6315.0300 AUTHORIZATION TO PRACTICE NURSING.

Subpart 1. **Required authorization.** A Minnesota license or permit is required if an individual practices professional nursing as defined in Minnesota Statutes, section 148.171, clause (3), or practical nursing as defined in Minnesota Statutes, section 148.29, subdivision 4, whether for monetary compensation or as a volunteer, except as provided in Minnesota Statutes, sections 148.271 and 148.295. If the permit is revoked or expires, whichever occurs first, an applicant must not practice nursing until a license has been issued.

Minnesota licensure is not required for a nurse licensed in another jurisdiction who is in Minnesota as a student enrolled in a course of study which involves nursing practice, such as a course leading to a higher degree or certification in a nursing specialty or to enhanced skills in a clinical field.

Subp. 2. **License.** The board shall license an applicant to practice when the applicant has met all requirements of applicable statutes and rules. The license must bear the seal of the board, date of issue, license number, and type of licensure.

Subp. 3. **Duplicate original license.** Duplicate original licenses are not issued for any reason.

Subp. 4. **Eligibility for permit to practice nursing with direct supervision.** The board shall grant an applicant a permit to practice nursing under the direct supervision of a registered nurse if the applicant:

- A. has not been licensed by examination in another jurisdiction;
- B. applies for a permit to practice on a form obtained from the board;
- C. has submitted the licensure application, licensure fee, examination application, examination fee, and affidavit of graduation;
- D. has not had an application nullified;
- E. has not had a permit revoked;
- F. has not had a permit expire;
- G. has graduated from an approved program as specified in part 6315.0400, subpart 4 or 5; and

H. has written or is eligible to write the first examination administered after graduation. An applicant who has written the examination before graduating becomes eligible for a permit after graduation. An applicant who has written the examination in another jurisdiction must submit, on a form supplied by the board, proof from the other jurisdiction that the applicant wrote the first examination administered after graduation.

Subp. 5. Required supervision. An applicant who holds a permit to practice nursing with direct supervision must practice under the direct supervision of a registered nurse licensed and currently registered in Minnesota. There must be a registered nurse assigned to observe, direct, and evaluate the performance of the permit holder. A permit holder shall be able to identify at all times the registered nurse who is providing direct supervision. The registered nurse shall not be engaged in other activities that would prevent the registered nurse from providing direct supervision to the permit holder. The registered nurse providing the supervision shall be physically present on the unit or within the facility where the permit holder is practicing nursing. If the assigned responsibilities for a given shift require nursing abilities that have not been acquired by the permit holder and if the care to be provided involves a patient with severe or urgent conditions or a patient with an unstable condition, the registered nurse providing the supervision must be on the unit with the permit holder. If the assigned responsibilities for a given shift require nursing abilities that have been acquired by the permit holder and the care to be provided is simple and routine, the registered nurse providing the supervision must be in the facility with the permit holder. The permit holder shall not function in a position that requires supervision of other nursing personnel.

Subp. 6. Permit to practice nursing without direct supervision. The board shall grant an applicant a permit to practice nursing that does not require direct supervision if the applicant:

A. submits the licensure application and licensure fee;

B. is licensed in another jurisdiction or Canadian province by an examination acceptable to the board;

C. applies for a permit to practice on a form obtained from the board;
and

D. submits evidence of licensure and current eligibility to practice in another jurisdiction or Canadian province. Evidence of licensure and eligibility to practice may include, but is not limited to, a notarized copy of the document from another jurisdiction or Canadian province that authorizes current practice, an official statement from another jurisdiction or Canadian province that the applicant is currently authorized to practice, or an official statement from another jurisdiction or Canadian province that the licensure examination was passed and that the applicant is authorized to practice pending licensure.

Subp. 7. Length of permit. The permit authorizing practice under the direct supervision of a registered nurse expires eight weeks after the administration of the examination or upon the applicant's notification by the board of failure on the examination, whichever occurs first. The board shall not extend this permit even if an applicant passes the examination.

The permit authorizing practice without direct supervision expires six months after the date of issue, but the board shall extend this permit if licensure cannot occur because of a processing delay by another nurse licensing agency.

Subp. 8. Revocation of permit. The board shall revoke a permit in the following situations.

A. The board shall revoke a permit if the permit holder:

(1) does not write the scheduled examination;

(2) has been notified of the results of the examination;

(3) is licensed by the board;

(4) did not write in another jurisdiction an examination acceptable to the board;

(5) did not pass an examination in another jurisdiction with a score acceptable to the board; or

(2) an applicant for licensure without examination presented fraudulent evidence of licensure in another jurisdiction or Canadian province; or
