

CHAPTER 35

LIVESTOCK SANITATION

35.251 Anaplasmosis testing.

35.255 Pseudorabies program; rules.

35.251 ANAPLASMOSIS TESTING.

All breeding cattle entering Minnesota shall have a health certificate evidencing a negative test for anaplasmosis conducted at a state or federal laboratory within 30 days of entry. Cattle not so certified shall be immediately quarantined and tested for anaplasmosis at the expense of the cattle owner. Cattle having a positive reaction to the anaplasmosis test shall remain quarantined until testing free of anaplasmosis or be slaughtered. An anaplasmosis test shall not be required of steers, cattle shipped directly to a slaughtering establishment, cattle sent to a quarantine feed lot, and other cattle excepted by rule of the board of animal health. The board is authorized to adopt rules to implement the provisions of this section.

History: 1983 c 216 art 1 s 11

35.255 PSEUDORABIES PROGRAM; RULES.

The board of animal health shall adopt rules to implement a program to control pseudorabies in swine, including pseudorabies testing of breeding swine and restricted movement of feeder pigs.

History: 1983 c 367 s 1
