

148.573 TOPICAL OCULAR DRUG USE.

Subdivision 1. **Certificate required.** A licensed optometrist shall not purchase, possess or administer any topical ocular drugs unless the optometrist has obtained a topical ocular drug certificate from the Board of Optometry certifying that the optometrist has complied with the requirements in paragraphs (a) and (b).

(a) Successful completion of 60 classroom hours of study in general and clinical pharmacology as it relates to the practice of optometry, with particular emphasis on the use of topical ocular drugs for examination purposes. At least 30 of the 60 classroom hours shall be in ocular pharmacology and shall emphasize the systemic effects of and reactions to topical ocular drugs, including the emergency management and referral of any adverse reactions that may occur. The course of study shall be approved by the Board of Optometry, and shall be offered by an institution which is accredited by a regional or professional accreditation organization recognized or approved by the Council on Postsecondary Education or the United States Department of Education or their successors. The course shall be completed prior to entering the examination required by this section.

(b) Successful completion of an examination approved by the Board of Optometry on the subject of general and ocular pharmacology as it relates to optometry with particular emphasis on the use of topical ocular drugs, including emergency management and referral of any adverse reactions that may occur.
