

8230.3560 USE OF PRECINCT COUNT VOTING SYSTEMS AT CENTRAL COUNTING CENTERS.

Central count voting systems must be used in central counting centers. One precinct count voting system and one memory unit may be used at a central counting center to count ballots for up to ten precincts with a combined total of fewer than 2,500 registered voters as of June 1 of that election year. A separate summary statement must be produced for each precinct being counted by the precinct count voting system.
