

1350.5800 RECIPROCITY.

Upon a showing that another state provides for the sealing of manufactured homes upon compliance with standards which are at least equal to those provided in the code, the commissioner may provide that a construction seal affixed under the authority of the state shall have the same effect as a seal affixed under authority of this state, and thereafter any manufactured home which bears the seal of such state shall not be required to bear the seal of this state as provided in part 1350.0400. The commissioner may make such reciprocity contingent upon such other granting reciprocal effect to seals affixed under authority of this state. Pursuant to this part, the commissioner has established reciprocity with the following states which have granted reciprocity to Minnesota: Indiana, Illinois, and Wisconsin. This reciprocity applies to manufactured homes manufactured after July 1, 1972, and prior to June 14, 1976.
