

**1545.1090 BLOOD DISPOSAL.**

Adequate facilities shall be provided for the disposal of blood in a sanitary manner. When bleeding troughs are used they shall be long enough to catch the blood during the bleeding process and shall be cleaned daily. Such troughs shall be installed so as to pitch at least one-half inch per foot toward a smooth metal catch basin or basins, of sufficient capacity for a day's operation at peak production or shall be flushed continuously.
