7873.0180 PERFECTA OR EXACTA.

Subpart 1. **Scope.** A perfecta or exacta wager combines two horses of separate betting interests in a single race, selecting the horse which will finish first and the horse which will finish second in that race in the official order of finish. All perfecta or exacta wagers must be calculated in a separate pool.

Subp. 2. **No winning combination sold.** If no ticket is sold on the winning perfecta or exacta combination, the net pool shall be distributed equally among holders of tickets selecting the winning horse to finish first and holders of tickets selecting the second place horse to finish second.

Subp. 3. **Dead heats.** The following calculations shall be used in the event of dead heats.

A. In case of a dead heat between two horses for first place, the net pool shall be calculated and distributed as a place pool to holders of tickets of the winning combination. Example: if numbers 2 and 5 dead heat for win, the winning combination would be 2-5 and 5-2.

B. In case of a dead heat between two horses for second place, the pool shall be figured as a place pool, the holders of tickets combining the winning horse and the two horses finishing second participating in the payoff. Example: if number 2 wins with numbers 5 and 6 a dead heat for second, the winning combinations would be 2-5 and 2-6.

C. If there is a dead heat for second place, if no ticket is sold on one of the two winning combinations, the entire net pool shall be calculated as a win pool and distributed to those holding tickets on the other winning combination. Example: if number 2 won and numbers 5 and 6 were a dead heat for second, 2-5 and 2-6 would be the winning combination. However, if no ticket was sold with a 2-5 combination, the net pool would be distributed to holders of the 2-6 combination.

D. If no tickets combine the winning horse with either of the place horses in the dead heat, the pool shall be calculated and distributed as a place pool to holders of tickets representing any interest in the net pool. Example: if number 2 won and numbers 5 and 6 were a dead heat for second, 2-5 and 2-6 would be the winning combinations. However, if no ticket was sold with the 2-5 or 2-6 combination, the net pool would be distributed to holders of any ticket with 2 in the win position as part of the combination with any other number (2-1, 2-3, 2-4, 2-7, 2-8 of an eight horse field) and to holders of any ticket with 5 or 6 in the place position with any other number (1-5, 3-5, 4-5, 6-5, 7-5, 8-5, 1-6, 3-6, 4-6, 5-6, 7-6, 8-6 of an eight horse field).

Subp. 4. **Refund of pool.** A refund of the perfecta or exacta pool shall occur when:

A. No ticket is sold that would require distribution of a perfecta or exacta pool to winners as defined in this part.

B.   Only one horse finishes in a perfecta or exacta race.
