

4720.5220 IMPACT OF CHANGES ON PUBLIC WATER SUPPLY WELL.

Subpart 1. **Changes identified.** A wellhead protection plan must identify and describe expected changes that may occur during the next ten years to:

- A. the physical environment;
- B. land use;
- C. surface water; and
- D. groundwater.

Subp. 2. **Impact of changes.** A wellhead protection plan must list, describe, and assess the possible impact on the aquifer serving the public water supply well resulting from:

- A. the expected changes identified in subpart 1;
 - B. the influence of existing water and land government programs and regulations;
- and
- C. the administrative, technical, and financial considerations of the public water supplier and the property owners within the drinking water supply management area.
