

**7151.5500 SUBSTANCE TRANSFER AREAS.**

Subpart 1. **General.** Except as otherwise provided in subpart 2, owners or operators shall provide substance transfer safeguards. The safeguards, such as spill boxes, remote fill boxes, or containment areas must effectively contain a release at the connection point, as well as at the vehicle, during transfer of the substance to and from the tank.

Subp. 2. **Exclusions.** A substance transfer area safeguard is not required for:

- A. a tank that is filled with a hand-held nozzle;
- B. a transfer of the substance through a continuous pipeline between tanks at one site; or
- C. a barge transfer facility regulated under United States Coast Guard regulations, Code of Federal Regulations, title 33, parts 126, 154, and 156.
