

2675.4170 COMPUTING DATE AND TIME.

For the purpose of computing elapsed periods of time, a month shall be considered a calendar month and, where a fraction of a month is involved, a day shall be considered 1/30 of a month. The method employed must count only 30 days for any full calendar month elapsed but count the actual days in any fractional month period. A full calendar month is the period from a given date in one month to the same numbered date in the following month and in case there is no same numbered date in the following month, to the last day in the following month. In any period extending beyond one or more full months, the one or more full months fall at the start of the period and the fractional month at the end.
