glass in windows and skylights, and by the rearrangement of machines and benches so that operators are not required to face windows.

Statutory Authority: *MS s 182.657*

5205.0140 EXIT AND EMERGENCY LIGHTING.

Subpart 1. Stairway and exit lighting. The lighting to be provided in all important stairways and all exits from work places and in the passageways related thereto shall be so supplied that it will not be subject to failure of the room or workspace lighting from internal causes. In artificial illumination, the service for exit and emergency lighting shall preferably be from an independent connection or connections extending back to the main service entrance.

Subp. 2. Separate supply source. In cases of unusual danger which may exist on account of the type of building or nature of the work, crowded conditions, or lack of suitable exit space, an independent service shall be assured by connecting to a separate source of supply without or within the building. During the hours of occupancy when daylight is lacking, this separate source of supply shall be connected so as to function continuously or to come on automatically upon failure of the regular lighting service.

Statutory Authority: *MS s 182.655; 182.657*

History: *12 SR 634*

5205.0150 MAINTAINING THE LEVEL OF ILLUMINATION.

Subpart 1. Regular maintenance system. The proper maintenance of equipment for both natural and artificial lighting is essential. Systems which are adequate when first

installed will soon deteriorate unless properly maintained. For continued effectiveness and economy in lighting, the factory owner shall establish a regular definite system of maintenance so that skylights, side windows, lamps, and accessories are at all times kept clean, in proper adjustment, and in good repair. Means for easy access to all lighting units shall be provided for employees in charge of their maintenance. Walls and ceilings shall be repainted at regular intervals and preferably in light tones. This is especially true where systems of indirect lighting are used.

Subp. 2. **Measuring equipment.** Especially in connection with the maintenance of lighting systems, attention is called to the desirability of having available in the factory an instrument with which the footcandles of illumination received at any point can be measured. One instrument, the footcandle meter, while not designed for precise measurement, has a wide field of usefulness because, with a little practice, determinations are easily made and are accurate enough for most practical purposes. The footcandle meter is small, light in weight, and entirely self-contained. Illumination is read directly from the scale without computation or manipulation.

By measuring light actually delivered to the work, the footcandle meter automatically reveals the combined effect of all possible causes of deterioration. Ignorance of the magnitude of deterioration has often been the cause of inadequate maintenance.

Statutory Authority: *MS s 182.657*

5205.0160 [Repealed, 12 SR 634]

5205.0170 [Repealed, 12 SR 634]

5205.0180 [Repealed, 12 SR 634]

VENTILATION FOR GARAGES

5205.0200 GARAGE VENTILATION.

Subpart 1. **Scope.** Ventilation shall be provided for all repair garages, service stations, body shops, and all live storage garages, housing six or more vehicles driven by internal combustion engines. A live storage area is any area within a building used for the storage of fire trucks, tractors, automobiles, trucks, and other self-propelled vehicles driven in and out under their own power.

Subp. 2. **Size of general ventilation system.** The ventilation system shall be capable of removing a volume of air not less than three-fourths cubic foot per minute per square foot of floor area in garages and not less than one-half cubic foot per minute per square foot of floor area in service stations. Exhaust ducts shall not be more than 18 inches from the floor, so placed as to remove carbon monoxide gas from the entire garage. An equal amount of tempered fresh supply air shall be provided.

Subp. 3. **Size of vehicle exhaust pipe ventilation system.** In addition to general ventilation requirements, exhaust gases from the internal combustion engines being tested shall be discharged to the outdoors through a duct or flexible hose of noncombustible material of suitable size attached as an extension to the exhaust pipe. Repair stalls may be located adjacent to an outside wall so that ten feet or less of extension duct will reach the outdoors through openings not more than one foot above floor level. If repair stalls are not so located, each stall shall be provided with a suitable exhaust extension duct or flexible hose that is or can be connected to a mechanical exhaust system and to the exhaust pipe of the vehicle. The mechanical exhaust system shall have a capacity in accordance with the following table:

Engine Type	Engine Horsepower	cfm per Tailpipe	Minimum Flexible Duct Inside Diameter, Inches
Gasoline	200 and under	100	3
Gasoline	over 200	200	4
Diesel	—	400	4-1/2

Subp. 4. **Inspection and repair pits.** Inspection and repair pits shall be provided with a ventilating system capable of assuring one complete air change every five minutes (12 air

changes per hour). The exhaust air inlet opening or openings shall terminate in a grille that shall be perpendicular to the floor. The bottom of the ventilation openings shall extend to the floor at the lowest point or points of the pit.

STEAM BOILERS

5205.0330 STEAM BOILERS.

Subpart 1. **Scope.** The requirements of this item shall not apply to heating plants in buildings occupied solely for residence purposes, with accommodations therein not to exceed four families; to railroad locomotives; nor to railroad locomotive engineers employed by railroad companies.

Subp. 2. **Definition.** Any steam boiler with a safety valve set to permit a pressure exceeding 15 pounds shall be considered a high-pressure steam boiler.

Subp. 3. **Safety valves.** Safety valves shall not discharge within seven feet of floor, platform, ground, or boiler top, across a passageway or foot-walk or in such a way as to endanger persons operating stop valves. The arrangement of piping must not be such as to create a back pressure on the safety valve.

Subp. 4. **Boiler blowoffs.** Open blowoffs shall not discharge within seven feet of floor, platform, or ground, across a passageway.

Subp. 5. **Exits from boiler room.** Safe exit from all parts of boiler room shall be provided by at least two stairways, ladders permanently fastened in place, or other means of exit.

Subp. 6. **Boiler valve locks.** An effective valve locking device is one which will prevent any motion of the valve stem, and which is so attached to the valve that it cannot be removed. When two or more boilers are connected to a common steam, feedwater, or blowoff line, at least one controlling valve in the connection from each boiler to each such common steam, feed-water, or blowoff line shall be equipped with an effective valve locking device; and whenever a person is working in any boiler of a battery, the steam, feed-water and blowoff valves shall be closed and locked.

Boiler Valve Lock

Subp. 7. **Nonreturn valves.** A nonreturn valve is one which will automatically close and prevent steam from the main line from flowing back into the boiler if the pressure in the latter should fall below that in the steam line. Where two or more boilers are connected to one steam line, a nonreturn valve shall be provided in the main steam connection of each boiler, either in addition to or combined with the regular stop valve.

Statutory Authority: *MS s 182.657*

ELEVATORS, DUMBWAITERS, ESCALATORS, AND MOVING WALKS

5205.0400 SCOPE.

The matters covered in this code shall include rules for passenger elevators, freight elevators, hoists, lifts, dumbwaiters, moving stairways, moving walks, or any mechanical device or apparatus, permanently installed and fixed in position in any building or structure except private residences, for the purpose of conveying people, animals, vehicles, merchandise, building materials, or any other load regardless of whether the load is to be conveyed above or below the grade line.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0401 APPLICATION.

Parts 5205.0400 to 5205.0590 apply to the construction, installation, alteration, and operation of all the installations listed in part 5205.0400.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

5205.0410 DEFINITIONS.

Subpart 1. **Existing installation.** "Existing installation" means one for which, before October 10, 1987:

- A. all work of installation was completed; or
- B. the plans and specifications were filed with the enforcing authority and work was begun not later than 12 months after approval of the plans and specifications.

Subp. 2. **New installation.** "New installation" means any installation that is not an existing installation.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0420 EXISTING INSTALLATIONS.

Subpart 1. **Requirements.** All existing installations may be continued in service as long as they are properly maintained and are installed and maintained in a safe condition. The Department of Labor and Industry shall have the authority to shut down any piece of equipment covered by parts 5205.0400 to 5205.0490, which is dangerous to life, limb, and adjoining property, and the equipment shall not be put back into operation until the unsafe condition has been corrected and approved by the Department of Labor and Industry. Specific requirements for existing installations are:

A. Car gates: a door or gate shall be provided at each entrance to the car.

B. Car tops: tops of car enclosures shall be so designed and installed as to be capable of sustaining a load of 300 pounds on any square area two feet on a side and 100 pounds applied at any point. Simultaneous application of these loads is not required.

C. Car walls: all sides of the elevator car, except the sides used for entrance and exit, shall be permanently enclosed.

D. Hoistway enclosure: hoistways shall be enclosed throughout their height with material equivalent to the rest of the building construction.

E. Hoistway entrance guarding: all elevator hoistway landing openings shall be provided with entrances which shall guard the full width of the opening to not less than 72 inches in height.

F. Locking devices: passenger and freight elevators shall be equipped with hoistway-unit system hoistway door interlocks.

G. Car door or gate electric contacts: car doors or gates shall be provided with electric contacts conforming to rule 111.5 of ANSI A17.1-1984.

H. Noncrushing astragals: a fire-resistive, nonshearing, and noncrushing member of either the meeting or overlapping type shall be provided on the upper panel of vertical opening hoistway doors to close the space between the rigid door sections when in contact with the stops.

I. Car safety and speed governors: the car of every elevator suspended by wire rope shall be provided with a car safety device attached to the lower member of the car frame. On all elevators where travel exceeds two stories or 15 feet, car safeties shall be activated by speed governors.

J. Operating devices: all operating devices shall be of the enclosed electric type. Rope or rod operated devices activated by hand, or rope operating devices activated by wheels, levers, or cranks, shall be removed. Exception: this shall not be considered a material change.

Subp. 2. **Material changes.** Any installation which is materially changed after October 10, 1987, shall comply with all of the requirements covering a new installation. A material change is defined as any change which moves the location, increases or decreases the length of travel, changes the type of operation, increases the speed or carrying capacity, or changes the types of power supply of an existing installation.

Subp. 3. **Repairs or rebuilding required.** Any installation, whether new or existing, which shall become damaged, defective, or worn by fire or other causes including ordinary wear to such an extent that it becomes dangerous to life, limb, and adjoining property shall be repaired or rebuilt in conformity with the provisions of parts 5205.0400 to 5205.0490 for new installations. Such equipment shall be taken out of service until such unsafe condition has been removed.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0430 INSPECTIONS, TESTS, AND APPROVAL.

Subpart 1. **Approval of plan.** Any person, firm, or corporation desiring to install, relocate, alter materially, or extend any installation covered by parts 5205.0400 to 5205.0490 shall be required to obtain approval for so doing from the Department of Labor and Industry.

Subp. 2. **Inspections and tests.** It shall be unlawful for any person, firm, or corporation to put into service any installation covered by parts 5205.0400 to 5205.0490 whether the installation is newly installed, relocated, or altered materially without the installation being inspected and approved by the Department of Labor and Industry. The installer of any equipment included in parts 5205.0400 to 5205.0490 shall notify the Department of Labor and Industry seven days before completion of the installation for the inspection. The Department of Labor and Industry shall have the authority to require tests necessary to prove the safe operation of any installation providing these tests meet the requirements as outlined in ANSI A17.1-1984 and supplements.

Subp. 3. **Approval.** A certificate or letter of approval shall be issued by the Department of Labor and Industry for such installation when the entire installation is completed in conformity with parts 5205.0400 to 5205.0490. The entire installation shall include all enclosures or shafts, gates, doors, machinery safety and control devices, and all other appurtenances necessary.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0440 ACCIDENTS.

Subpart 1. **Notification.** The owner or person in control of an elevator or other installation covered by parts 5205.0400 to 5205.0490 shall promptly notify the Department of Labor and Industry of any accident to person or apparatus, on, about, or in connection with such elevator or other installation, and shall afford the Department of Labor and Industry every facility for investigating such accident and the damage resulting therefrom. Notification may be given to the Department of Labor and Industry by telephone or verbally, but such notification shall be confirmed in writing.

Subp. 2. **Investigation.** The Department of Labor and Industry shall make or cause to be made an investigation and the report of such investigation shall be placed on file in the office of the Department of Labor and Industry. Such report shall give in detail the cause or causes, so far as they can be determined, and such report shall be open to public inspection.

Subp. 3. **Operation discontinued.** When an accident involves the failure or destruction of a part of the installation or the operation mechanism, the elevator or other installation shall be taken out of service and shall not be used again until it has been made safe and such reuse approved by the Department of Labor and Industry. The Department of Labor and Industry may, if deemed necessary, order the discontinuance of operation of any such elevator or installation until a new certificate of approval has been issued.

Subp. 4. **Removal of parts restricted.** No part of the damaged installation, construction, or operating mechanism shall be removed from the premises until permission is granted by the Department of Labor and Industry.

Statutory Authority: *MS s 182.655*

5205.0450 STANDARDS INCORPORATED BY REFERENCE.

The American National Standard Safety Code for Elevators, Dumbwaiters, Escalators and Moving Walks, ANSI A17.1-1984, including supplements, is incorporated by reference and made a part of these Minnesota Department of Labor and Industry occupational safety and health rules.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0460 EXCEPTIONS AND AMENDMENTS TO ANSI A17.1.

Subpart 1. **Winding drum machine.** Winding drum machines shall not be permitted on new elevator installations nor as replacements on existing installations.

Subp. 2. **Swing doors.** Horizontal swing doors, either single section or center opening two section, shall not be permitted on new elevator installations nor as replacements on exist-

ing installations unless the conditions are such as to make it impossible to install other than swing doors.

Subp. 3. **Side exits.** Side emergency exits on elevator cars shall not be permitted.

Subp. 4. **Solid bumpers.** Solid bumpers shall not be permitted on new installations nor as a replacement on existing installations.

Subp. 5. **Door unlocking devices.** Hoistway door unlocking devices shall not be permitted except at the bottom landings.

A. Top and bottom landings shall be provided with hoistway access switches conforming to rules 111.9b and 111.9c of ANSI A17.1-1984.

B. The door at the lowest landing shall be provided with a special key not easily duplicated and said key shall be available only to elevator mechanics and inspectors. The interlocks shall be designed and adjusted as to prevent movement of the car until after the door is closed and in the locking position.

C. The operating means for unlocking hoistway doors shall be kept on the premises by the person responsible for the maintenance and operation of the elevators in a location readily accessible to qualified persons in case of an emergency but where they are not accessible to the general public.

Subp. 6. **Door openings.** Elevator doors shall provide a clear opening of at least 32 inches.

Subp. 7. **Door closing speed.** Automatic closing doors shall have a closing interval of not less than three seconds except center opening horizontal slide doors.

Subp. 8. **Operation of elevators under fire or other emergency conditions.** All elevators having a travel of 25 feet (7.62 meters) or more, above or below the designated level must conform to the requirements of Rule 211.3 of ANSI A17.1-1984. NOTE: Section 3 of Rule 211.3 defines "designated level."

In buildings with elevators requiring Phase I and II operation as defined in ANSI A17.1-1984 and supplement ANSI A17.1a-1985, all floors must be served by cars sized to accommodate an ambulance stretcher in the horizontal position. The opening to the elevator car must be capable of passageway for an ambulance stretcher.

Subp. 9. **Height of call buttons.** Exterior elevator call buttons shall not be placed higher than 60 inches above the floor. No door opening and door closing buttons, or elevator floor buttons shall be placed higher than 60 inches above the floor.

Subp. 10. **Standby power.** Standby power must be provided as required by the Uniform Building Code, section 5103(c).

Subp. 11. **Emergency communications.** Every elevator car shall be provided with a two-way communication system connected to an approved emergency service which operates 24 hours every day.

Subp. 12. **Illumination.** A guarded light and convenience outlet shall be provided on the top and underside of each elevator car.

Subp. 13. **Limited use of an elevator.** When a building or structure is to be equipped with one or more elevators, at least one of such elevators may be approved for limited use prior to the completion of the building or structure. The use of such elevators may be permitted by the Department of Labor and Industry under the authority of a limited permit issued for each class of service. Such limited permit shall specify the class of service permitted and it shall not be issued until the elevator has been tested with rated load and the car safety and terminal stopping equipment has been tested to determine the safety of the equipment and until permanent or temporary guards or enclosures are placed on the car and around the hoistway and at the landing entrance on each floor. Landing entrance guards shall be provided with locks that can be released from the hoistway side only. Automatic and continuous pressure elevators shall not be placed in a temporary operation from the landing push buttons unless door locking devices and/or interlocks are installed and operative.

Subp. 14. **Dumbwaiters and hand-powered elevators.** All dumbwaiters and hand-powered elevators shall be equipped with a broken rope safety device.

Subp. 15. [Repealed, 12 SR 634]

Subp. 16. **Hoistway door protection in passenger elevators.** Hoistway doors on all passenger elevators shall not be solely dependent upon the door edge reopening device for

protection from the doors closing on an obstruction, but shall also be provided with an approved light beam or electronic door protection device.

Subp. 17. **Emergency keys.** All keyed switches installed to operate elevators on emergency service shall be keyed alike to a pattern approved by the Department of Labor and Industry. In lieu of the above, keys for emergency elevator service may be in a metal box placed in a location approved by the Department of Labor and Industry, provided the box is locked with a five pin tumbler core lock or equivalent which is keyed to the same pattern.

Subp. 18. **Special requirement.** One car in each bank of automatic operation elevators serving five or more floors above or below the main floor or having a travel of 50 feet or more above or below the main floor shall meet the requirements of rule 211.3a of ANSI A17.1-1984.

Subp. 19. [Repealed, 12 SR 634]

Subp. 20. **Fire resistive construction.** Hoistways shall be enclosed throughout their height with fire resistive enclosures as required by part IV of the Uniform Building Code.

Partitions between fire resistive hoistways and machine rooms having fire resistive enclosures and that are located at a side of or beneath the hoistway may be of unperforated non-combustible material at least equal to 0.059878 inches (1.519 millimeters) thick sheet steel in strength and stiffness with openings essential for ropes, drums, sheaves, and other elevator equipment.

All hoistway openings shall be provided with fire resistive protective assemblies. The fire resistance rating shall not be less than 1-1/2 hours when installed in two hour fire resistance rated construction. Protective assemblies installed in fire resistance rated construction of less than two hours shall have ratings as required by the Uniform Building Code. The fire resistance rating shall be determined by the test specified in section 1102 of the Uniform Building Code.

Subp. 21. **Multiple hoistways.** If there are three or fewer elevator cars in a building, they may be located within the same hoistway enclosure. If there are four elevator cars, they shall be divided so that at least two separate hoistway enclosures are provided. If there are more than four elevators, not more than four elevator cars may be located within a single hoistway enclosure.

Subp. 22. **Control of smoke and hot gases.** Hoistways of elevators shall be provided with means to prevent the accumulation of smoke and hot gases in case of fire. Hoistways housing elevators extending through more than two floor levels shall be vented to the outside. The area of the vent shall be not less than 3-1/2 percent of the area of the elevator shaft, as long as a minimum of three square feet per elevator is provided.

The venting of each individual hoistway shall be independent from any other hoistway venting, and the interconnection of separate hoistways for the purpose of venting is prohibited.

Vents shall be manually openable or remote control automatic vents. Location of operating devices is subject to the approval of the fire chief.

Subp. 23. **Location of vents.** Vents shall be located:

A. in the side of the hoistway enclosure directly below the floor or floors at the top of the hoistway, and shall open either directly to the outer air or through noncombustible ducts to the outer air; or

B. in the wall or roof of the penthouse or overhead machinery space above the roof, if the openings have a total area not less than the minimum specified in rule 100.4c of ANSI A17.1-1984. Vents passing through machine rooms shall be in noncombustible ducts. When a vent is installed in the roof of a hoistway, a protective grille shall be provided to prevent persons from falling into the hoistway.

Subp. 24. **Pressurization of hoistway.** If air pressurization of a hoistway is used as a means of smoke and hot gas control, the air shall not be introduced into the hoistway in such a manner as to cause erratic operation by impingement of traveling cables, selector tapes, governor ropes, compensating ropes, and other components sensitive to excessive movement or deflection.

Subp. 25. **Emergency signs.** Except at the main entrance level, an approved pictorial sign of a standardized design shall be posted adjacent to each elevator call station to indicate that, in case of fire, the elevator will not operate and exit stairways should be used.

Subp. 26. **Emergency stop switches.** Emergency stop switches shall not be installed inside the car on new installations of automatic operation elevators.

NOTE: Emergency stop switches shall not be removed from existing automatic operation elevators that do not conform to rule 210.10 of ANSI A17.1-1984.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0470 STAGE AND ORCHESTRA LIFTS.

Stage and orchestra lifts shall be designed, installed, constructed, and maintained so as to be reasonably safe to life, limb, and adjoining property and shall be approved by the Department of Labor and Industry prior to installation or construction.

Statutory Authority: *MS s 182.655*

5205.0480 MECHANIZED PARKING GARAGE EQUIPMENT.

Mechanized parking garage equipment shall be designed, constructed, installed, and maintained so as to be reasonably safe to life, limb, and adjoining property, and shall conform to the standards specified in the American Standard Safety Code for Mechanized Parking Garage Equipment ANSI A113.1-1964 (R1971).

Statutory Authority: *MS s 182.655*

5205.0490 WHEELCHAIR ELEVATING DEVICES.

Wheelchair elevating devices shall conform to the requirements of ANSI A17.1-1984, part XX, and the requirements of the Minnesota State Building Code, parts 1320.2001 to 1320.2035.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

PLATFORM MANLIFTS**5205.0550 INSTALLATION LIMITATIONS.**

Subject to the approval of the Department of Labor and Industry, manlifts may be installed in buildings where such manlifts are not accessible to the public and where their installation and use are safe. Such manlifts shall comply with the safety requirements set out in this part:

A. The use of manlifts shall be restricted to employees and authorized persons who are trained in their use. New employees shall be individually and properly instructed in the use of manlifts.

B. The area adjoining the floor opening shall be kept clear and adequately lighted at all times.

C. Signs shall be posted at a conspicuous position on each landing, at approximately eye level, indicating "Authorized Personnel Only."

Statutory Authority: *MS s 182.655*

5205.0560 INSPECTION.

Before final approval, an inspection of each new or relocated manlift shall be made by the Department of Labor and Industry.

Statutory Authority: *MS s 182.655*

5205.0570 TYPES OF MANLIFTS.

Manlifts may be of the following types: hand-powered platform passenger type manlifts or special purpose personnel elevators.

Statutory Authority: *MS s 182.655*

5205.0580 HAND-POWERED PLATFORM PASSENGER TYPE MANLIFTS.

Subpart 1. **Requirement.** Hand-powered platform passenger type manlifts shall conform to the following requirements.

Subp. 2. **Sill clearance.** The clearance between the platform and the landing shall be not more than 1-1/2 inches nor less than three-fourths inch.

Subp. 3. **Guarding of access openings.** Access openings shall be guarded by semiautomatic vertical sliding gates or by self-closing swing gates. Such gates shall be equipped with a top crossmember not less than 42 inches above the floor, a bottom crossmember not more than one-half inch above the floor, and with at least one intermediate crossmember. The gates shall be placed within four inches horizontally from the landing sill.

Subp. 4. **Shaftway enclosures.** All unused sides of the shaftway shall be enclosed to a height of at least eight feet above the floor.

Subp. 5. **Ladders.** A fixed ladder shall be installed in the shaftway accessible from the manlift at any point within its travel to provide a means of exit from the elevator hatchway.

Subp. 6. **Car sides.** The car shall be enclosed to a height of at least 42 inches on all sides not used for entrances.

Subp. 7. **Car construction.** Car frames and platforms shall be of metal or sound seasoned wood designed with a safety factor of not less than four for metal construction and six for wood construction based on the rated load uniformly distributed. Connections between frame members of the car frame and platform shall be riveted, bolted, or welded.

Glass shall not be used on any part of the frame or enclosure.

Subp. 8. **Counterbalancing of cars.** Cars counterbalancing each other shall not be permitted.

Subp. 9. **Car safety device.** All cars shall be provided with a car safety device attached to the top or bottom of each car frame capable of stopping and sustaining the car and its rated load. The car safety device is not required to be operated by a speed governor and may be of the instantaneous type operated as a result of the breaking or slackening of the suspension members.

Subp. 10. **Compensating cable.** Where the travel exceeds 40 feet, compensating cables or chains properly guided shall be provided.

Subp. 11. **Load capacity.** The rated load capacity shall not exceed 300 pounds. Only one person shall be permitted to ride elevator at a time. The movement of freight or materials on elevator is prohibited.

Subp. 12. **Load tests.** A rated load test and a test of the car safety device with rated load in the car shall be made on each new or relocated installation before it is placed in service.

Subp. 13. **Guide rails.** Cars and counterweights shall be provided with steel guide rails or straight grained seasoned wood free from knots, shakes, dry rot, or other imperfections.

Subp. 14. **Guide rail fastenings.** Guide rails shall be securely fastened with through-bolts or clips of such strength, design, and spacing that:

A. the guide rails and their fastenings shall not deflect more than one-quarter inch under normal operation;

B. the guide rails and their fastenings shall withstand the application of the safety when stopping the car with rated load under free-fall conditions;

C. car and counterweight guide rails shall rest on suitable supports and extend at the top of the hoistway sufficiently to prevent the guide shoes from running off the guide rails in the case of the car on counterweight traveling beyond the terminal landings.

Subp. 15. **Car counterweights.** When counterweight sections are used, they shall be secured by at least two tie rods passing through holes in each section. The rods shall have lock nuts at each end secured by cotter pins.

Subp. 16. **Factors of safety.** The factor of safety, based on static loads, to be used in the design of driving machines and sheaves shall not be less than eight for wrought iron or rod steel and ten for cast iron or other materials.

Subp. 17. **Car brake.** Each car shall be equipped with a manual dead-man type brake which operates in either direction of travel and is capable of stopping and holding the car with its rated load at any point in its limit of travel.

Subp. 18. **Overhead beams.** Overhead beams and their supports shall be designed to withstand the static load plus twice the suspended load without deflection exceeding the stress of the materials used.

Subp. 19. **Machine access.** Adequate and permanent means of access shall be provided to all equipment for maintenance and inspection.

Subp. 20. **Power driving mechanism.** Power driving mechanisms shall not be attached to or made part of any hand powered elevator.

Subp. 21. **Suspension cables.** Suspension means shall consist of not less than two wire ropes of not less than one-half inch diameter each.

Subp. 22. **Sheaves.** All hoisting and counterweight sheaves shall have a diameter of at least 40 times the diameter of the cable passing over them.

Subp. 23. **Cable fastenings.** Car and counterweight cable ends, except such fastenings as are required for compensating cables or chains, shall be fastened by passing through tapered and babbitted sockets with the same requirements of those for power elevators or secured by approved clamp or special fastening devices conforming to the following:

A. clamps shall not be of the U-bolt type;

B. both members of the clamps shall be provided with seats conforming with the lay of the rope;

C. clamps shall be drop forgings; and

D. ropes shall be passed around metal thimbles.

Subp. 24. **Operating rope.** The operating rope may pass through the car crossheads if a guard to prevent entry of the hand is provided.

Subp. 25. **Car locking devices.** A separate locking device, independent of the manual brake, that will hold the car and its rated load at each landing shall be provided. This device may be either manual or automatic.

Subp. 26. **Counterweight guarding.** The counterweight shall be fully enclosed for the full length of its travel, except for an inspection section at the lower limit of travel. The inspection section shall be large enough only to inspect the fastenings and be covered with a screen or mesh which will reject a two-inch ball.

Subp. 27. **Shaftway illumination.** Shaftway illumination shall be adequate to enable the operator to have full view of all obstructions and hazards which might possibly cause injury.

Subp. 28. **Bumper springs.** Bumper springs shall be provided either on the top of the car or on the bottom of the sheave supports and shall be of sufficient strength to absorb the impact of the car and its load.

Subp. 29. **Car counterbalance weights.** If weights are to be used to properly counterbalance car, a suitable box or container shall be mounted firmly in the elevator car to contain such weights while in use.

Subp. 30. **Car gate.** A car gate or guardrail 42 inches from car floor capable of withstanding a lateral pressure of 250 pounds without causing structural failure shall be provided.

Subp. 31. **Pit buffers.** Spring buffers of such a design and construction as to absorb the energy of the car with a capacity load shall be provided at the lowest limit of travel.

Statutory Authority: *MS s 182.655*

5205.0590 SPECIAL PURPOSE PERSONNEL ELEVATORS.

Special purpose personnel elevators may be installed providing they comply with the requirements included in ANSI A17.1-1978, Part XV, Special Purpose Personnel Elevators.

Statutory Authority: *MS s 182.655*

MAINTENANCE AND REPAIR OF BUILDINGS AND EQUIPMENT

5205.0650 SCOPE.

Parts 5205.0650 to 5205.0710 apply to building and in plant maintenance and repair necessary to maintain buildings and equipment in safe operating condition.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0660 MAINTENANCE GOALS.

Subpart 1. **Building maintenance.** Buildings shall be maintained to assure that no loose parts or equipment including bricks, mortar, glass, wood, or cement parts can fall in passage or work areas occupied by employees.

Subp. 2. **Walkway maintenance.** Catwalks, platforms, walkways, and stairways shall be maintained in a condition free from the hazards associated with ice, snow, overhanging ice or snow, holes, loose members, or badly deteriorated or corroded members.

Subp. 3. **Asbestos.** Exposed friable asbestos containing materials on ceilings, beams, pipes, boilers, tanks, and similar areas shall be repaired, replaced, removed, enclosed, or encapsulated. Precautions shall be taken to protect employees as required by Code of Federal Regulations, title 29, section 1910.1001 or 1926.58.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0665 ELECTRICAL REQUIREMENTS.

Exposed noncurrent carrying metal parts of cord and plug connected equipment that may become energized shall be grounded if used near wet or conductive equipment, materials, or locations.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0670 BLOCKING AND CRIBBING MACHINERY.

Heavy machinery, equipment, or parts thereof which are suspended or held aloft by slings, cables, chains, jacks, or hoists shall be blocked or cribbed to prevent falling or shifting before employees are permitted to work under or between the members of the equipment.

Elevated bulldozer and scraper blades, power crane booms, end loader buckets, dump truck boxes, and similar equipment shall be fully lowered or adequately blocked or cribbed before being serviced or repaired.

Statutory Authority: *MS s 182.655*

5205.0675 COVERS AND OVERHEAD DOORS.

Subpart 1. **Covers.** All covers of sufficient weight or pressure to cause crushing injury to employees in the event of their powered or unpowered closure shall be fastened, secured, or blocked to prevent their closing while employees may be in the path of travel during closure.

Subp. 2. **Overhead doors.** All overhead or sliding doors with sufficient weight or closing force to cause crushing injury to employees shall be provided with a constant pressure closing switch, safety edge, pressure relief mechanism, or three button control station meeting the specifications of Underwriters' Laboratories Standard UL 325 (1987) "Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems," paragraph 29.1C. This subpart is effective January 1, 1989.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

5205.0680 [Repealed, 14 SR 2130]

5205.0685 KNIVES AND CUTTING TOOLS.

Knives and cutting tools shall be kept in sheaths or holders made for the purpose when those tools are not in use.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0686 PRESSURE HOSES.

All hand held pressure hoses and nozzles that could cause injury when the hose or nozzle is not being held, including air, water, hot water and steam, and all high temperature hoses or nozzles including hot water and steam, shall have a constant pressure control.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0690 LUBRICATION OF MOVING MACHINERY.

Machinery or equipment shall be shut down during manual lubrication unless access to lubrication fittings is safeguarded or is located far enough away from moving parts that employees cannot contact them.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0700 WIRE ROPE CLIPS.

Subpart 1. **Location of U-bolts.** Wire rope clips attached with U-bolts shall have the U-bolts on the dead or short end of the rope.

Subp. 2. **Clip construction.** Clips shall be made of drop forged steel. All nuts on the clip bolts of a newly installed rope shall be retightened after the first hour of service.

Subp. 3. **Clip spacing.** Spacing and number of clips shall be in accordance with the table below:

Rope Diameter Inches	Number of Clips Drop Forged	Minimum Spacing (inches)
1/8	2	3/4
3/16	2	1 -1/8
1/4	2	1 -1/2
5/16	2	1 -7/8
3/8	2	2 -1/4
7/16	2	2 -5/8
1/2	3	3
5/8	3	3 -3/4
3/4	4	4 -1/2
7/8	4	5 -1/4
1	5	6
1 -1/8	6	6 -1/4
1 -1/4	6	7 -1/2
1 -3/8	7	8 -1/4
1 -1/2	7	9

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0710 ALTERATION OF TOOLS AND EQUIPMENT.

All tools and equipment, whether powered or manually operated, shall be used only for their intended purpose. Tools and equipment shall not be altered, modified, or used for other than their intended purpose without the manufacturer's written approval or unless under the direction of a competent person in accordance with accepted engineering requirements to prevent creating an additional hazard.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

VEHICLES

5205.0750 MOTORIZED SELF-PROPELLED VEHICLES.

Subpart 1. **Scope.** This section applies to:

- A. all motorized, self-propelled vehicles used off the highway including industrial type trucks, crawler equipment, and rubber-tired vehicles;
- B. emergency vehicles including trucks, snow plows, road maintenance vehicles, and related equipment; and
- C. service trucks including garbage compactors.

These parts shall not apply to vehicles with less than a 20 HP motor.

Subp. 2. **General requirements.** Motorized, self-propelled vehicles shall meet the requirements of Code of Federal Regulations, title 29, sections 1926.600, 1926.601, and 1926.602.

Subp. 3. **Transportation of employees.** Vehicles being used to transport employees shall be equipped with a seating arrangement securely anchored, a rear end gate, a guardrail and steps or a ladder for mounting and dismounting.

A. Under no circumstances shall any employee be allowed to ride in a standing position or with arms or legs outside of the truck body, or seated on the side fenders, cabs, cabshields, rear of truck, or on the load unless such a position is dictated by a job assignment.

B. No explosives, flammable materials (excepting normal fuel supply), or toxic substances shall be transported in the passenger carrying area of vehicles carrying employees.

C. No vehicle transporting employees shall be moved until the driver has ascertained that all employees are seated and required guardrails and end gates are in place and doors closed.

D. No employee shall be allowed to get on or off any vehicle while it is in motion.

Subp. 4. **Vehicle inspection.** The Code of Federal Regulations, title 29, section 1926.601 (b) (14) shall apply to all vehicles covered in Code of Federal Regulations, title 29, section 1926.602.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0755 POLICE AND PATROL VEHICLES.

All police and patrol vehicles that are marked in accordance with Minnesota Statutes, section 169.98, that may be used to transport violators or offenders shall be provided with an effective barrier between the front and back seat to protect the officers from assault. The barrier may be retractable so as not to be a hindrance to officers when not transporting violators or offenders. This part is effective January 1, 1989.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

5205.0760 POWERED INDUSTRIAL TRUCK OPERATIONS.

Subpart 1. **Restricted use.** All industrial trucks designed and constructed for use on solid hard level surfaces shall be restricted to such operations.

Subp. 2. **Surface condition.** All solid hard level surfaces must be free of cracks, irregularities, or holes that could upset the balance of the industrial truck.

Subp. 3. **Load positioning.** When a fork truck operator is positioning a load in an area which is not fully visible to the fork truck operator, the operator shall be assisted by a designated person who shall direct the safe placing of the load by using predetermined signals.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0765 SCISSOR POINT PROTECTION.

Scissor points on all rubber tired skid steer equipment including front end loaders shall be guarded to protect the operator.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0770 GREASE RACKS, HOISTS, AND PITS.

Subpart 1. **Vehicle support.** Vehicles shall not be supported on jacks or held suspended by ropes, chains, or cables but shall be supported by adequate blocking or cribbing or set on supports designed for that purpose.

Subp. 2. **Barricades.** Employees shall not be allowed to stand directly in front of self-propelled vehicles while directing the vehicle onto the hoist or pit, or to work in front of a moving vehicle unless a crib or barricade, adequate to stop the vehicle, is between the employee and the moving vehicle. The crib or barricade shall not in itself create any additional hazards to the employees.

Subp. 3. **Spacing.** A space of two feet or more shall be provided as working clearance between the sides of a vehicle on a floor hoist and any wall surface.

Subp. 4. **Safety factor.** On automotive hoists, an automatic mechanical device having a safety factor of three based on the manufacturer's rated load capacity shall be provided to hold the lift in the fully extended position at the manufacturer's rated load capacity.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

MACHINE GUARDING

5205.0850 PNEUMATIC POWER TOOLS.

All pneumatically driven nailers, staplers, and other fastening equipment provided with automatic fastener feed shall have a safety device on the muzzle which is designed to prevent the tool from ejecting fasteners unless the muzzle is in contact with the work surface.

Statutory Authority: *MS s 182.655*

5205.0860 MACHINES WITH REVOLVING PARTS.

Subpart 1. **Scope.** The provisions of this part shall apply to extractors, mixers, mullers, and centrifuges.

Nothing in this part shall apply to equipment used in research laboratories or equipment with less than one-quarter HP driving motors.

Nothing in this part shall apply to any machine which must be hand-fed where the feed opening is protected either by a guarded hopper or automatic feed system which prevents the operator from reaching into the point of operation.

Subp. 2. **Guarding.** Each machine shall be fully guarded with a cover, hatch, or grate with an interlocking device that will prevent the cover, hatch, or grate from being opened while the rotating parts are in motion, and will also prevent the power operation of the machine while the cover, hatch, or grating is not fully closed and secured.

Subp. 3. **Secured position.** Each machine shall be effectively secured in position on the floor or foundation so as to eliminate unnecessary vibrations.

Subp. 4. **Labeling for operating speed.** The manufacturer's recommended speeds shall be stamped on the machine, and located where they are readily visible in letters not less than one-quarter inch in height. The maximum permissible speed shall be given in revolutions per minute (RPM).

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0865 MACHINE CONTROLS AND EQUIPMENT.

On machines with points of operation, pinch points, or nip points, each machine shall be equipped so it is possible for the operator to cut off the power to each machine without leaving the position at the point of operation.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

5205.0870 FOOT ACTUATED MACHINES.

The treadle or pedal of foot actuated machines, tools, or equipment shall be physically protected to prevent unintended operation.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0880 MOTOR START BUTTON.

The motor start button on machines with exposed points of operation, pinch points, or nip points shall be physically protected against unintended operation.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

5205.0890 HYDRAULIC PRESSES.

A barrier guard shall be maintained on all hydraulic presses, whether hand or power operated, where there is a possibility of materials being ejected from the press.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.0900 [Repealed, 12 SR 634]

5205.0910 [Repealed, 12 SR 634]

5205.0920 [Repealed, 12 SR 634]

5205.0930 [Repealed, 12 SR 634]

5205.0940 [Repealed, 12 SR 634]

5205.0950 [Repealed, 12 SR 634]

CONFINED SPACES**5205.1000 SCOPE.**

Parts 5205.1000 to 5205.1040 prescribe minimum standards for preventing worker exposure to dangerous air contamination, oxygen deficiency, or oxygen enrichment as defined by part 5205.1010, within such spaces as silos, tanks, vats, vessels, boilers, compartments, ducts, sewers, pipelines, vaults, bins, tubs, pits, and other similar spaces. A tank or other vessel under construction may not meet the definition of "confined space" until it is completely enclosed.

Parts 5205.1000 to 5205.1040 do not apply to underwater operations conducted in diving bells or other underwater devices or to supervised hyperbaric facilities.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

5205.1010 DEFINITIONS.

Subpart 1. **Confined space.** "Confined space" is defined as a special configuration that could result in any of the following:

A. atmospheric condition – a condition in which a dangerous air contamination, oxygen deficiency, or oxygen enrichment may exist or develop;

B. entry/exit access – a condition where the emergency removal of a suddenly disabled person is difficult due to the location or size of the access opening; or

C. engulfment condition – a condition where the risk of engulfment exists or could develop.

Subp. 2. **Confined space entry.** "Confined space entry" means any action resulting in any part of the worker's face breaking the plane of any opening of the confined space, and includes any ensuing work activities inside the confined space.

Subp. 3. **Dangerous air contamination.** "Dangerous air contamination" is an atmosphere presenting a threat of death, acute injury, illness, or disablement due to the presence of flammable, explosive, toxic, or otherwise injurious or incapacitating substances.

A. Dangerous air contamination due to the flammability of a gas or vapor is defined as an atmosphere containing the gas or vapor at a concentration greater than ten percent of its lower explosive (lower flammable) limit.

B. Dangerous air contamination due to a combustible particulate is defined as a concentration greater than ten percent of the minimum explosive concentration of the particulate.

C. Dangerous air contamination due to a toxic, corrosive, or asphyxiant substance listed in Code of Federal Regulations, title 29, part 1910, subpart Z, is defined as a concentration above the listed numerical value of the permissible exposure limit (PEL). In addition, an atmospheric concentration above the numerical limit listed on the Material Safety Data Sheet prepared for a hazardous substance in conformance with Code of Federal Regulations,

title 29, section 1910.1200(g)(2)(vi) or the Minnesota Employee Right-to-Know Standards, chapter 5206.

D. Dangerous air contamination that presents an acute illness hazard represents an atmospheric concentration immediately dangerous to life and health (IDLH); for example, above a maximum concentration from which one could escape within 30 minutes or the length of time a worker will be exposed, whichever is longer, without any escape impairing symptoms or any immediate severe health effects. "Immediate severe health effect" means that an acute clinical sign of a serious, exposure related reaction is manifested within 72 hours after exposure.

Subp. 4. **Engulfment.** "Engulfment" means the surrounding and effective capture of a person by finely divided particulate matter or a liquid.

Subp. 5. **Oxygen deficiency.** "Oxygen deficiency" is defined as an atmosphere containing oxygen at a concentration of less than 19.5 percent by volume.

Subp. 6. **Oxygen enrichment.** "Oxygen enrichment" is defined as an atmosphere containing oxygen at a concentration greater than 23 percent by volume.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

5205.1020 OPERATING PROCEDURES AND WORKER TRAINING.

Subpart 1. **Implementation.** The employer shall implement the provisions of this part before any worker is allowed to enter a confined space.

Subp. 2. **Entry permit system.** The employer shall develop, implement, and use an entry permit system that includes a written permit procedure that provides all the means necessary to:

A. determine all confined spaces and identify them to the workers to prevent unauthorized entry;

B. determine the actual and potential hazards associated with the space at the time of entry so the employer can choose the appropriate means to execute a safe entry;

C. assure by appropriate testing that the control measures used are effective; and

D. provide for preplanned emergency rescue.

Subp. 3. **Entry permit.** A written permit form must be completed before allowing a worker to enter a confined space. The written permit must contain the following minimum specific information for each permit entry space:

A. date;

B. location;

C. time of issue;

D. time of expiration;

E. names of workers assigned to enter;

F. the name and position of the person authorizing or in charge of the entry;

G. description of the hazards known or reasonably expected to be present in the confined space;

H. the atmospheric testing required to be done immediately before and during the entry period;

I. the designated individual responsible for performing the tests;

J. the personal protective equipment required, including respiratory protection, clothing, or harnesses required for entry and rescue;

K. description of any additional hazards that may be reasonably expected to be generated by the entrants' activities in the space;

L. identification of all special work practices or procedures to be followed; and

M. specification of all means of isolation, cleaning, purging, or inerting to be done before entry to remove or control those hazards, or certification that these procedures have been done if a hazardous air contamination or oxygen deficiency condition exists.

Subp. 4. **Duration and retention of permit.** The maximum duration for which a permit form may be issued is one shift except as indicated in part 5205.1040, subpart 1. Each written

permit form for confined space entry must be retained for a minimum of 30 days. Permits shall be readily available to all workers before entering a confined space, and the permits shall remain at the work site as long as the work is being performed there.

Where atmospheric testing showed a dangerous air contamination, oxygen deficiency, or oxygen enrichment, the employer shall retain the written permit form or record showing the results of the atmospheric testing for a minimum of one year.

Subp. 5. Operating procedures.

A. Written, understandable operating and rescue procedures shall be developed and provided to affected workers.

B. When respiratory protection is used, a respiratory protection program as outlined in Code of Federal Regulations, title 29, section 1910.134, shall be in place.

C. Operating procedures shall conform to the applicable requirements of parts 5205.1030 and 5205.1040 and shall include provision for surveillance of the surrounding area to avoid hazards such as drifting vapors from other work operations.

Subp. 6. Worker training.

A. Workers who will enter the confined space and standby persons required by part 5205.1040 shall be trained in operating and rescue procedures and on the hazards they may encounter. This training shall be conducted annually or before confined space entry.

B. Workers who will perform atmospheric monitoring in confined spaces shall be trained on the use of such equipment according to the manufacturers' instructions before confined space entry and then on an annual basis thereafter.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

5205.1030 PREENTRY PROCEDURES.

Subpart 1. Application. The applicable provisions of this part shall be implemented before entry into a confined space is permitted.

Subp. 2. Disconnection of lines. Lines that may convey flammable, explosive, toxic, or otherwise injurious or incapacitating substances into the space shall be disconnected, blinded, locked out, or blocked off by other positive means to prevent the development of dangerous air contamination, oxygen deficiency, or oxygen enrichment within the space. The disconnection or blind shall be so located or done in such a manner that inadvertent reconnection of the line or removal of the blind is effectively prevented. Part 5205.0680 applies where lockout devices are required.

This subpart does not apply to public utility gas distribution or gas transmission systems.

This subpart does not require blocking of all laterals to sewers or storm drains. Where experience or knowledge of industrial use indicates materials resulting in dangerous air contamination may be dumped into an occupied sewer or storm drain, all such laterals shall be blocked.

Subp. 3. Calibration of testing and monitoring equipment. Air testing and monitoring equipment shall be maintained and calibrated according to manufacturers' instructions. This equipment shall be periodically calibrated with an appropriate test gas to assure proper operation. Records of such calibration and field tests shall be maintained for a minimum of one year. Calibration and field test information, including type of test required, date tests were due, and date tests were completed, shall be affixed to the instrument or be readily available at the time of use.

Subp. 4. Air tests. The air in confined spaces shall be tested with an appropriate device or method to determine whether dangerous air contamination, oxygen deficiency, or oxygen enrichment exists before entry is made. While occupied, additional continuous or periodic monitoring for dangerous air contamination, oxygen deficiency, or oxygen enrichment shall be done. A written record of the testing results shall be made and kept at the work site for the duration of the work. Affected workers or their representatives shall be afforded an opportunity to review and record the testing results.

Subp. 5. Injurious corrosive substances. Workers in confined spaces that have last contained injurious or corrosive substances to the eyes or body shall be provided with, and

shall be required to wear, appropriate personal protective clothing or devices in accordance with Code of Federal Regulations, title 29, section 1910.132. In addition, an eyewash and safety shower as required by Code of Federal Regulations, title 29, section 1910.151 shall be provided within the work area outside of the confined space for immediate emergency use.

Subp. 6. Interconnected spaces. Where interconnected spaces are blocked off as a unit, each space shall be tested and the results recorded in accordance with subpart 4. The most hazardous condition found shall govern procedures to be followed.

Subp. 7. Ventilation. Where the existence of dangerous air contamination, oxygen deficiency, or oxygen enrichment is demonstrated by tests performed under subpart 4, existing ventilation shall be augmented by appropriate means if practical and feasible.

When additional ventilation provided in accordance with this subpart has removed dangerous air contamination, oxygen deficiency, or oxygen enrichment as demonstrated by additional testing conducted and recorded under subpart 4, entry into and work within the space may proceed subject to part 5205.1040.

Subp. 8. Ignition sources. No sources of ignition may be introduced into the space until implementation of appropriate provisions of this section has ensured that dangerous air contamination due to flammable or explosive substances does not exist.

Subp. 9. Oxygen consuming equipment. Whenever oxygen consuming equipment is to be used, measures shall be taken to ensure adequate combustion air and exhaust gas venting.

Subp. 10. Oxygen enrichment condition or use of oxygen enrichment equipment. Whenever oxygen enrichment is possible due to conditions within the space, or oxygen enrichment equipment is to be used, measures shall be taken to ensure that the oxygen level does not exceed 23 percent in the confined space. If tests indicate the oxygen level to be greater than 23 percent, hot work is prohibited until ventilating techniques have reduced the oxygen level to less than 23 percent.

Subp. 11. Smoking. Smoking shall not be allowed in confined spaces or within 20 feet of a confined space opening.

Subp. 12. Automatic fire protection systems. Where there is no ready exit from spaces equipped with automatic fire suppression systems employing harmful design concentrations of toxic or oxygen displacing gases, or total foam flooding, such systems must be deactivated. When it is not practical or safe to deactivate such systems, the provisions of part 5205.1040; subpart 3, shall apply during entry into and work within the spaces.

Statutory Authority: *MS s 182.655*

History: *12 SR 1754*

5205.1040 ENTRY INTO AND WORK WITHIN CONFINED SPACES.

Subpart 1. Class I; confined spaces where an atmosphere with dangerous air contamination, oxygen deficiency, or oxygen enrichment is unlikely to develop.

A. Employers whose operations require workers to perform routine repetitive entry into low hazard chambers such as boilers, vaults, vessels, tanks, bins, and vats, where no risk of engulfment can exist, and where the atmosphere cannot develop a dangerous air contaminant or oxygen enrichment, and where all known sources of hazard are positively controlled, may issue an annual permit for this type of entry instead of separate permits for each space, if established entry practices and procedures are in effect as outlined below. The employer may, at its discretion, allow entry by one or more workers without a standby person when work under the following conditions is performed:

(1) Establish specific entry practices and procedures as required in part 5205.1020, subpart 3, items A, B, and D to I, that must be followed for entry by annual permit before any worker may be authorized to make an entry.

(2) Train workers in the practices and procedures required for such entries.

(3) Assure that one or more of the following requirements are met:

(a) the space has been ventilated before entry using a mechanically powered ventilator for not less than is specified in the ventilation nomograph prepared for that ventilator, and that ventilation continues throughout the entry;

(b) all areas of the confined space are continuously and effectively ventilated; such ventilation shall provide positive ventilation of clean air at a rate of at least 200 cubic feet per minute per occupant, or in confined spaces larger than 2,000 cubic feet, six air changes of the confined space volume per hour; or

(c) there is no effective ventilation, but appropriate continuous oxygen monitoring is performed to assure that permit conditions are maintained.

(4) Revoke the permit whenever any tests performed during confined space occupancy show deviation from acceptable conditions to a hazardous condition. In these circumstances, entry may be made only by an entry procedure as outlined in subpart 2 or 3.

B. Employers whose operations require workers to perform routine repetitive entry into confined spaces where entry permits are required and that are unlikely to develop a dangerous air contaminant, oxygen deficiency, or oxygen enrichment and have no potential for an engulfment condition, may issue an annual permit for this type of entry instead of separate permits for each space if established entry practices and procedures are in effect as outlined below. The employer may, at its discretion, allow entry by one or more workers without a standby person when work under the following conditions is performed:

(1) Establish specific entry practices and procedures as required in part 5205.1020, subpart 3, items A, B, and D to I, that must be followed for entry by annual permit before any worker may be authorized to make an entry.

(2) Train workers in the practices and procedures required for such entries.

(3) Assure that whenever entry into a confined space is to be made, workers test the atmosphere before entry using an appropriate direct reading instrument (or other device capable of quantitatively identifying anticipated contaminants) with a remote sampling probe, testing for the following conditions and in the following order: oxygen concentration, combustible gas, and suspected toxic material, if any. While occupied, additional continuous monitoring for these gases or vapors shall be done during the entry period to assure that a potentially dangerous atmosphere does not develop in the confined space.

(4) Assure that continuous and effective positive ventilation is provided to the confined space at a minimum rate of 200 cubic feet per minute of clean air per occupant or, in confined spaces larger than 2,000 cubic feet, an exchange of six air changes of the confined space volume per hour.

(5) Revoke the permit whenever any tests performed during confined space occupancy show deviation from acceptable conditions to a hazardous condition. In these circumstances, entry may be made only by an entry procedure as outlined in subpart 2 or 3.

Subp. 2. Class II; confined spaces where an atmosphere free of dangerous air contamination, oxygen deficiency, or oxygen enrichment has been verified.

A. At least one person shall stand by on the outside of the confined space ready to give assistance in case of emergency.

B. Visual, voice, or signal line communications shall be maintained between all individuals in the confined space and the standby person.

C. An approved safety belt or harness with an attached line shall be used where practical and feasible. The free end of the line shall be secured outside the entry opening. The line shall be at least 2,000 pounds test.

D. The standby person shall not enter the confined space without alerting an emergency response team such as the fire department or other trained rescue workers of the intent to enter the confined space. Entry shall only occur after proper tests have been performed to show that a dangerous air contaminant, oxygen deficiency, or oxygen enrichment does not exist or the standby person is protected as prescribed in subpart 3, items C and D, subitem (1).

Subp. 3. Class III; confined spaces where an atmosphere free of dangerous air contamination, oxygen deficiency, or oxygen enrichment cannot be verified. The requirements of this part apply to entry into and work within a confined space whenever an atmosphere free of dangerous air contamination, oxygen deficiency, or oxygen enrichment cannot be verified through the implementation of the applicable provisions of part 5205.1030, or whenever due to an emergency, dangerous air contamination, oxygen deficiency, or oxygen enrichment cannot be prevented through the implementation of the applicable provisions of part 5205.1030.

A. Tanks, vessels, or other confined spaces with side and top openings shall be entered from side openings when practicable. For the purposes of this part, side openings are those within 42 inches of the bottom.

B. Appropriate, approved respiratory protective equipment, in accordance with Code of Federal Regulations, title 29, section 1910.134, shall be provided and worn.

C. An approved safety belt or harness with an attached line must be used. The free end of the line shall be secured outside the entry opening. The line shall be at least 2,000 pounds test.

D. At least one person shall stand by on the outside of the confined space ready to give assistance in case of emergency.

(1) The standby person shall have appropriate, approved, respiratory protective equipment, including an independent source of breathing air that conforms with Code of Federal Regulations, title 29, section 1910.134(d), available for immediate use.

(2) A standby person protected as prescribed by items C and D may enter the confined space, but only in case of emergency and only after donning the required personal protective equipment and alerting an emergency response team such as the fire department or other trained rescue workers of their intention to enter the confined space.

(3) Visual, voice, or signal line communications shall be maintained between all individuals in the confined space and the standby person.

E. When entry must be made through a top opening, the following requirements also apply.

(1) The safety harness shall be of the type that suspends a person in an upright position.

(2) An approved hoisting device or other effective means shall be provided for lifting workers out of the space.

F. Work involving the use of flame, arc, spark, or other source of ignition is prohibited within a confined space (or any adjacent space having common walls, floor, or ceiling with the confined space) that contains, or is likely to develop, dangerous air contamination due to flammable or explosive substances.

G. Whenever gases such as nitrogen are used to provide an inert atmosphere for preventing the ignition of flammable gases or vapors, no flame, arc, spark, or other source of ignition may be permitted unless the oxygen concentration is maintained at less than 20 percent of the concentration that will support combustion.

(1) Testing of the oxygen content shall be conducted with sufficient frequency to ensure conformance with this requirement.

(2) A written record of the results of such testing shall be made and kept at the work site for the duration of the work.

H. Only approved lighting and electrical equipment may be used in confined spaces subject to dangerous air contamination by flammable or explosive substances.

Subp. 4. **Precautions for emergencies involving work in confined spaces.** At least one person trained in first aid and cardiopulmonary resuscitation (CPR) shall be immediately available whenever the use of respiratory protective equipment is required by this part. Standards for CPR training shall follow the principles of the American Heart Association or the American Red Cross.

History: *12 SR 1754*

CRANES AND HOISTS

5205.1200 CRANES AND HOISTS.

Subpart 1. **Scope.** This part applies to any crane, derrick, or hoist having a maximum rated capacity of one ton or less; to railway and automobile wrecking cranes; skip hoists; hoistlike units used for horizontal pulling only; mine hoists; conveyors and shovels; drag line excavators; backhoes; and any equipment such as mobile scaffolds, towers, and platforms.

This part also applies to all monorail cranes, underhung cranes, and top running single girder cranes where the ends of the girders are fastened or fixed to the structure.

Subp. 2. **Initial inspection.** Before initial use, all new and altered cranes shall be inspected to ensure compliance with this part.

Subp. 3. **Frequent inspection.** Items A to F shall be inspected for defects at daily to monthly intervals, or as specifically indicated, including observation during operation for any defects that might appear between regular inspections. All deficiencies, such as those listed in items A to F, that constitute a safety hazard shall be corrected before placing the unit in service.

A. All functional operating mechanisms for maladjustment interfering with proper operation – daily.

B. Lines, tanks, valves, drain pumps, and other parts of air or hydraulic systems for deterioration or leakage – daily.

C. Hooks with deformation or cracks – visual inspection daily, monthly inspection with signed reports. For hooks with cracks or having more than 15 percent in excess of normal throat opening or more than ten degrees twist from the plane of the unbent hook, refer to subpart 6, item B, subitem (1).

D. Hoist chains, including end connections, for excessive wear, twist, distorted links, or stretch beyond manufacturer's recommendations – visual inspection daily, monthly inspection with signed certification record.

E. All functional operating mechanisms for excessive wear of components.

F. Rope reeving for noncompliance with manufacturer's recommendations.

Subp. 4. **Periodic inspection.** Complete inspections of the crane shall be performed monthly or as indicated in subpart 5. These inspections shall include the requirements of subpart 3 and items A to I. All deficiencies, such as those listed in items A to I, that constitute a safety hazard shall be corrected before placing the unit in service:

A. deformed, cracked, or corroded members;

B. loose bolts or rivets;

C. cracked or worn sheaves and drums;

D. worn, cracked, or distorted parts such as pins, bearings, shafts, gears, rollers, and locking and clamping devices;

E. excessive wear on brake system parts, linings, pawls, and ratchets;

F. load, wind, and other indicators over their full range, for any significant inaccuracies;

G. gasoline, diesel, electric, or other power plants for improper performance or noncompliance with applicable safety requirements;

H. excessive wear of chain drive sprockets and excessive chain stretch; and

I. electrical apparatus, for signs of pitting or any deterioration of controller contactors, limit switches, and push-button stations.

Subp. 5. **Cranes not in regular use.** A crane that has been idle for one month or more, but less than six months, shall be given an inspection conforming with the requirements of subpart 3 before being placed in service.

A crane that has been idle for over six months shall be given a complete inspection conforming with subparts 3 and 4 before being placed in service.

Standby cranes shall be inspected at least semiannually in accordance with subpart 3.

Subp. 6. **Adjustments and repairs.** Any condition disclosed by the inspections required by this part shall be corrected before operation of the crane is resumed. Adjustments and repairs shall be done only by designated, qualified personnel.

A. Adjustments shall be maintained to ensure correct functioning of all components, such as the following:

(1) all functional operating mechanisms;

(2) limit switches;

(3) control systems;

(4) brakes; and

(5) power plants.

B. Repairs or replacements required by this part shall be provided promptly before resumed operation, including any deficiencies such as:

- (1) crane hooks showing defects described in subpart 3, item C, shall be discarded;
- (2) load attachment chains and rope slings showing defects described in subpart 3, items D and E, respectively;
- (3) all critical parts that are cracked, broken, bent, or excessively worn; and
- (4) pendant control stations shall be kept clean and function labels kept legible.

C. After adjustments and repairs have been made, the crane shall not be operated until all guards have been reinstalled, safety devices reactivated, and maintenance equipment removed.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.1210 HOIST HOOK SAFETY DEVICES.

Safety latches (mousings) shall be provided on all hoist hooks used on hoists or cranes that lift or travel with loads attached. This includes the hook used to attach the hoist to the rail, trolley, or structure.

Statutory Authority: *MS s 182.655*

History: *12 SR 634*

5205.1220 WARNING SIGNAL.

Whenever a crane or hoist is used to convey molten metal, a gong or other effective warning signal shall be provided and used.

History: *12 SR 634*

PERSONNEL PLATFORMS SUSPENDED FROM CRANES AND DERRICKS

5205.1230 PERSONNEL PLATFORMS SUSPENDED FROM CRANES AND DERRICKS.

The design, construction, testing, use, and maintenance of personnel platforms and the hoisting of personnel platforms on the load lines of cranes or derricks shall meet the requirements of Code of Federal Regulations, title 29, 1926.550, paragraph (g).

HOPPERS

5205.1400 INSPECTION OF HOPPERS.

Subpart 1. **Definitions.** The terms used in this part have the meanings given them in this subpart.

A. "Aggregate" means the natural sands, gravels, and crushed stones used for mixing with cementing material in making mortars and cements.

MINNESOTA RULES 1993

297

SAFETY AND HEALTH STANDARDS 5205.1400

B. "Corrosive agent or substance" means any agent or substance with a pH factor of ten or greater or four or less.

C. "Hopper" means a metal structure designed for storing and dispensing materials, with a capacity of one ton or greater, that is shaped to allow stored materials to flow from it.

D. "Nondestructive testing" means a testing method that does not damage or destroy the test sample. Nondestructive testing includes, but is not limited to, the use of X-rays, ultrasonics, radiography, and magnetic flux.

E. "Visual inspection" means a thorough physical examination of all interior and exterior surface areas, and support members and their component parts.

Subp. 2. Inspection. Hoppers used to hold aggregate shall be inspected according to the schedule in subpart 3 if employees have access to the area beneath the hopper or the area surrounding the hopper, equal to the height of the hopper measured from the ground or floor to the hopper's highest point. The inspection shall be conducted by a person qualified to conduct the inspection under subpart 7.

Subp. 3. Inspection schedule.

A. Hoppers that must be inspected under subpart 2 shall be visually inspected every 12 months.

B. Hoppers that must be inspected under subpart 2, that have had corrosive agents or substances used within the system, shall be nondestructively tested every five years.

C. Hoppers that must be inspected under subpart 2, that have not had any corrosive agents or substances used within the system, shall be nondestructively tested every ten years.

D. Hoppers that have been modified, altered, or repaired shall be inspected under subpart 2 before returning the hopper to service when the modifications, alterations, or repairs affect the designed load capacity of the hopper. This includes, but is not limited to, relining of the hopper.

Subp. 4. Documentation. Inspections required by this part shall be documented and the required documentation shall be retained for the life of the hopper at the facility where the hopper is located. The documentation shall be made available upon request to representatives of the Occupational Safety and Health Division. The documentation of the inspections shall include:

- A. the dates on which inspections were conducted;
- B. the names, addresses, and employers of persons conducting the inspections;
- C. the means used to inspect the hoppers;
- D. the findings of the inspections;
- E. the deficiencies noted as a result of the inspections; and
- F. the dates on which recommended repairs were completed.

Subp. 5. Repairs. If deficiencies found during an inspection do not compromise the designed load capacity of the hopper, all repairs shall be made within the minimum amount of time necessary to complete repairs. If deficiencies found during an inspection do compromise the designed load capacity, the hopper shall be emptied and removed from service until all repairs are completed.

Subp. 6. Means of inspection. All inspections conducted under this part shall include visual inspections and nondestructive testing that is capable of determining that erosion, corrosion, stress, fatigue, damage, repairs, or alterations have not compromised the designed load capacity.

Subp. 7. Qualified person. A person is qualified to conduct inspections under this part if, through education, training, or experience, the person is capable of determining through visual inspections and nondestructive testing that erosion, corrosion, stress, fatigue, damage, repairs, or alterations have not compromised the designed load capacity.

History: *16 SR 542*

WORKPLACE ACCIDENT AND INJURY REDUCTION PROGRAM**5205.1500 STANDARD INDUSTRIAL CLASSIFICATION LIST.**

Employers in the standard industrial classifications listed in this part must comply with Minnesota Statutes, section 182.653, subdivision 8. The standard industrial classifications in this part are those defined by the Office of Management and Budget published in the Standard Industrial Classification Manual, 1987 edition.

A. Agricultural production, crops:

- (1) 0111, wheat;
- (2) 0112, rice;
- (3) 0115, corn;
- (4) 0116, soybeans;
- (5) 0119, cash grains, not elsewhere classified;
- (6) 0131, cotton;
- (7) 0132, tobacco;
- (8) 0133, sugar cane and sugar beets;
- (9) 0134, Irish potatoes;
- (10) 0139, field crops, except cash grains, not elsewhere classified;
- (11) 0161, vegetables and melons;
- (12) 0171, berry crops;
- (13) 0172, grapes;
- (14) 0173, tree nuts;
- (15) 0174, citrus fruits;
- (16) 0175, deciduous tree fruits;
- (17) 0179, fruits and tree nuts, not elsewhere classified;
- (18) 0181, ornamental nursery products;
- (19) 0182, food crops grown under cover; and
- (20) 0191, general farms, primarily crop.

B. Agricultural production, livestock:

- (1) 0211, beef cattle feedlots;
- (2) 0212, beef cattle, except feedlots;
- (3) 0213, hogs;
- (4) 0214, sheep and goats;
- (5) 0219, general livestock, not elsewhere classified;
- (6) 0241, dairy farms;
- (7) 0251, broiler, fryer, and roaster chickens;
- (8) 0252, chicken eggs;
- (9) 0253, turkeys and turkey eggs;
- (10) 0254, poultry hatcheries;
- (11) 0259, poultry and eggs, not elsewhere classified;
- (12) 0271, fur-bearing animals and rabbits;
- (13) 0273, animal aquaculture;
- (14) 0279, animal specialties, not elsewhere classified; and
- (15) 0291, general farms, primarily animal.

C. Agricultural services:

- (1) 0711, soil preparation services;
- (2) 0721, crop planting and protecting;
- (3) 0722, crop harvesting;
- (4) 0723, crop preparation services for market;
- (5) 0724, cotton ginning;

MINNESOTA RULES 1993

299.

SAFETY AND HEALTH STANDARDS 5205.1500

- (6) 0741, veterinary services for livestock;
- (7) 0742, veterinary services, specialties;
- (8) 0751, livestock service, except veterinary;
- (9) 0752, animal specialty services;
- (10) 0761, farm labor contractors;
- (11) 0762, farm management services;
- (12) 0781, landscape counseling and planning;
- (13) 0782, lawn and garden services; and
- (14) 0783, ornamental shrub and tree services.

D. Forestry:

- (1) 0811, timber tracts;
- (2) 0831, forest products; and
- (3) 0851, forestry services.

E. Metal mining:

- (1) 1011, iron ores;
- (2) 1021, copper ores;
- (3) 1031, lead and zinc ores;
- (4) 1041, gold ores;
- (5) 1044, silver ores;
- (6) 1061, ferroalloy ores, except vanadium;
- (7) 1081, metal mining services;
- (8) 1094, uranium–radium–vanadium ores; and
- (9) 1099, metal ores, not elsewhere classified.

F. Coal mining:

- (1) 1221, bituminous coal and lignite, surface;
- (2) 1222, bituminous coal, underground;
- (3) 1231, anthracite mining; and
- (4) 1241, coal mining services.

G. Oil and gas extraction:

- (1) 1381, drilling oil and gas wells;
- (2) 1382, oil and gas exploration services; and
- (3) 1389, oil and gas field services, not elsewhere classified.

H. Nonmetallic minerals, except fuels:

- (1) 1411, dimension stone;
- (2) 1422, crushed and broken limestone;
- (3) 1423, crushed and broken granite;
- (4) 1429, crushed and broken stone, not elsewhere classified;
- (5) 1442, construction sand and gravel;
- (6) 1446, industrial sand;
- (7) 1455, kaolin and ball clay;
- (8) 1459, clay and related minerals, not elsewhere classified;
- (9) 1474, potash, soda, and borate minerals;
- (10) 1475, phosphate rock;
- (11) 1479, chemical and fertilizer mining, not elsewhere classified;
- (12) 1481, nonmetallic minerals services; and
- (13) 1499, miscellaneous nonmetallic minerals.

I. General building contractors:

- (1) 1521, single–family housing construction;
- (2) 1522, residential construction, not elsewhere classified;

- (3) 1531, operative builders;
 - (4) 1541, industrial buildings and warehouses; and
 - (5) 1542, nonresidential construction, not elsewhere classified.
- J. Heavy construction, except building:
- (1) 1611, highway and street construction;
 - (2) 1622, bridge, tunnel, and elevated highway;
 - (3) 1623, water, sewer, and utility lines; and
 - (4) 1629, heavy construction, not elsewhere classified.
- K. Special trade contractors:
- (1) 1711, plumbing, heating, air-conditioning;
 - (2) 1721, painting and paper hanging;
 - (3) 1731, electrical work;
 - (4) 1741, masonry and other stonework;
 - (5) 1742, plastering, drywall, and insulation;
 - (6) 1743, terrazzo, tile, marble, and mosaic work;
 - (7) 1751, carpentry work;
 - (8) 1752, floor laying and floor work, not elsewhere classified;
 - (9) 1761, roofing, siding, and sheet metal work;
 - (10) 1771, concrete work;
 - (11) 1781, water well drilling;
 - (12) 1791, structural steel erection;
 - (13) 1793, glass and glazing work;
 - (14) 1794, excavation work;
 - (15) 1795, wrecking and demolition work;
 - (16) 1796, installing building equipment, not elsewhere classified; and
 - (17) 1799, special trade contractors, not elsewhere classified.
- L. Food and kindred products:
- (1) 2011, meat packing plants;
 - (2) 2013, sausages and other prepared meats;
 - (3) 2015, poultry slaughtering and processing;
 - (4) 2021, creamery butter;
 - (5) 2022, cheese, natural and processed;
 - (6) 2023, dry, condensed, and evaporated products;
 - (7) 2024, ice cream and frozen desserts;
 - (8) 2026, fluid milk;
 - (9) 2032, canned specialties;
 - (10) 2033, canned fruits and vegetables;
 - (11) 2034, dehydrated fruits, vegetables, and soups;
 - (12) 2035, pickles, sauces, and salad dressings;
 - (13) 2037, frozen fruits and vegetables;
 - (14) 2038, frozen specialties, not elsewhere classified;
 - (15) 2041, flour and other grain mill products;
 - (16) 2043, cereal breakfast foods;
 - (17) 2044, rice milling;
 - (18) 2045, prepared flour mixes and doughs;
 - (19) 2046, wet corn milling;
 - (20) 2047, dog and cat food;
 - (21) 2048, prepared feeds, not elsewhere classified;
 - (22) 2051, bread, cake, and related products;

- (23) 2052, cookies and crackers;
- (24) 2053, frozen bakery products, except bread;
- (25) 2061, raw cane sugar;
- (26) 2062, cane sugar refining;
- (27) 2063, beet sugar;
- (28) 2064, candy and other confectionery products;
- (29) 2066, chocolate and cocoa products;
- (30) 2067, chewing gum;
- (31) 2068, salted and roasted nuts and seeds;
- (32) 2074, cottonseed oil mills;
- (33) 2075, soybean oil mills;
- (34) 2076, vegetable oil mills, not elsewhere classified;
- (35) 2077, animal and marine fats and oils;
- (36) 2079, edible fats and oils, not elsewhere classified;
- (37) 2082, malt beverages;
- (38) 2083, malt;
- (39) 2084, wines, brandy, and brandy spirits;
- (40) 2085, distilled and blended liquors;
- (41) 2086, bottled and canned soft drinks;
- (42) 2087, flavoring extracts and syrups, not elsewhere classified;
- (43) 2091, canned and cured fish and seafoods;
- (44) 2092, fresh or frozen prepared fish;
- (45) 2095, roasted coffee;
- (46) 2096, potato chips and similar snacks;
- (47) 2097, manufactured ice;
- (48) 2098, macaroni and spaghetti; and
- (49) 2099, food preparations, not elsewhere classified.

M. Textile mill products:

- (1) 2241, narrow fabric mills;
- (2) 2254, knit underwear mills;
- (3) 2257, weft knit fabric mills;
- (4) 2258, lace and warp knit fabric mills;
- (5) 2259, knitting mills, not elsewhere classified;
- (6) 2261, finishing plants, cotton;
- (7) 2262, finishing plants, manmade;
- (8) 2269, finishing plants, not elsewhere classified;
- (9) 2273, carpets and rugs;
- (10) 2281, yarn spinning mills;
- (11) 2282, throwing and winding mills;
- (12) 2284, thread mills;
- (13) 2295, coated fabrics, not rubberized;
- (14) 2296, tire cord and fabrics;
- (15) 2297, nonwoven fabrics;
- (16) 2298, cordage and twine; and
- (17) 2299, textile goods, not elsewhere classified.

N. Apparel and other textile products:

- (1) 2311, men's and boys' suits and coats;
- (2) 2321, men's and boys' shirts;
- (3) 2322, men's and boys' underwear and nightwear;

- (4) 2323, men's and boys' neckwear;
- (5) 2325, men's and boys' trousers and slacks;
- (6) 2326, men's and boys' work clothing;
- (7) 2329, men's and boys' clothing, not elsewhere classified;
- (8) 2353, hats, caps, and millinery;
- (9) 2369, girls' and children's outerwear, not elsewhere classified;
- (10) 2385, waterproof outerwear;
- (11) 2389, apparel and accessories, not elsewhere classified;
- (12) 2391, curtains and draperies;
- (13) 2392, house furnishings, not elsewhere classified;
- (14) 2393, textile bags;
- (15) 2394, canvas and related products;
- (16) 2395, pleating and stitching;
- (17) 2396, automotive and apparel trimmings;
- (18) 2397, Schiffl machine embroideries; and
- (19) 2399, fabricated textile products, not elsewhere classified.

O. Lumber and wood products:

- (1) 2411, logging;
- (2) 2421, sawmills and planing mills, general;
- (3) 2426, hardwood dimension and flooring mills;
- (4) 2429, special product sawmills, not elsewhere classified;
- (5) 2431, millwork;
- (6) 2434, wood kitchen cabinets;
- (7) 2435, hardwood veneer and plywood;
- (8) 2436, softwood veneer and plywood;
- (9) 2439, structural wood members, not elsewhere classified;
- (10) 2441, nailed wood boxes and shooks;
- (11) 2448, wood pallets and skids;
- (12) 2449, wood containers, not elsewhere classified;
- (13) 2451, mobile homes;
- (14) 2452, prefabricated wood buildings;
- (15) 2491, wood preserving;
- (16) 2493, reconstituted wood products; and
- (17) 2499, wood products, not elsewhere classified.

P. Furniture and fixtures:

- (1) 2511, wood household furniture;
- (2) 2512, upholstered household furniture;
- (3) 2514, metal household furniture;
- (4) 2515, mattresses and bedsprings;
- (5) 2517, wood television and radio cabinets;
- (6) 2519, household furniture, not elsewhere classified;
- (7) 2521, wood office furniture;
- (8) 2522, office furniture, except wood;
- (9) 2531, public building and related furniture;
- (10) 2541, wood partitions and fixtures;
- (11) 2542, partitions and fixtures, except wood;
- (12) 2591, drapery hardware and blinds and shades; and
- (13) 2599, furniture and fixtures, not elsewhere classified.

Q. Paper and allied products:

- (1) 2611, pulp mills;
- (2) 2621, paper mills;
- (3) 2631, paperboard mills;

- (4) 2652, setup paperboard boxes;
- (5) 2653, corrugated and solid fiber boxes;
- (6) 2655, fiber cans, drums, and similar products;
- (7) 2656, sanitary food containers;
- (8) 2657, folding paperboard boxes;
- (9) 2671, paper coated and laminated, packaging;
- (10) 2672, paper coated and laminated, not elsewhere classified;
- (11) 2673, bags: plastics, laminated, and coated;
- (12) 2674, bags: uncoated paper and multiwall;
- (13) 2675, die-cut paper and board;
- (14) 2676, sanitary paper products;
- (15) 2677, envelopes;
- (16) 2678, stationery products; and
- (17) 2679, converted paper products, not elsewhere classified.

R. Printing and publishing:

- (1) 2754, commercial printing, gravure; and
- (2) 2759, commercial printing, not elsewhere classified.

S. Chemicals and allied products:

- (1) 2812, alkalis and chlorine;
- (2) 2813, industrial gases;
- (3) 2816, inorganic pigments;
- (4) 2819, industrial inorganic chemicals, not elsewhere classified;
- (5) 2821, plastic materials and resins;
- (6) 2822, synthetic rubber;
- (7) 2823, cellulosic manmade fibers;
- (8) 2824, organic fibers; noncellulosic;
- (9) 2833, medicinals and botanicals;
- (10) 2834, pharmaceutical preparations;
- (11) 2835, diagnostic substances;
- (12) 2836, biological products except diagnostic;
- (13) 2841, soap and other detergents;
- (14) 2842, polishes and sanitation goods;
- (15) 2843, surface active agents;
- (16) 2844, toilet preparations;
- (17) 2851, paints and allied products;
- (18) 2861, gum and wood chemicals;
- (19) 2865, cyclic crudes and intermediates;
- (20) 2869, industrial organic chemicals, not elsewhere classified;
- (21) 2873, nitrogenous fertilizers;
- (22) 2874, phosphatic fertilizers;
- (23) 2875, fertilizers, mixing only;
- (24) 2879, agricultural chemicals, not elsewhere classified;
- (25) 2891, adhesives and sealants;
- (26) 2892, explosives;
- (27) 2893, printing ink;
- (28) 2895, carbon black; and
- (29) 2899, chemical preparations, not elsewhere classified.

T. Petroleum and coal products:

- (1) 2951, asphalt paving mixtures and blocks;

- (2) 2952, asphalt felts and coatings;
- (3) 2992, lubricating oils and greases; and
- (4) 2999, petroleum and coal products, not elsewhere classified.

U. Rubber and miscellaneous plastics products:

- (1) 3011, tires and inner tubes;
- (2) 3021, rubber and plastics footwear;
- (3) 3052, rubber and plastics hose and belting;
- (4) 3053, gaskets, packing, and sealing devices;
- (5) 3061, mechanical rubber goods;
- (6) 3069, fabricated rubber products, not elsewhere classified;
- (7) 3081, unsupported plastics film and sheet;
- (8) 3082, unsupported plastics profile shapes;
- (9) 3083, laminated plastics plate and sheet;
- (10) 3084, plastics pipe;
- (11) 3085, plastics bottles;
- (12) 3086, plastics foam products;
- (13) 3087, custom compound purchased resins;
- (14) 3088, plastics plumbing fixtures; and
- (15) 3089, plastics products, not elsewhere classified.

V. Leather and leather products:

- (1) 3111, leather tanning and finishing;
- (2) 3131, footwear cut stock;
- (3) 3142, house slippers;
- (4) 3143, men's footwear, except athletic;
- (5) 3144, women's footwear, except athletic;
- (6) 3149, footwear, except rubber, not elsewhere classified;
- (7) 3151, leather gloves and mittens;
- (8) 3161, luggage;
- (9) 3171, women's handbags and purses;
- (10) 3172, personal leather goods, not elsewhere classified; and
- (11) 3199, leather goods, not elsewhere classified.

W. Stone, clay, and glass products:

- (1) 3211, flat glass;
- (2) 3221, glass containers;
- (3) 3229, pressed and blown glass, not elsewhere classified;
- (4) 3231, products of purchased glass;
- (5) 3241, cement, hydraulic;
- (6) 3251, brick and structural clay tile;
- (7) 3253, ceramic wall and floor tile;
- (8) 3255, clay refractories;
- (9) 3259, structural clay products, not elsewhere classified;
- (10) 3261, vitreous plumbing fixtures;
- (11) 3262, vitreous china table and kitchenware;
- (12) 3263, semivitreous table and kitchenware;
- (13) 3264, porcelain electrical supplies;
- (14) 3269, pottery products, not elsewhere classified;
- (15) 3271, concrete block and brick;
- (16) 3272, concrete products, not elsewhere classified;
- (17) 3273, ready-mixed concrete;

- (18) 3274, lime;
- (19) 3275, gypsum products;
- (20) 3281, cut stone and stone products;
- (21) 3291, abrasive products;
- (22) 3292, asbestos products;
- (23) 3295, minerals, ground or treated;
- (24) 3296, mineral wool;
- (25) 3297, nonclay refractories; and
- (26) 3299, nonmetallic mineral products, not elsewhere classified.

X. Primary metal industries:

- (1) 3312, blast furnaces and steel mills;
- (2) 3313, electrometallurgical products;
- (3) 3315, steel wire and related products;
- (4) 3316, cold finishing of steel shapes;
- (5) 3317, steel pipe and tubes;
- (6) 3321, gray and ductile iron foundries;
- (7) 3322, malleable iron foundries;
- (8) 3324, steel investment foundries;
- (9) 3325, steel foundries, not elsewhere classified;
- (10) 3331, primary copper;
- (11) 3334, primary aluminum;
- (12) 3399, primary nonferrous metals, not elsewhere classified;
- (13) 3341, secondary nonferrous metals;
- (14) 3351, copper rolling and drawing;
- (15) 3353, aluminum sheet, plate, and foil;
- (16) 3354, aluminum extruded products;
- (17) 3355, aluminum rolling and drawing, not elsewhere classified;
- (18) 3356, nonferrous rolling and drawing, not elsewhere classified;
- (19) 3357, nonferrous wiredrawing and insulating;
- (20) 3363, aluminum die castings;
- (21) 3364, nonferrous die casting except aluminum;
- (22) 3365, aluminum foundries;
- (23) 3366, copper foundries;
- (24) 3369, nonferrous foundries, not elsewhere classified;
- (25) 3398, metal heat treating; and
- (26) 3399, primary metal products, not elsewhere classified.

Y. Fabricated metal products:

- (1) 3411, metal cans;
- (2) 3412, metal barrels, drums, and pails;
- (3) 3421, cutlery;
- (4) 3423, hand and edge tools, not elsewhere classified;
- (5) 3425, saw blades and handsaws;
- (6) 3429, hardware, not elsewhere classified;
- (7) 3431, metal sanitary ware;
- (8) 3432, plumbing fixture fittings and trim;
- (9) 3433, heating equipment, except electric;
- (10) 3441, fabricated structural metal;
- (11) 3442, metal doors, sash, and trim;
- (12) 3443, fabricated plate work (boiler shops);

- (13) 3444, sheet metal work;
- (14) 3446, architectural metal work;
- (15) 3448, prefabricated metal buildings;
- (16) 3449, miscellaneous metal work;
- (17) 3451, screw machine products;
- (18) 3452, bolts, nuts, rivets, and washers;
- (19) 3462, iron and steel forgings;
- (20) 3463, nonferrous forgings;
- (21) 3465, automotive stampings;
- (22) 3466, crowns and closures;
- (23) 3469, metal stampings, not elsewhere classified;
- (24) 3471, plating and polishing;
- (25) 3479, metal coating and allied services;
- (26) 3482, small arms ammunition;
- (27) 3483, ammunition, except small arms, not elsewhere classified;
- (28) 3484, small arms;
- (29) 3489, ordnance and accessories, not elsewhere classified;
- (30) 3491, industrial valves;
- (31) 3492, fluid power valves and hose fittings;
- (32) 3493, steel springs, except wire;
- (33) 3494, valves and pipe fittings, not elsewhere classified;
- (34) 3495, wire springs;
- (35) 3496, miscellaneous fabricated wire products;
- (36) 3497, metal foil and leaf;
- (37) 3498, fabricated pipe and fittings; and
- (38) 3499, fabricated metal products, not elsewhere classified.

Z. Industrial machinery and equipment:

- (1) 3523, farm machinery and equipment;
- (2) 3524, lawn and garden equipment;
- (3) 3531, construction machinery;
- (4) 3532, mining machinery;
- (5) 3533, oil and gas field machinery;
- (6) 3534, elevators and moving stairways;
- (7) 3535, conveyors and conveying equipment;
- (8) 3536, hoists, cranes, and monorails;
- (9) 3537, industrial trucks and tractors;
- (10) 3542, machine tools, metal forming types;
- (11) 3543, industrial patterns;
- (12) 3544, special dies, tools, jigs, and fixtures;
- (13) 3545, machine tool accessories;
- (14) 3547, rolling mill machinery;
- (15) 3548, welding apparatus;
- (16) 3549, metalworking machinery, not elsewhere classified;
- (17) 3552, textile machinery;
- (18) 3553, woodworking machinery;
- (19) 3554, paper industries machinery;
- (20) 3555, printing trades machinery;
- (21) 3556, food products machinery;
- (22) 3559, special industry machinery, not elsewhere classified;

MINNESOTA RULES 1993

307

SAFETY AND HEALTH STANDARDS 5205.1500

- (23) 3561, pumps and pumping equipment;
 - (24) 3562, ball and roller bearings;
 - (25) 3563, air and gas compressors;
 - (26) 3564, blowers and fans;
 - (27) 3565, packaging machinery;
 - (28) 3566, speed changers, drives, and gears;
 - (29) 3567, industrial furnaces and ovens;
 - (30) 3568, power transmission equipment, not elsewhere classified;
 - (31) 3569, general industrial machinery, not elsewhere classified;
 - (32) 3581, automatic vending machines;
 - (33) 3582, commercial laundry equipment;
 - (34) 3585, refrigeration and heating equipment;
 - (35) 3586, measuring and dispensing pumps;
 - (36) 3589, service industry machinery, not elsewhere classified;
 - (37) 3592, carburetors, pistons, rings, and valves;
 - (38) 3593, fluid power cylinders and actuators;
 - (39) 3594, fluid power pumps and motors
 - (40) 3596, scales and balances, except laboratory; and
 - (41) 3599, industrial machinery, not elsewhere classified.
- AA. Electronic and other electric equipment:
- (1) 3612, transformers, except electronic;
 - (2) 3613, switchgear and switchboard apparatus;
 - (3) 3621, motors and generators;
 - (4) 3624, carbon and graphite products;
 - (5) 3625, relays and industrial controls;
 - (6) 3629, electrical industrial apparatus, not elsewhere classified;
 - (7) 3631, household cooking equipment;
 - (8) 3632, household refrigerators and freezers;
 - (9) 3633, household laundry equipment;
 - (10) 3634, electric housewares and fans;
 - (11) 3635, household vacuum cleaners;
 - (12) 3639, household appliances, not elsewhere classified;
 - (13) 3641, electric lamps;
 - (14) 3643, current-carrying wiring devices;
 - (15) 3644, non-current-carrying wiring devices;
 - (16) 3645, residential lighting fixtures;
 - (17) 3646, commercial lighting fixtures;
 - (18) 3647, vehicular lighting equipment;
 - (19) 3648, lighting equipment, not elsewhere classified;
 - (20) 3651, household audio and video equipment;
 - (21) 3652, prerecorded records and tapes;
 - (22) 3661, telephone and telegraph apparatus;
 - (23) 3663, radio and television communications equipment;
 - (24) 3669, communications equipment, not elsewhere classified;
 - (25) 3671, electron tubes;
 - (26) 3672, printed circuit boards;
 - (27) 3674, semiconductors and related devices;
 - (28) 3675, electronic capacitors;
 - (29) 3676, electronic resistors;

- (30) 3677, electronic coils and transformers;
- (31) 3678, electronic connectors;
- (32) 3679, electronic components, not elsewhere classified;
- (33) 3691, storage batteries;
- (34) 3692, primary batteries, dry and wet;
- (35) 3694, engine electrical equipment;
- (36) 3695, magnetic and optical recording media; and
- (37) 3699, electrical equipment and supplies, not elsewhere classified.

BB. Transportation equipment:

- (1) 3711, motor vehicles and car bodies;
- (2) 3713, truck and bus bodies;
- (3) 3714, motor vehicle parts and accessories;
- (4) 3715, truck trailers;
- (5) 3716, motor homes;
- (6) 3721, aircraft;
- (7) 3724, aircraft engines and engine parts;
- (8) 3728, aircraft parts and equipment, not elsewhere classified;
- (9) 3731, ship building and repairing;
- (10) 3732, boat building and repairing;
- (11) 3743, railroad equipment;
- (12) 3751, motorcycles, bicycles, and parts;
- (13) 3761, guided missiles and space vehicles;
- (14) 3764, space propulsion units and parts;
- (15) 3769, space vehicle equipment, not elsewhere classified;
- (16) 3792, travel trailers and campers;
- (17) 3795, tanks and tank components; and
- (18) 3799, transportation equipment, not elsewhere classified.

CC. Miscellaneous manufacturing industries:

- (1) 3911, jewelry, precious metal;
- (2) 3914, silverware and plated ware;
- (3) 3915, jewelers' materials and lapidary work;
- (4) 3931, musical instruments;
- (5) 3942, dolls and stuffed toys;
- (6) 3944, games, toys, and children's vehicles;
- (7) 3949, sporting and athletic goods, not elsewhere classified;
- (8) 3951, pens and mechanical pencils;
- (9) 3952, lead pencils and art goods;
- (10) 3953, marking devices;
- (11) 3955, carbon paper and inked ribbons;
- (12) 3961, costume jewelry;
- (13) 3965, fasteners, buttons, needles, and pins;
- (14) 3991, brooms and brushes;
- (15) 3993, signs and advertising specialties;
- (16) 3995, burial caskets;
- (17) 3996, hard surface floor coverings, not elsewhere classified; and
- (18) 3999, manufacturing industries, not elsewhere classified.

DD. Trucking and warehousing:

- (1) 4212, local trucking without storage;
- (2) 4213, trucking, except local;

MINNESOTA RULES 1993

309

SAFETY AND HEALTH STANDARDS 5205.1500

- (3) 4214, local trucking with storage;
- (4) 4215, courier services, except by air;
- (5) 4221, farm product warehousing and storage;
- (6) 4222, refrigerated warehousing and storage;
- (7) 4225, general warehousing and storage;
- (8) 4226, special warehousing and storage, not elsewhere classified; and
- (9) 4231, trucking terminal facilities.

EE. Water transportation:

- (1) 4432, freight transportation on the Great Lakes;
- (2) 4449, water transportation of freight, not elsewhere classified;
- (3) 4482, ferries;
- (4) 4489, water passenger transportation, not elsewhere classified;
- (5) 4491, marine cargo handling;
- (6) 4492, towing and tugboat service;
- (7) 4493, marinas; and
- (8) 4499, water transportation services, not elsewhere classified.

FF. Transportation by air:

- (1) 4512, air transportation, scheduled;
- (2) 4513, air courier services; and
- (3) 4581, airports, flying fields, and services.

GG. Electric, gas, and sanitary services:

- (1) 4911, electric services;
- (2) 4922, natural gas transmission;
- (3) 4923, gas transmission and distribution;
- (4) 4924, natural gas distribution;
- (5) 4925, gas production and/or distribution;
- (6) 4931, electric and other services combined;
- (7) 4932, gas and other services combined;
- (8) 4939, combination utilities, not elsewhere classified;
- (9) 4941, water supply;
- (10) 4952, sewerage systems;
- (11) 4953, refuse systems;
- (12) 4959, sanitary services, not elsewhere classified;
- (13) 4961, steam and air-conditioning supply; and
- (14) 4971, irrigation systems.

HH. Wholesale trade, durable goods:

- (1) 5012, automobiles and other motor vehicles;
- (2) 5013, motor vehicle supplies and new parts;
- (3) 5014, tires and tubes;
- (4) 5015, motor vehicle parts, used;
- (5) 5031, lumber, plywood, and millwork;
- (6) 5032, brick, stone, and related materials;
- (7) 5033, roofing, siding, and insulation; and
- (8) 5039, construction materials, not elsewhere classified.

II. Wholesale trade, nondurable goods:

- (1) 5111, printing and writing paper;
- (2) 5112, stationery and office supplies;
- (3) 5113, industrial and personal service paper;
- (4) 5122, drugs, proprietaries, and sundries;

- (5) 5131, piece goods and notions;
- (6) 5136, men's and boys' clothing;
- (7) 5137, women's and children's clothing;
- (8) 5139, footwear;
- (9) 5141, groceries, general line;
- (10) 5142, packaged frozen foods;
- (11) 5143, dairy products, except dried or canned;
- (12) 5144, poultry and poultry products;
- (13) 5145, confectionery;
- (14) 5146, fish and seafoods;
- (15) 5147, meats and meat products;
- (16) 5148, fresh fruits and vegetables;
- (17) 5149, groceries and related products, not elsewhere classified;
- (18) 5162, plastics materials and basic shapes;
- (19) 5169, chemicals and allied products, not elsewhere classified;
- (20) 5171, petroleum bulk stations and terminals;
- (21) 5172, petroleum products, not elsewhere classified;
- (22) 5181, beer and ale;
- (23) 5182, wine and distilled beverages;
- (24) 5191, farm supplies;
- (25) 5192, books, periodicals, and newspapers;
- (26) 5193, flowers and florists' supplies;
- (27) 5194, tobacco and tobacco products;
- (28) 5198, paints, varnishes, and supplies; and
- (29) 5199, nondurable goods, not elsewhere classified.

JJ. Building materials and garden supplies: 5211, lumber and other building materials.

KK. General merchandise stores:

- (1) 5311, department stores;
- (2) 5331, variety stores; and
- (3) 5399, miscellaneous general merchandise stores.

LL. Food stores:

- (1) 5411, grocery stores;
- (2) 5421, meat and fish markets;
- (3) 5431, fruit and vegetable markets;
- (4) 5441, candy, nut, and confectionery stores;
- (5) 5451, dairy products stores;
- (6) 5461, retail bakeries; and
- (7) 5499, miscellaneous food stores.

MM. Hotels and other lodging places:

- (1) 7011, hotels and motels;
- (2) 7021, rooming and boarding houses;
- (3) 7032, sporting and recreational camps;
- (4) 7033, trailer parks and campsites; and
- (5) 7041, membership-basis organization hotels.

NN. Miscellaneous repair services:

- (1) 7622, radio and television repair;
- (2) 7623, refrigeration service and repair;
- (3) 7629, electrical repair shops, not elsewhere classified;

- (4) 7631, watch, clock, and jewelry repair;
- (5) 7641, reupholstery and furniture repair;
- (6) 7692, welding repair;
- (7) 7694, armature rewinding shops; and
- (8) 7699, repair services, not elsewhere classified.

OO. Health services:

- (1) 8051, skilled nursing care facilities;
- (2) 8052, intermediate care facilities;
- (3) 8059, nursing and personal care, not elsewhere classified;
- (4) 8062, general medical and surgical hospitals;
- (5) 8063, psychiatric hospitals; and
- (6) 8069, specialty hospitals, except psychiatric.

PP. Executive, legislative, and general:

- (1) 9111, executive offices;
- (2) 9121, legislative bodies;
- (3) 9131, executive and legislative combined; and
- (4) 9199, general government, not elsewhere classified.

QQ. Justice, public order, and safety:

- (1) 9211, courts;
- (2) 9221, police protection;
- (3) 9222, legal counsel and prosecution;
- (4) 9223, correctional institutions;
- (5) 9224, fire protection; and
- (6) 9229, public order and safety, not elsewhere classified.

Statutory Authority: *MS s 182.655*
