Subpart 1. **Interruption of the audio/visual satellite signal from host racetrack.** In the event of an interruption of both the audio and video satellite signal from the host racetrack, the guest track's mutuel manager must

A. notify the tote wagering hub or host track of the loss of the signal, and

B. notify the presiding official or designated commission representative of the interruption.

The licensee may continue to accept wagering on the balance of the program and subsequent programs until the satellite downlink has been reestablished, if the wagering hub has an audio/visual feed from the host track and the on-track public is notified by public announcement. If the audio and video interruption will not be corrected before the end of the host track's racing program, betting must be stopped for the races that will not be televised but all advanced wagers must be honored. If the initial audio or visual signal is not established, the guest track must make an announcement to the public and stop betting until the signals are established. All advanced wagers made without an audio or video signal must be honored.
