138.17 GOVERNMENT RECORDS; ADMINISTRATION.

Subdivision 1. Destruction, preservation, reproduction of records; prima facie evidence. (a) The attorney general, legislative auditor in the case of state records, state auditor in the case of local records, and director of the Minnesota historical society, hereinafter director, shall constitute the records disposition panel. The members of the panel shall have power by majority vote to direct the destruction or sale for salvage of government records determined to be no longer of any value, or to direct the disposition by gift to the Minnesota historical society or otherwise of government records determined to be valuable for preservation. The records disposition panel may by majority vote order any of those records to be reproduced by photographic or other means, and order that photographic or other reproductions be substituted for the originals of them. It may direct the destruction or sale for salvage or other disposition of the originals from which they were made. Photographic or other reproductions shall for all purposes be deemed the originals of the records reproduced when so ordered by the records disposition panel, and shall be admissible as evidence in all courts and in proceedings of every kind. A facsimile, exemplified or certified copy of a photographic, optical disk imaging, or other reproduction, or an enlargement or reduction of it, shall have the same effect and weight as evidence as would a certified or exemplified copy of the original. The records disposition panel, by majority vote, may direct the storage of government records, except as herein provided, and direct the storage of photographic or other reproductions. Photographic or other reproductions substituted for original records shall be disposed of in accordance with the procedures provided for the original records.

(b) For the purposes of this chapter:

(1) the term "government records" means state and local records, including all cards, correspondence, discs, maps, memoranda, microfilms, papers, photographs, recordings, reports, tapes, writings, optical disks, and other data, information, or documentary material, regardless of physical form or characteristics, storage media or conditions of use, made or received by an officer or agency of the state and an officer or agency of a county, city, town, school district, municipal subdivision or corporation or other public authority or political entity within the state pursuant to state law or in connection with the transaction of public business by an officer or agency;

(2) the term "state record" means a record of a department, office, officer, commission, commissioner, board or any other agency, however styled or designated, of the executive branch of state government; a record of the state legislature; a record of any court, whether of statewide or local jurisdiction; and any other record designated or treated as a state record under state law;

(3) the term "local record" means a record of an agency of a county, city, town, school district, municipal subdivision or corporation or other public authority or political entity;

(4) the term "records" excludes data and information that does not become part of an official transaction, library and museum material made or acquired and kept solely for reference or exhibit purposes, extra copies of documents kept only for convenience of reference and stock of publications and processed documents, and bonds, coupons, or other obligations or evidences of indebtedness, the destruction or other disposition of which is governed by other laws;

(5) the term "state archives" means those records preserved or appropriate for preservation as evidence of the organization, functions, policies, decisions, procedures, operations or other activities of government or because of the value of the information contained in them, when determined to have sufficient historical or other value to warrant continued preservation by the state of Minnesota and accepted for inclusion in the collections of the Minnesota historical society.

(c) If the decision is made to dispose of records by majority vote, the Minnesota historical society may acquire and retain whatever they determine to be of potential historical value.

Subd. 1a. Records inspection. Government records which a state agency, political subdivision, or statewide system lists on a records disposition application or records schedule, or on which archival assistance or advice is requested, may be inspected by state archives' employees if state archives gives prior notice. Employees of the archives shall have access to the records for the purpose of determining the historical or other continuing value of the records,

regardless of the records' classification pursuant to chapter 13 or 270B. Employees of the archives shall be liable to the penalties set forth for improper disclosure by them of private, confidential, nonpublic, or protected nonpublic data inspected for this purpose.

Subd. 1b. Transfer process. After July 1, 1982, all records deemed to be of continuing value and authorized for transfer to the archives by the records disposition panel shall be retained by the requesting agency or may be transferred to the archives in accordance with subdivision 1, notwithstanding the provisions of chapter 13. The responsible authority of the state agency, political subdivision, or statewide system transferring records to the archives shall notify the archivist or a designee with regard to the records transferred of the classification of the records pursuant to chapter 13.

Subd. 1c. Access to archives records. (a) All records transferred to the archives shall be accessible to the public unless the archives determines that the information:

(1) Was compiled for law enforcement purposes and disclosure would (i) materially impair the effectiveness of an ongoing investigation, criminal intelligence operation, or law enforcement proceeding; (ii) identify a confidential informant; (iii) reveal confidential investigative techniques or procedures, including criminal intelligence activity; or (iv) endanger the life of an individual;

(2) Is administrative or technical information, including software, operating protocols, employee manuals, or other information, the disclosure of which would jeopardize the security of a record keeping system;

(3) Is proprietary information, including computer programs and software and other types of information manufactured or marketed by persons under exclusive legal right, owned by the agency or entrusted to it;

(4) Contains trade secrets or confidential commercial and financial information obtained, upon request, from a person;

(5) Is library, archival, or museum material contributed by private persons to the extent of any lawful limitation imposed upon the material; or

(6) Disclosure would constitute a clearly unwarranted invasion of personal privacy. Disclosure of an individually identifiable record does not constitute a clearly unwarranted invasion of personal privacy if the public interest in disclosure outweighs the privacy interest of the individual.

(b) The society may withhold access to state archives from any person who willfully mutilates, damages, or defaces archival records, or wrongfully removes them from state archives; provided that the society shall notify the person of the decision to withhold access, and the person may, within 30 days, appeal the decision to the executive council of the society.

(c) The state archivist shall notify any person from whom access is withheld pursuant to clause (a). The person may, within 30 days of the day the notice is sent, appeal the archivist's determination to the executive council of the society. The executive council shall, within 30 days of the filing of an appeal, issue a decision determining if the archivist has correctly applied the standards of clause (a). The decision of the executive council may be appealed to the district court of Ramsey county.

Subd. 2. [Repealed, 1971 c 529 s 15]

Subd. 3. University; state agricultural society; historical society. Laws 1971, chapter 529, sections 1 to 14 shall not apply to the public records of the University of Minnesota, the Minnesota state agriculture society, or the Minnesota historical society.

Subd. 4. State library. No public records of the Minnesota state library shall be subject to the disposition or orders provided by Laws 1971, chapter 529, except with the consent of the state librarian.

Subd. 5. Supreme court. No public records of the supreme court shall be subject to the disposition or orders provided by Laws 1971, chapter 529, except with the consent of the court.

Subd. 6. Archivist; equipment; supplies. The Minnesota historical society shall employ a professional archivist, who shall be known as the state archivist, and other agents and personnel as are necessary to enable it to carry out its duties and powers. The archivist shall be appointed by the director of the society.

Subd. 7. Records management program. A records management program for the application of efficient and economical management methods to the creation, utilization, maintenance, retention, preservation, and disposal of official records shall be administered by the commissioner of administration. The state records center which stores and services state records not in state archives shall be administered by the commissioner of administration. The commissioner of administration is empowered to (1) establish standards, procedures, and techniques for effective management of government records, (2) make continuing surveys of paper work operations, and (3) recommend improvements in current records management practices including the use of space, equipment, and supplies employed in creating, maintaining, preserving and disposing of government records. It shall be the duty of the head of each state agency and the governing body of each county, municipality, and other subdivision of government to cooperate with the commissioner in conducting surveys and to establish and maintain an active, continuing program for the economical and efficient management of the records of each agency, county, municipality, or other subdivision of government. When requested by the commissioner, public officials shall assist in the preparation of an inclusive inventory of records in their custody, to which shall be attached a schedule, approved by the head of the governmental unit or agency having custody of the records and the commissioner, establishing a time period for the retention or disposal of each series of records. When the schedule is unanimously approved by the records disposition panel, the head of the governmental unit or agency having custody of the records may dispose of the type of records listed in the schedule at a time and in a manner prescribed in the schedule for particular records which were created after the approval. A list of records disposed of pursuant to this subdivision shall be forwarded to the commissioner and the archivist by the head of the governmental unit or agency. The archivist shall maintain a list of all records destroyed.

Subd. 8. Emergency records preservation. In light of the danger of nuclear or natural disaster, the commissioner of administration shall establish and maintain a program for the selection and preservation of public records considered essential to the operation of government and to the protection of the rights and interests of persons, and shall make or cause to be made preservation duplicates or designate as preservation duplicates existing copies of such essential public records. Preservation duplicates shall be durable, accurate, complete, and clear, and such duplicates reproduced by photographic or other process which accurately reproduces and forms a durable medium for so reproducing the original shall have the same force and effect for all purposes as the original record whether the original record is in existence or not. A transcript, exemplification, or certified copy of such preservation duplicate shall be deemed for all purposes to be a transcript, exemplification, or certified copy of the original record. Such preservation duplicates shall be preserved in the place and manner of safekeeping prescribed by the commissioner.

Every county, municipality, or other subdivision of government may institute a program for the preservation of necessary documents essential to the continuity of government. Such a program shall first be submitted to the commissioner for approval or disapproval and no such program shall be instituted until such approval is obtained.

Subd. 9. Optical disk standards. The records disposition panel shall develop standards for storage of all government records on optical disk by January 1, 1991.

Subd. 10. Optical image storage. (a) Any government record, including a record with archival value, may be transferred to and stored on a nonerasable optical imaging system and retained only in that format, if the requirements of this section are met.

(b) All documents preserved on nonerasable optical imaging systems must meet standards for permanent records specified in section 15.17, subdivision 1, and must be kept available for retrieval so long as any law requires. Standards under section 15.17, subdivision 1, may not be inconsistent with efficient use of optical imaging systems.

(c) A government entity storing a record on an optical imaging system shall create and store a backup copy of the record at a site other than the site where the original is kept. The government entity shall retain the backup copy and operable retrieval equipment so long as any law requires the original to be retained. The backup copy required by this paragraph must

be preserved either (1) on a nonerasable optical imaging system; or (2) by another reproduction method approved by the records disposition panel.

(d) All contracts for the purchase of optical imaging systems used pursuant to this chapter shall contain terms that insure continued retrievability of the optically stored images and conform to any guidelines that may be established by the information policy office of the department of administration for perpetuation of access to stored data.

Although a license may name a custodian other than the state archaeologist, title to the objects and data nevertheless is reserved to the state, and physical possession of them reverts to the state if the custodian named ceases to exist, or if the state archaeologist finds that the custodian is not properly caring for them or keeping them conveniently available for study by students of archaeology.

Subd. 2. Field archaeology on behalf of nonresident schools and scientific institutions. The director of the Minnesota historical society, with the approval of the state archaeologist, may agree for the state with an agency of another state, or with a school or scientific institution of another state, to permit qualified persons acting for the nonresident agency, school, or institution to be licensed to engage in field archaeology in this state. Conservation officers and other enforcement officers of the department of natural resources shall enforce the provisions of sections 138.31 to 138.42 and report violations to the director of the society. When archaeological or historic sites are known or based on investigations or are suspected to exist on public lands or waters, the agency or department controlling said lands or waters shall use the professional services of archaeologists from the University of Minnesota, Minnesota historical society, or other qualified professional archaeologists, to preserve these sites. In the event that archaeological excavation is required to protect or preserve these sites, state and other governmental agencies may use their funds for such activities.

Subd. 3. When significant archaeological or historic sites are known or suspected to exist on public lands or waters, the agency or department controlling said lands or waters shall submit construction or development plans to the state archaeologist and the director of the society for review prior to the time bids are advertised. MINNESOTA HISTORIC DISTRICT ACT OF 1971

138.71 POLICY.

The spirit and direction of the state of Minnesota are founded upon and reflected in its historic past. In the effort to preserve the environmental values of the state, outstanding geographical areas possessing historical, architectural and aesthetic values are of paramount importance in the development of the state; in the face of ever increasing extensions of urban centers, highways, and residential, commercial and industrial developments, areas with an unusual concentration of distinctive historical and architectural values are threatened by destruction or impairment. It is in the public interest to provide a sense of community identity and preserve these historic districts which represent and reflect elements of the state's cultural, social, economic, religious, political, architectural and aesthetic heritage.
