

1565.1500 LABORATORY REQUIREMENTS.

After December 31, 2022, only laboratories registered with the Drug Enforcement Agency may conduct testing under this part. At a minimum, a laboratory conducting analytical testing of samples for delta-9 tetrahydrocannabinol concentration levels for purposes of the testing required by this chapter must:

- A. use the postdecarboxylation value method or other similarly reliable methods approved by the commissioner and the United States Department of Agriculture;
- B. determine and report the total delta-9 tetrahydrocannabinol concentration level on a dry weight basis;
- C. estimate and report the measurement of uncertainty with test results; and
- D. use appropriate, validated methods and procedures for all testing activities required under this chapter and evaluate the measurement of uncertainty.

Statutory Authority: *MS s 18K.06; L 2019 1Sp1 art 2 s 20*

History: *46 SR 150*

This temporary exempt rule is effective for two years and expires August 16, 2023.

Published Electronically: *August 19, 2021*
