

626.5562 TOXICOLOGY TESTS REQUIRED.

Subdivision 1. **Test; report.** A physician shall administer a toxicology test to a pregnant woman under the physician's care or to a woman under the physician's care within eight hours after delivery to determine whether there is evidence that she has ingested a controlled substance, if the woman has obstetrical complications that are a medical indication of possible use of a controlled substance for a nonmedical purpose. If the test results are positive, the physician shall report the results under section 626.5561. A negative test result does not eliminate the obligation to report under section 626.5561, if other evidence gives the physician reason to believe the patient has used a controlled substance for a nonmedical purpose.

Subd. 2. **Newborns.** A physician shall administer to each newborn infant born under the physician's care a toxicology test to determine whether there is evidence of prenatal exposure to a controlled substance, if the physician has reason to believe based on a medical assessment of the mother or the infant that the mother used a controlled substance for a nonmedical purpose during the pregnancy. If the test results are positive, the physician shall report the results as neglect under section 626.556. A negative test result does not eliminate the obligation to report under section 626.556 if other medical evidence of prenatal exposure to a controlled substance is present.

Subd. 3. **Report to Department of Health.** Physicians shall report to the Department of Health the results of tests performed under subdivisions 1 and 2. A report shall be made on the certificate of live birth medical supplement or the report of fetal death medical supplement filed on or after February 1, 1991. The reports are medical data under section 13.384.

Subd. 4. **Immunity from liability.** Any physician or other medical personnel administering a toxicology test to determine the presence of a controlled substance in a pregnant woman, in a woman within eight hours after delivery, or in a child at birth or during the first month of life is immune from civil or criminal liability arising from administration of the test, if the physician ordering the test believes in good faith that the test is required under this section and the test is administered in accordance with an established protocol and reasonable medical practice.

Subd. 5. **Reliability of tests.** A positive test result reported under this section must be obtained from a confirmatory test performed by a drug testing laboratory which meets the requirements of section 181.953, and must be performed according to the requirements for performance of confirmatory tests imposed by the licensing, accreditation, or certification program listed in section 181.953, subdivision 1, in which the laboratory participates.
