Boiled linseed oil shall be defined as pure linseed oil with so-called dryers added thereto, to an amount not exceeding three per cent of the total product. Pure linseed oil, as distinguished from boiled linseed oil, shall be known as raw linseed oil. Linseed replacement oil shall be defined as oil complying with the specifications for linseed replacement oil as provided by specifications of the United States dated May 1, 1943, approved for use of all departments and establishments of the Federal Government, and as the same may be written from time to time hereafter. If designed or offered for sale or use as either pure linseed oil, boiled linseed oil or linseed replacement oil, or as a substitute for any of them, or in imitation or any of them, any substance or preparation which is not included in the respective definitions thereof shall be deemed adulterated, and the manufacture thereof for sale within the state or the sale thereof within the state is prohibited. No person shall sell pure linseed oil, boiled linseed oil or linseed replacement oil unless each receptacle in which the same is kept for sale or sold shall have distinctly, legibly and durably painted, stamped, stenciled, or labeled thereon the true name of such oil, setting forth, in bold-faced capital letters not smaller than one inch in length, whether it be pure linseed oil, boiled linseed oil, or linseed replacement oil; and there shall also appear upon the receptacle the name and address of the manufacturer of the oil.

The commissioner shall issue and enforce a written or printed "stop-sale use or removal" order to the owner or custodian of any lot of paint, varnish, paint oil or solvent when the commissioner finds that the product is being offered or exposed for sale in violation of any of the provisions of sections 24.135 to 24.175, and his order shall direct that the product shall be held at a designated place until the provisions of sections 24.135 to 24.175 have been complied with and the product is released in writing by the commissioner. 24.32 SHORT TITLE.

Sections 24.32 to 24.42 may be cited as the "hazardous substances labeling act".

History: *Ex1961 c 58 s 1*

24.33 DEFINITIONS.

- (a) The term "department" means the department of agriculture;
- (b) The term "commissioner" means the commissioner of the department of agriculture;
- (c) The term "person" includes an individual, partnership, corporation, and association;
- (d) The term "hazardous substance" means any substance except drugs and medicines or mixture of substances except drugs and medicines which is (1) toxic, (2) corrosive, (3) an irritant, (4) strong sensitizer, (5) flammable, or which (6) generates pressure through decomposition, heat, or other means, if such hazardous substance or mixture of hazardous substances may cause substantial personal injury or illness during any customary or reasonably anticipated handling or use; provided, however, the term "hazardous substance" shall not include substances stored and intended for use as fuel in a heating, cooking, or refrigeration system;
- (e) The term "toxic" shall apply to any hazardous substance which has the inherent capacity to produce bodily injury to man through ingestion, inhalation, or absorption through any body surface;
- (f) (1) The term "highly toxic" means any hazardous substance which falls within any of the following categories: (a) Produces death within 14 days in half or more than half of a group of ten or more laboratory white rats each weighing between 200 and 300 grams, at a single dose of 50 milligrams or less per kilogram of body weight, when orally administered; or (b) produces death within 14 days in half or more than half of a group of ten or more laboratory white rats each weighing between 200 and 300 grams, when inhaled continuously for a period of one hour or less at an atmospheric concentration of 200 parts per million by volume or less of gas, vapor, mist, or dust, provided such concentration is likely to be encountered by man when the substance is used in any reasonably foreseeable manner; or (c) produces death within 14 days in half or more than half of a group of ten or more rabbits tested in a dosage of 200 milligrams or less per kilogram of body weight, when administered by continuous contact with the bare skin for 24 hours or less.
- (2) If the commissioner finds that available data on human experience with any hazardous substance indicate results different from those obtained on animals in the above named dosages or concentrations, the human data shall take precedence.
- (g) The term "corrosive" means any hazardous substance which in contact with living tissue will cause destruction of tissue by chemical action; but shall not refer to action on inanimate surfaces;

(h) The term "irritant" means any hazardous substance not corrosive within the meaning of (g) which on immediate, prolonged, or repeated contact with normal living tissue will induce a local inflammatory reaction;

(i) The term "strong sensitizer" means any hazardous substance which will cause, on normal living tissue through an allergic or photodynamic process, a hypersensitivity which becomes evident on reapplication of the same hazardous substance and which is designated as such by the commissioner. Before designating any hazardous substance as a strong sensitizer, the commissioner shall, after public hearing, following due notice, find that the frequency or occurrence and severity of the reaction indicate a significant potential for causing hypersensitivity;

(j) The term "extremely flammable" shall apply to any hazardous substance which has a flash point at or below 20 degrees Fahrenheit as determined by the Tagliabue Open Cup Tester, and the term "flammable" shall apply to any hazardous substance which has a flash point of above 20 degrees to and including 80 degrees Fahrenheit, as determined by the Tagliabue Open Cup Tester; except that the flammability of the contents of self-pressurized containers shall be determined by methods generally applicable to such containers and established by regulations issued by the commissioner;

(k) The term "label" means a display of written, printed, or graphic matter upon or attached to the immediate package or container of any hazardous substance; and a requirement made by or under authority of sections 24.32 to 24.42 that any word, statement, or other information appearing on the label shall not be considered to be complied with unless such word, statement, or other information also appears (1) on the outside container or wrapper, if any there be, unless it is easily legible through the outside container or wrapper and (2) on all accompanying literature where there are directions for use, written, or otherwise;

(l) The term "immediate container" does not include package liners;

(m) The term "misbranded package" means any container of a hazardous substance intended or suitable for household use which fails to bear a label:

(1) which states conspicuously (A) the name and place of business of the manufacturer, packer, or distributor; (B) the common usual name, or the chemical name or the recognized generic name (not trade name only) of the hazardous substance or of each component which contributes substantially to its hazard; (C) the signal word "DANGER" on hazardous substances which are extremely flammable, corrosive, or highly toxic; (D) the signal word "WARNING" or "CAUTION" on all other hazardous substances; (E) an affirmative statement of the principal hazard or hazards, such as "Flammable", "Vapor Harmful", "Causes Burns", "Absorbed Through Skin", or similar wording descriptive of the hazard; (F) precautionary measures describing the action to be followed or avoided; (G) instructions, when necessary, for the first aid treatment in case of contact or exposure, if the substance is hazardous through contact or exposure; (H) the word "poison" for any hazardous substance which is defined as "Highly toxic" by subsection (f); (I) instructions for handling and storage of packages which require special care in handling or storage; and (J) the statement "Keep out of the reach of children", or its practical equivalent, and

(2) on which any statements required under clause (1) of this subsection are located prominently and are in the English language in legible type in contrast by typography, layout, or color with other printed matter on the label: Provided, that the commissioner shall, by regulations, provide for minimum information which shall appear on the labels for small packages, which labels need not include all of the information required by this subsection: Provided further, that the commissioner may permit less than the foregoing statement of the hazard or precautionary measures for labels of hazardous substances presenting only minor hazards; and the

term "misbranded package" shall not apply to packages of economic poisons subject to the federal insecticide, fungicide, and rodenticide act, nor to packages of foods, drugs, and cosmetics subject to the federal food, drug, and cosmetic act.
