**462.358 PROCEDURE FOR PLAN EFFECTUATION; SUBDIVISION REGULATIONS.**

*[For text of subd 1a, see M.S.1994]*

Subd. 2a. **Terms of regulations.** The standards and requirements in the regulations may address without limitation: the size, location, grading, and improvement of lots, structures, public areas, streets, roads, trails, walkways, curbs and gutters, water supply, storm drainage, lighting, sewers, electricity, gas, and other utilities; the planning and design of sites; access to solar energy; and the protection and conservation of flood plains, shore lands, soils, water, vegetation, energy, air quality, and geologic and ecologic features. The regulations shall require that subdivisions be consistent with the municipality's official map if one exists and its zoning ordinance, and may require consistency with other official controls and the comprehensive plan. The regulations may prohibit certain classes or kinds of subdivisions in areas where prohibition is consistent with the comprehensive plan and the purposes of this section, particularly the preservation of agricultural lands. The regulations may prohibit, restrict or control development for the purpose of protecting and assuring access to direct sunlight for solar energy systems. The regulations may prohibit, restrict, or control surface, above surface, or subsurface development for the purpose of protecting subsurface areas for existing or potential mined underground space development pursuant to sections 469.135 to 469.141,

and access thereto. The regulations may prohibit the issuance of permits or approvals for any tracts, lots, or parcels for which required subdivision approval has not been obtained.

The regulations may permit the municipality to condition its approval on the construction and installation of sewers, streets, electric, gas, drainage, and water facilities, and similar utilities and improvements or, in lieu thereof, on the receipt by the municipality of a cash deposit, certified check, irrevocable letter of credit, or bond in an amount and with surety and conditions sufficient to assure the municipality that the utilities and improvements will be constructed or installed according to the specifications of the municipality. Sections 471.345 and 574.26 do not apply to improvements made by a subdivider or a subdivider's contractor.

The regulations may permit the municipality to condition its approval on compliance with other requirements reasonably related to the provisions of the regulations and to execute development contracts embodying the terms and conditions of approval. The municipality may enforce such agreements and conditions by appropriate legal and equitable remedies.

**Subd. 2b. Dedication.** The regulations may require that a reasonable portion of any proposed subdivision be dedicated to the public or preserved for public use as streets, roads, sewers, electric, gas, and water facilities, storm water drainage and holding areas or ponds and similar utilities and improvements.

In addition, the regulations may require that a reasonable portion of any proposed subdivision be dedicated to the public or preserved for conservation purposes or for public use as parks, recreational facilities as defined and outlined in section 471.191, playgrounds, trails, wetlands, or open space; provided that (a) the municipality may choose to accept an equivalent amount in cash from the applicant for part or all of the portion required to be dedicated to such public uses or purposes based on the fair market value of the land no later than at the time of final approval, (b) any cash payments received shall be placed in a special fund by the municipality used only for the purposes for which the money was obtained, (c) in establishing the reasonable portion to be dedicated, the regulations may consider the open space, park, recreational, or common areas and facilities which the applicant proposes to reserve for the subdivision, and (d) the municipality reasonably determines that it will need to acquire that portion of land for the purposes stated in this paragraph as a result of approval of the subdivision.

*[For text of subs 3a to 8, see M.S.1994]*

**Subd. 9. Unplatted parcels.** Subdivision regulations adopted by municipalities may apply to parcels which are taken from existing parcels of record by metes and bounds descriptions, and the governing body or building authority may deny the issuance of permits or approvals, building permits issued under sections 16B.59 to 16B.75, or other permits or approvals to any parcels so divided, pending compliance with subdivision regulations.

**Subd. 4. Appeals.** If a land use or zoning permit or approval for a building in such location is denied, the board of appeals and adjustments shall have the power, upon appeal filed with it by the owner of the land, to grant a permit or approval for building in such location in any case in which the board finds, upon the evidence and the arguments presented to it, (a) that the entire property of the appellant of which such area identified for public purposes forms a part cannot yield a reasonable return to the owner unless such a permit or approval is granted, and (b) that balancing the interest of the municipality in preserving the integrity of the official map and of the comprehensive municipal plan and the interest of the owner of the property in the use of the property and in the benefits of ownership, the grant of such permit or approval is required by considerations of justice and equity. In addition to the notice of hearing required by section 462.354, subdivision 2, a notice shall be published in the official newspaper once at least ten days before the day of the hearing. If the board of appeals and

adjustments authorizes the issuance of a permit or approval the governing body or other board or commission having jurisdiction shall have six months from the date of the decision of the board to institute proceedings to acquire such land or interest therein, and if no such proceedings are started within that time, the officer responsible for issuing permits or approvals shall issue the permit or approval if the application otherwise conforms to local ordinances. The board shall specify the exact location, ground area, height and other details as to the extent and character of the building for which the permit or approval is granted.
