

CHAPTER 103A

WATER POLICY AND INFORMATION

103A.201 Regulatory policy.

103A.405 Director's approval for federal water data agreements.

103A.201 REGULATORY POLICY.

Subdivision 1. **Policy.** To conserve and use water resources of the state in the best interests of its people, and to promote the public health, safety, and welfare, it is the policy of the state that:

(1) subject to existing rights, public waters are subject to the control of the state;

(2) the state, to the extent provided by law, shall control the appropriation and use of waters of the state; and

(3) the state shall control and supervise activity that changes or will change the course, current, or cross section of public waters, including the construction, reconstruction, repair, removal, abandonment, alteration, or the transfer of ownership of dams, reservoirs, control structures, and waterway obstructions in public waters.

Subd. 2. **Wetlands findings; public interest.** (a) Wetlands identified in the state under section 103G.005, subdivision 19, do not:

(1) grant the public additional or greater right of access to the wetlands;

(2) diminish the right of ownership or usage of the beds underlying the wetlands, except as otherwise provided by law;

(3) affect state law forbidding trespass on private lands; and

(4) require the commissioner to acquire access to the wetlands.

(b) The legislature finds that the wetlands of Minnesota provide public value by conserving surface waters, maintaining and improving water quality, preserving wildlife habitat, providing recreational opportunities, reducing runoff, providing for flood-water retention, reducing stream sedimentation, contributing to improved subsurface moisture, helping moderate climatic change, and enhancing the natural beauty of the landscape, and are important to comprehensive water management, and that it is in the public interest to:

(1) achieve no net loss in the quantity, quality, and biological diversity of Minnesota's existing wetlands;

(2) increase the quantity, quality, and biological diversity of Minnesota's wetlands by restoring or enhancing diminished or drained wetlands;

(3) avoid direct or indirect impacts from activities that destroy or diminish the quantity, quality, and biological diversity of wetlands; and

(4) replace wetland values where avoidance of activity is not feasible and prudent.

103A.405 DIRECTOR'S APPROVAL FOR FEDERAL WATER DATA AGREEMENTS.

A contract or agreement may not be made by a department or agency of the state or a municipality, with the United States or an agency or department of the United States, for the collection of basic data pertaining to surface water or groundwater of the state without obtaining written approval of the director of the division of waters of the department of natural resources.
