The market value utilized in computing city net tax capacity shall be reduced by the sum of (1) a city's market value of commercial industrial property as defined in section 276A.01, subdivision 3, or 473F.02, subdivision 3, multiplied by the ratio determined pursuant to section 276A.06, subdivision 2, paragraph (a), or 473F.08, subdivision 2, paragraph (a), (2) the market value of the captured value of tax increment financing districts as defined in section 469.177, subdivision 2, and (3) the market value of transmission lines deducted from a city's total net tax capacity under section 273.425. Subd. 21. **Equalized market values.** "Equalized market values" means market values that have been equalized by dividing the assessor's estimated market value for the second year prior to that in which the aid is payable by the assessment sales ratios determined by class in the assessment sales ratio study conducted by the Department of Revenue pursuant to section 127A.48 in the second year prior to that in which the aid is payable. The equalized market values equal the unequalized market values divided by the assessment sales ratio.

Housing units includes both occupied and vacant housing units as defined by the federal census.

Subd. 31. **Population decline percentage.** "Population decline percentage" for a city is the percent decline in a city's population for the last ten years, based on the most recently available population estimate from the state demographer or a federal census. A city's population decline percentage cannot be less than zero.

Subd. 32. **Commercial industrial percentage.** "Commercial industrial percentage" for a city is 100 times the sum of the estimated market values of all real property in the city classified as class 3 under section 273.13, subdivision 24, excluding public utility property, to the total market

value of all taxable real and personal property in the city. The market values are the amounts computed before any adjustments for fiscal disparities under section 276A.06 or 473F.08. The market values used for this subdivision are not equalized.

(b) For a city with a population less than 2,500, "city revenue need" is the sum of (1) 2.387 times the pre-1940 housing percentage; plus (2) 2.67591 times the commercial industrial percentage; plus (3) 3.16042 times the population decline percentage; plus (4) 1.206 times the transformed population; minus (5) 62.772.

(c) For a city with a population of 2,500 or more and a population in one of the most recently available five years that was less than 2,500, "city revenue need" is the sum of (1) its city revenue need calculated under paragraph (a) multiplied by its transition factor; plus (2) its city revenue need calculated under the formula in paragraph (b) multiplied by the difference between one and its transition factor. For purposes of this paragraph, a city's "transition factor" is equal to 0.2 multiplied by the number of years that the city's population estimate has been 2,500 or more. This provision only applies for aids payable in calendar years 2006 to 2008 to cities with a 2002 population of less than 2,500. It applies to any city for aids payable in 2009 and thereafter.

(d) The city revenue need cannot be less than zero.

(e) For calendar year 2005 and subsequent years, the city revenue need for a city, as determined in paragraphs (a) to (d), is multiplied by the ratio of the annual implicit price deflator for government consumption expenditures and gross investment for state and local governments as prepared by the United States Department of Commerce, for the most recently available year to the 2003 implicit price deflator for state and local government purchases.

Subd. 35. **Tax effort rate.** "Tax effort rate" means the net levy for all cities divided by the sum of the city net tax capacity for all cities. For purposes of this section, "net levy" means the city levy, after all adjustments, used for calculating the local tax rate under section 275.08 for taxes payable in the year prior to the aid distribution. The fiscal disparity distribution levy under chapter 276A or 473F is included in net levy.

No city's city jobs base may exceed \$4,725,000 under this paragraph.

(b) For calendar year 2010 and subsequent years, the city jobs base for a city, as determined in paragraph (a), is multiplied by the ratio of the appropriation under section 477A.03, subdivision 2a, for the year in which the aid is paid to the appropriation under that section for aids payable in 2009.

(c) For purposes of this subdivision, "jobs per capita in the city" means (1) the average annual number of employees in the city based on the data from the Quarterly Census of Employment and Wages, as reported by the Department of Employment and Economic Development, for the most recent calendar year available as of May 1, 2008, divided by (2) the city's population for the same calendar year as the employment data. The commissioner of the Department of Employment and Economic Development shall certify to the city the average annual number of employees for each city by June 1, 2008. A city may challenge an estimate under this paragraph by filing its specific objection, including the names of employers that it feels may have misreported data, in writing with the commissioner by June 20, 2008. The commissioner shall make every reasonable effort to address the specific objection and adjust the data as necessary. The commissioner shall certify the estimates of the annual employment to the commissioner of revenue by July 15, 2008, including any estimates still under objection.

Subd. 43. **Unmet need.** "Unmet need" for a city is equal to the difference between (1) its city revenue need multiplied by its population, and (2) its city net tax capacity multiplied by the tax effort rate.
