

4732.1058 INDUSTRIAL RADIOGRAPHY IN A TEMPORARY JOB SITE.

Subpart 1. **Applicability.** This part applies to industrial radiation-producing equipment used for less than 30 days at a job site.

Subp. 2. **Restricted areas.** A fence, rope, or other suitable personnel barrier must be used outside the two mR (5.16×10^7 C/kg) in any one hour dose line to restrict entry.

Subp. 3. **Qualified personnel present.** When radiography is performed at a location other than a permanent radiographic installation, the radiographer must be accompanied by at least one other qualified radiographer or a radiographer's assistant. The additional qualified individual must be capable of providing immediate assistance to prevent unauthorized entry.

Subp. 4. **Records for temporary job site.** For records at temporary job sites, each registrant conducting industrial radiography must have available at the temporary job site:

- A. a copy of operating and emergency procedures;
- B. industrial radiation survey records as required by part 4731.1080;
- C. direct reading pocket dosimeter records for the period of operation in use at the site; and
- D. the latest instrument calibration records for instruments in use at the site.
