Subd. 2. **Test seeds.** The commissioner and his assistants, and county agricultural inspectors, as directed by him, shall sample, inspect, make analysis of and test agricultural and tree and shrub seeds sold within this state for sowing purposes at such time and place and to such extent as he deems necessary to determine whether such seeds and screenings comply with the provisions of such sections. He shall promptly notify the person, firm, or corporation who transported, sold or offered or exposed such seed or screenings for sale of any violation of the provisions of such sections, or any rule or regulations promulgated thereunder.

Subd. 3. **Rules.** The commissioner shall adopt rules and regulations governing the methods to be used in sampling, inspecting, analyzing, testing, and examining agricultural and tree and shrub seed and screenings, and the weed seed tolerances to be followed in the administration of such sections, which shall be in general accord with officially prescribed practice in interstate commerce, and such other rules and regulations as are necessary to secure the efficient enforcement of such sections.

Subd. 4. **Entry upon premises.** For the purpose of carrying out the provisions of such sections, the commissioner and his assistants, and the county agricultural inspectors under his direction, may enter upon any public or private premises during regular business hours in order to have access to those seeds and screenings which are subject to such sections and the rules and regulations promulgated thereunder.

Subd. 5. **Stop-sale orders.** The commissioner may issue and enforce a written or printed "stop-sale" order to the owner or custodian of any lot of agricultural and tree and shrub seed, which the commissioner finds to be in violation of any of the provisions of such sections, which shall prohibit further sale of such seed until the commissioner has evidence that the law has been complied

with. Such seed shall be removed from the place in which it is found only upon a release issued by the commissioner, which release shall be issued by him upon a showing that the seed is being removed for the purpose of making it comply with the provisions of such sections, or otherwise destroyed for seeding purposes.

In respect to seeds which have been denied sale, as provided in this subdivision, the owner or custodian of such seeds shall have the right to appeal from such order to a court of competent jurisdiction where the seeds are found, praying for judgment as to the justification of said order and for the discharge of such seed from the order prohibiting the sale in accordance with the findings of the court. The provisions of this clause shall not be construed as limiting the right of the commissioner to proceed as otherwise authorized in sections 21.47 to 21.58.

Subd. 6. Seed laboratory. The commissioner shall establish and maintain a seed laboratory for seed testing, employing such agents and assistants as are necessary to execute the requirements of the agricultural and tree and shrub seed sections of this chapter, none of whom, except those who are employed on a regular full time basis, shall come within or be governed by the provisions of section 43A.01 et seq. The compensation for the unclassified employees shall be paid on the basis of a rating and salary scale as determined by the director of personnel.

Subd. 7. Purity and germination tests. The commissioner shall provide for purity and germination tests of seeds and identification of seeds and plants for farmers, dealers and others. He may prescribe rules and regulations governing such testing and identification; and may establish and collect suitable charges for testing and identification in excess of the number of free tests and identifications allowed. Every resident of this state shall be entitled to six free tests and identifications each year. However, no free tests and identifications shall be allowed between March 15 and June 30 of each year.

Subd. 8. Cooperation with U.S. department of agriculture. The commissioner shall cooperate with the United States Department of Agriculture in seed law enforcement.

In no instance shall the denaturing, processing, or destruction be ordered without first having given the claimant of said seed an opportunity to apply to said court for the release of said seed.

21.53 STAMPS OR TAGS; PERMITS.

Subdivision 1. Furnishing stamps or tags. For the purposes of defraying the costs of inspection of agricultural and tree and shrub seeds in this state, the commissioner shall furnish tags or stamps in form and character as shall be adequate for the purposes and in the manner hereinafter described. The provisions of this section do not apply to a person licensed under section 28A.04.

Subd. 2. Attaching stamps or tags to seed containers. It shall be the duty of every vendor selling, offering or exposing agricultural and tree and shrub seed for

sale in Minnesota to have attached to each original container thereof, except of uncleaned seed, a tag or stamp prescribed and prepared by the commissioner and sold to the vendor at the prices described in subdivision 3, provided that the cost of all such tags or stamps attached to containers of seed shall be added to the selling price of the seed by all wholesalers thereof. Seed sold by one wholesaler to another wholesaler need not have the sales tag attached.

Subd. 3. **Fees.** The fee to be paid by vendors shall be determined from the following schedule of fees:

(a) Fees for stamp or tags:

100 to 160 pound container	10 cents
60 to 99 pound container	9 cents

Cereals: Each 100 pounds	2 cents
Peas, flax and soybeans: Each 100 pounds	5 cents

Subd. 4. **Permits; issuance, revocation.** The commissioner is authorized at his discretion and under such rules and regulations as he may promulgate, to issue permits on application therefor, to any person to sell in Minnesota agricultural and tree and shrub seeds which conform to and are labeled under the provisions of sections 21.47 to 21.58, without the use or attachment of tags or stamps purchased from the commissioner; provided such person furnishes to the commissioner quarterly statements of all seeds sold in Minnesota, which statement shall be itemized to show the number of each class of containers referred to in subdivision 3, and such person shall pay the total fee due thereon at the same rate as the cost thereof would be for tags or stamps provided for in subdivision 3. Statements shall be furnished for the quarterly periods ending December 31, March 31, June 30, and September 30 of each year. They shall be delivered to the commissioner not later than 30 days after the end of each of said quarterly periods, and the fees due shall be paid to the commissioner not later than 30 days following the end of each quarterly period. Any person to whom permits are granted shall show as part of their analysis labels on all agricultural and tree and shrub seeds such information in connection therewith as the commissioner shall require. 21.54 CORN, GROWING ZONES.

Subdivision 1. **Established.** It shall be the duty of the director of the agricultural experiment station of the University of Minnesota to determine, establish and number or otherwise identify, corn growing zones of the state and to determine and publish a list of day classifications for each zone so established which will approximate the number of days growing season necessary for corn from emergence of the corn plants above ground after planting to maturity.

Subd. 2. **Field corn varieties; registration fee.** A record of each hybrid seed field corn grain variety to be sold in Minnesota shall be registered by February 1 of each year by the originator or owner thereof with the commissioner. The annual fee for registration shall be \$22.50 per variety. The record shall include the permanent designation of the hybrid as well as the day classification and zone of

adaptation, as determined under subdivision 1, which the originator or owner declares to be the zone in which the variety is adapted. In addition, at the time of the first registration of a hybrid seed field corn grain variety, the originator or owner shall include a sworn statement that his declaration as to the zone of adaptation was based on actual field trials in that zone and that field trials substantiate the declaration as to the day and zone classifications to which the variety is adapted. The number or name used to designate any hybrid seed field corn grain variety in the registration thereof shall be the only variety name of all seed corn covered by or sold under that registration.

Subd. 3. Field corn, tests of varieties. If the commissioner needs to verify that a hybrid seed field corn grain variety is adapted to the corn growing zone declared by the originator or owner, it must, when grown in several official comparative trials by the director of the Minnesota agricultural experiment station in the declared zone of adaptation, have an average kernel moisture at normal harvest time which does not differ from the average kernel moisture content of three or more selected standard varieties adapted for grain production in that particular growing zone by more than four percentage points. If a new variety when tested has more than six percentage points of moisture over the standard variety, it must have the maturity increased by five days in the correct zone of adaptation before it can be sold the second year. If it does not exceed the standard varieties by more than five percentage points of moisture the second year tested it can be sold the third year with the same maturity. If upon being tested the third year the moisture percentage points are found to be over the four percentage points allowed, the variety then must have the maturity increased by five days in the correct zone. The varieties to be used as standard varieties for determining adaptability to a zone shall be selected for each zone by the director of the Minnesota agricultural experiment station with the advice and consent of the commissioner of agriculture. Should a person, firm, originator, or owner of a hybrid seed field corn grain variety wish to offer his hybrid seed for sale or distribution in this state, the person, firm, originator, or owner not having distributed any of his products in Minnesota during the past 10 years, or not having any record of testing by an agency acceptable to the commissioner, then after registration of the variety the commissioner is required to have the variety tested for one year by the director of the Minnesota experiment station before it may be distributed in Minnesota. Should any person, firm, originator, or owner of a seed field corn grain variety be convicted of two successive violations of Extra Session Laws 1961, Chapter 6, with respect to the declaration of maturity date and zone number, then the violator must commence a program of pretesting for varieties as determined by the commissioner. The list of varieties to be used as standards in each growing zone shall be sent by the commissioner not later than February 1 of each year to each seed firm registering hybrid varieties with the commissioner as of the previous April 1. To assist in defraying the expenses of the Minnesota agricultural experiment station in carrying out the provisions of this section, there shall be transferred annually from the seed act account to the agricultural experiment station the sum of \$35,000.

21.56 COMMISSIONER MAY ALTER REQUIREMENTS IN EMERGENCIES.

In the event of acute shortages of any seed or seeds, or the happening of other conditions which, in the opinion of the commissioner, creates an emergency which would make impractical the enforcement of any requirement of sections 21.47 to 21.58 relating to the percentage of purity and weed seed content of any seed or seeds, the commissioner is authorized and empowered to temporarily change and alter any requirement relating to percentage of purity and weed seed content for the duration of such emergency.
