FISHING HABITAT

97C.001 EXPERIMENTAL WATERS.

Subdivision 1. **Definition; designation.** (a) Experimental waters are lakes and streams where special regulations are used and evaluated to meet a specific fisheries objective.

(b) The commissioner may designate any waters of the state having free access to the public as experimental waters. The designated experimental waters may not exceed 200 lakes and 50 streams at one time. For all experimental waters, the commissioner shall develop an evaluation plan and specify a termination date. On the termination date, the commissioner shall vacate or extend the experimental waters designation, or designate the experimental waters as special management waters under section 97C.005. The commissioner shall by rule establish methods and criteria for public initiation of experimental waters designation and for public participation in the evaluation of the waters designated.

(c) Designation of experimental waters under this section is not subject to chapter 14.

Subd. 2. **Public notice and comment.** (a) Before the commissioner designates, or vacates or extends the designation of, experimental waters, notice of the proposed change must be provided in the county where the largest portion of the waters is located, a virtual or in-person meeting must be held, and opportunity to submit public comment must be offered.

(b) Before the year that the designation is to become effective, the commissioner must give notice of the proposed designation, vacation, or extension. The notice must summarize the proposed action and invite public comment. Public comments must be accepted at least through September 30, and the commissioner must consider any public comments received in making a final decision. Notice must include:

(1) signs of the proposed changes and instructions for submitting comments posted at publicly maintained access points on the water by June 1;

(2) a list of proposed changes posted on the department's website by June 1, summarizing the proposed actions and inviting public comment; and

(3) a news release issued by the commissioner by July 1, a notice published in a newspaper of general circulation in the area where the waters are located by August 20, and at least one more digital media communication published by August 31.

(c) A virtual or in-person meeting must be held before September 20 where public comment must be accepted. An in-person meeting, where public comment must be accepted, must be held in the county where the largest portion of the waters is located if:

(1) a water or connected waters to be designated is over 5,000 acres or a stream or river reach is over ten miles; or

(2) a request for an in-person meeting is submitted to the commissioner by August 20 before the year that the designation is to become effective.

(d) The notices required in this subdivision must summarize the proposed action, invite public comment, and specify a deadline for the receipt of public comments. The commissioner shall mail a copy of each required notice to persons who have registered their names with the commissioner for this purpose. The commissioner shall consider any public comments received in making a final decision.

(e) If a water to be designated is a lake with a water area of more than 1,500 acres, or is a stream or river with a reach of more than six miles, a public meeting must also be held in the seven-county metropolitan area unless a virtual meeting is held and notice of the meeting is published in a newspaper of general circulation in the seven-county metropolitan area.

Subd. 3. **Seasons, limits, and other requirements.** The commissioner may, in accordance with the procedures in subdivision 2 or by rule under chapter 14, establish open seasons, limits, methods, and other requirements for taking fish on experimental waters.

97C.005 SPECIAL MANAGEMENT WATERS.

Subdivision 1. **Definition; designation.** (a) Special management waters are waters that:

(1) have been subject to special regulations that have been evaluated and proven effective under an experimental waters designation under section 97C.001; or

(2) are classified by the commissioner for primary use as trophy lakes, family fishing lakes, designated trout lakes, designated trout streams, special species management lakes, and other designated uses.

(b) The commissioner may designate any waters of the state, including experimental waters, as special management waters. The commissioner shall by rule establish methods and criteria for public participation in the evaluation and designation of waters as special management waters.

(c) Designation of special management waters under this section is not subject to chapter 14.

Subd. 2. **Public notice and comment.** (a) Before the commissioner designates special management waters, notice of the proposed designation must be given, a virtual or in-person meeting must be held, and opportunity to submit public comment must be offered.

(b) If a water proposed to be designated is a lake with a water area of more than 1,500 acres, or is a stream or river with a reach of more than six miles, a public meeting must also be held in the seven-county metropolitan area unless a virtual meeting is held and notice of the meeting is published in a newspaper of general circulation in the seven-county metropolitan area.

(c) For proposed special management waters other than designated trout lakes and designated trout streams, before the year that the designation is to become effective, the commissioner must give notice of the proposed designation. The notice must summarize the proposed action and invite public comment. Public

comments must be accepted at least through September 30, and the commissioner must consider any public comments received in making a final decision. Notice must include:

(1) signs of the proposed designation and instructions for submitting comments posted at publicly maintained access points on the water by June 1;

(2) a list of proposed designations posted on the department's website by June 1, summarizing the proposed action and inviting public comment; and

(3) a news release issued by the commissioner by July 1, a notice published in a newspaper of general circulation in the area where the waters are located by August 15, and at least one more digital media communication published by August 31.

(d) A virtual or in-person meeting must be held before September 20 where public comment must be accepted. An in-person meeting, where public comment must be accepted, must be held in the county where the largest portion of the waters is located if:

(1) a water to be designated is a lake over 5,000 acres or is a stream or river reach over ten miles; or

(2) a request for an in-person meeting is submitted to the commissioner by August 20 before the year that the designation is to become effective.

(e) For waters proposed to be designated as trout streams or trout lakes, notice of the proposed designation must be published at least 90 days before the effective date of the designation in a news release issued by the commissioner and in a newspaper of general circulation in the area where the waters are located. In addition, all riparian owners along the waters must be notified at least 90 days before the effective date of the designation.

(f) The notices required in this subdivision must summarize the proposed action, invite public comment, and specify a deadline for the receipt of public comments. The commissioner shall mail a copy of each required notice to persons who have registered their names with the commissioner for this purpose. The commissioner shall consider any public comments received in making a final decision.

Subd. 3. Seasons, limits, and other rules. The commissioner may, in accordance with the procedures in subdivision 2, paragraphs (c) and (e), or by rule under chapter 14, establish open seasons, limits, methods, and other requirements for taking fish on special management waters. The commissioner may, by written order published in the State Register, amend daily, possession, or size limits to make midseason adjustments based on available harvest, angling pressure, and population data to manage the fisheries in the 1837 Ceded Territory in compliance with the court orders in *Mille Lacs Band of Chippewa v. Minnesota*, 119 S. Ct. 1187 (1999) and in the state waters of Upper Red Lake. The midseason adjustments in daily, possession, or size limits are not subject to the rulemaking provisions of chapter 14 and section 14.386 does not apply. Before the written order is effective, the commissioner shall attempt to notify persons or groups of persons affected by the written order by public announcement, posting, and other appropriate means as determined by the commissioner.

97C.02 ACQUIRING CRITICAL AQUATIC HABITAT.

The commissioner shall acquire lands that are critical for fish and other aquatic life and that meet criteria described for aquatic management areas in section 86A.05, subdivision 14. The lands that are acquired may be developed to manage lakes, rivers, streams, and adjacent wetlands and lands for aquatic life, water quality, intrinsic biological value, public fishing, and other compatible outdoor recreational uses. The land may be acquired by gift, lease, easement, or purchase. The commissioner shall designate land acquired under this subdivision as aquatic management areas for the purposes of the outdoor recreation system.

97C.025 FISHING AND MOTORBOATS RESTRICTED IN CERTAIN AREAS.

(a) The commissioner may prohibit or restrict the taking of fish or the operation of motorboats by posting waters that:

- (1) are designated as spawning beds or fish preserves;
- (2) are being used by the commissioner for fisheries research or management activities; or
- (3) are licensed by the commissioner as a private fish hatchery or aquatic farm under section 17.4984, subdivision 1, or 97C.211, subdivision 1.

An area may be posted under this paragraph if necessary to prevent excessive depletion of fish or interference with fisheries research or management activities or private fish hatchery or aquatic farm operations.

(b) The commissioner will consider the following criteria in determining if waters licensed under a private fish hatchery or aquatic farm should be posted under paragraph (a):

- (1) the waters contain game fish brood stock or native rough fish brood stock and the brood stock is vital to the private fish hatchery or aquatic farm operation;
- (2) game fish or native rough fish are present in the licensed waters only as a result of aquaculture activities by the licensee; and
- (3) no public access to the waters existed when the waters were first licensed.

(c) A private fish hatchery or aquatic farm licensee may not take fish or authorize others to take fish in licensed waters that are posted under paragraph (a), except as provided in section 17.4983, subdivision 3, and except that if waters are posted to allow the taking of fish under special restrictions, licensees and others who can legally access the waters may take fish under those special restrictions.

(d) Before March 1, 2003, riparian landowners adjacent to licensed waters on April 30, 2002, and riparian landowners who own land adjacent to waters licensed after April 30, 2002, on the date the waters become licensed waters, plus their children and grandchildren, may take two daily limits of fish per month under an angling license subject to the other limits and conditions in the game and fish laws.

(e) Except as provided in paragraphs (c), (d), and (f), a person may not take fish or operate a motorboat if prohibited by posting under paragraph (a).

(f) An owner of riparian land adjacent to an area posted under paragraph (a) may operate a motorboat through the area by the shortest direct route at a speed of not more than five miles per hour.

(g) Postings for water bodies designated under paragraph (a), clause (1), or being used for fisheries research or management under paragraph (a), clause (2), are not subject to the rulemaking provisions of chapter 14, and section 14.386 does not apply.

The commissioner shall prescribe the manner of taking and disposal. The commissioner may award a contract

under this section without competitive bidding. Before establishing the contractor's compensation, the commissioner must consider the qualifications of the contractor, including the contractor's equipment, knowledge of the waters, and ability to perform the work.

History: 1986 c 386 art 3 s 9; 2000 c 495 s 41; 2023 c 60 art 4 s 62; 2024 c 90 art 2 s 22

(b) A permit under this section may be issued to an individual, a group of riparian owners, or a lake improvement association. The permit may only be issued if all riparian owners have consented in writing.

Subd. 2. **Taking fish.** The commissioner may set special open seasons, limits, and methods to take fish before the piscicides are applied. The commissioner must post the special provisions at or near the waters.

History: 1986 c 386 art 3 s 11; 1993 c 231 s 48

97C.055 REMOVING DEAD FISH.

The commissioner shall remove and dispose of dead fish that accumulate in or upon the shores of public waters in quantities that are a public nuisance or are detrimental to game fish.

History: 1986 c 386 art 3 s 12

97C.061 DRAGGING WEIGHT OR ANCHOR THROUGH VEGETATION.

A person may not use a motorboat to drag an anchor or other weight through aquatic vegetation, except by commissioner's rule.

History: 1986 c 386 art 3 s 13; 1991 c 259 s 23

97C.065 POLLUTANTS IN WATERS.

A person may not dispose of any substance in state waters, or allow any substance to enter state waters, in quantities that injure or are detrimental to the propagation of wild animals or taint the flesh of wild animals. Each day of violation is a separate offense. An occurring or continuous violation is a public nuisance. An

action may be brought by the attorney general to enjoin and abate nuisance upon request of the commissioner. This section does not apply to chemicals used for pest control for the general welfare of the public.

History: 1986 c 386 art 3 s 14

97C.071 STRUCTURES IN PUBLIC WATERS.

History: 1986 c 386 art 3 s 15

97C.075 FISH SCREENS IN FLOWING WATERS.

A person may not obstruct a creek, stream, or river to prevent the passage of fish with a rack or screen without the permission of the commissioner. The person that erected the obstruction, or the owner of the land where the obstruction is located, must immediately remove the obstruction upon order of the commissioner.

History: 1986 c 386 art 3 s 16

97C.077 FISH SCREENS IN LAKES.

Subdivision 1. **Lake in single county.** If all or a major part of a navigable lake is located within a single county and has been stocked with fish by the United States government, the county board, in order to maintain fish in the lake and prevent their escape from the lake, may erect and maintain screens at the inlets and outlets of the lake. The county board may appropriate from the county treasury money for the erection and maintenance of the screens.

Subd. 2. **Lake in more than one county.** If a lake is located in more than one county, the county boards of the affected counties may jointly provide for the erection and maintenance of screens. The expense of the screens and maintenance must be paid equally between the counties, and the county boards must appropriate money from the county treasury of their respective counties to pay the expenses of the screens and maintenance.

History: 1990 c 391 art 8 s 26

97C.081 FISHING CONTESTS.

Subdivision 1. **Restrictions.** A person may not conduct a fishing contest on waters except as provided in this section.

Subd. 2. [Repealed, 1Sp2011 c 2 art 5 s 70]

Subd. 3. **Contests requiring permit.** (a) Unless subdivision 3a applies, a person must have a permit from the commissioner to conduct a fishing contest if:

- (1) there are more than 25 boats for open-water contests, more than 150 participants for ice-fishing contests, or more than 100 participants for shore-fishing contests;
- (2) entry fees are more than \$25 per person; or
- (3) the contest is limited to trout species.

(b) The commissioner shall charge a fee for the permit that recovers the costs of issuing the permit and of monitoring the activities allowed by the permit. Notwithstanding section 16A.1283, the commissioner may, by written order published in the State Register, establish contest permit fees. The fees are not subject to the rulemaking provisions of chapter 14, and section 14.386 does not apply.

(c) The commissioner may require the applicant to furnish evidence of financial responsibility in the form of a surety bond or bank letter of credit in the amount of \$25,000 if entry fees are over \$25 per person, or total prizes are valued at more than \$25,000, and if the applicant has either:

- (1) not previously conducted a fishing contest requiring a permit under this subdivision; or
- (2) ever failed to make required prize awards in a fishing contest conducted by the applicant.

(d) The permit fee for any individual contest may not exceed the following amounts:

- (1) \$70 for an open-water contest not exceeding 50 boats and without off-site weigh-in;
- (2) \$225 for an open-water contest with more than 50 boats and without off-site weigh-in;
- (3) \$280 for an open-water contest not exceeding 50 boats with off-site weigh-in;
- (4) \$560 for an open-water contest with more than 50 boats with off-site weigh-in;
- (5) \$135 for an ice-fishing contest with more than 150 participants; or
- (6) \$50 for a contest where all participants are age 18 years or under.

Subd. 3a. **No permit required.** A person may conduct a fishing contest without a permit from the commissioner if:

- (1) the contest is not limited to specifically named waters;
- (2) the contest is limited to common carp and participants are required to fish with a hook and line; or
- (3) the total prize value is \$500 or less.

Subd. 4. **Restrictions.** (a) The commissioner may by rule establish restrictions on fishing contests to protect fish and fish habitat, to restrict activities during high use periods, to restrict activities that affect research or management work, to restrict the number of boats, and for the safety of contest participants. The commissioner may require mandatory decontamination of boats participating in fishing contests on infested waters.

(b) By March 1, 2011, the commissioner shall develop a best practices certification program for fishing contest organizers to ensure the proper handling and release of fish.

Subd. 5. [Repealed, 2014 c 290 s 70]

Subd. 6. **Permit application process.** (a) Beginning August 1 each year, the commissioner shall accept permit applications for fishing contests to be held in the following year.

(b) If the number of permit applications received by the commissioner from August 1 through the last Friday in September exceeds the limits specified in subdivisions 7 and 8, the commissioner shall notify the affected applicants that their requested locations and time period are subject to a drawing. After notification, the commissioner shall allow the affected applicants a minimum of seven days to change the location or

time period requested on their applications, provided that the change is not to a location or time period for which applications are already at or above the limits specified in subdivisions 7 and 8.

(c) After the applicants have been given at least seven days to change their applications, the commissioner shall conduct a drawing for all locations and time periods for which applications exceed limits. First preference in the drawings shall be given to applicants for established or traditional fishing contests, and second preference to applicants for contests that are not established as traditional fishing contests based on the number of times they have been unsuccessful in previous drawings. Except for applicants of established or traditional fishing contests, an applicant who is successful in a drawing loses all accumulated preference. "Established or traditional fishing contest" means a fishing contest that was issued permits in 1999 and 2000 or was issued permits four out of five years from 1996 to 2000 for the same lake and time period. Beginning with 2001, established or traditional fishing contests must continue to be conducted at least four out of five years for the same lake and time period to remain established or traditional.

(d) The commissioner has until November 7 to approve or deny permit applications that are submitted by 4:30 p.m. on the last Friday in September. The commissioner may approve a permit application that is received after 4:30 p.m. on the last Friday in September if approving the application would not result in exceeding the limits in subdivisions 7 and 8.

(e) The commissioner shall develop an online web-based fishing contest permit application process.

Subd. 7. **Weekend limitations.** (a) On all waters 55,000 acres or less, the commissioner may ensure that each of the state's waters has at least two weekends per month with no permitted fishing contests.

(b) Unless otherwise authorized by the commissioner, permitted fishing contests that are conducted for more than one day may not include more than one weekend day from Memorial Day weekend through Labor Day weekend.

(c) The commissioner may not approve permits for fishing contests on a weekend with a fishing season opener if the contest targets a species for which the season is opening.

Subd. 8. **Limits on number of fishing contests.** (a) The number of permitted fishing contests allowed each month on a water body shall not exceed the following limits:

(1) Lakes:

Size/acres	Maximum number of permitted fishing contests	Maximum number of large permitted fishing contests	Maximum number of permitted fishing contest days
less than 2,000	2	0	4
2,000-4,999	3	1	6
5,000-14,999	4	2	8
15,000-55,000	5	3	10
more than 55,000	no limit	no limit	no limit

For boundary water lakes, the limits on the number of permitted fishing contests shall be determined based on the Minnesota acreage.

(2) Rivers:

	Maximum number of permitted fishing contests	Maximum number of large permitted fishing contests	Maximum number of permitted fishing contest days

(d) For all other rivers, no more than two contest permits, not to exceed four days combined, may be issued for any continuous segment of a river per month. Of the two contests permitted, only one shall be a large permitted fishing contest. Permits issued by the commissioner shall not exceed 60 continuous river miles.

Subd. 8a. **Additional fishing contests; permits.** Notwithstanding the limits in subdivision 8, the commissioner may allow up to five additional permits each year for fishing contests on bodies of water that are 5,000 acres or more in size. - (3) conform to best management practices for the lake.

Subd. 9. **Permit restrictions.** (a) The commissioner may require fishing contest permittees to limit prefishing to week days only as a condition of a fishing contest permit. (b) The commissioner may require permit restrictions on the hours that a permitted fishing contest is conducted, including, but not limited to, starting and ending times.

(c) The commissioner may require permit restrictions on the number of parking spaces that may be used on a state-owned public water-access site. The commissioner may require proof from permittees that parking restrictions on the permit are communicated to fishing contest participants and enforced.

(d) To prevent undue mortality of released fish, the commissioner may require restrictions for off-site weigh-ins and live releases on a fishing contest permit or may deny permits requesting an off-site weigh-in or live release. The commissioner may allow for live release weigh-ins at public accesses.

(e) A person may not transfer a fishing contest permit to another person.

(f) Failure to comply with fishing contest permit restrictions may be considered grounds for denial of future permit applications.

97C.202 WATER-QUALITY MONITORING AT STATE FISH HATCHERIES.

(a) The commissioner, in conjunction with the commissioners of health, agriculture, and the Pollution Control Agency, must test the source water at the state fish hatcheries located in the cities of Altura, Lanesboro, and Peterson monthly for nitrates and pesticides, including neonicotinoids. By February 15 each year, the commissioner must report the results of the previous calendar year's testing to the chairs and ranking minority members of the legislative committees and divisions with jurisdiction over environment and natural resources policy and finance and health policy and finance.

97C.203 EXCHANGING FISH OR WILDLIFE RESOURCES; DISPOSAL OF STATE HATCHERY PRODUCTS.

(a) The commissioner shall dispose of fish hatchery products or exchange fish or wildlife resources only after they have been tested for certifiable diseases. The testing must have been completed within the 12 months preceding the disposal or exchange. Fish or wildlife resources subject to an exchange must have received a disease-free certification for those certifiable diseases not currently documented in Minnesota. Disease certification must be provided prior to accepting the fish or wildlife resource. When the fish or wildlife resource is not certified as disease-free, they may be stocked or transferred only into waters that already contain that disease.

(b) State hatchery products shall be disposed of according to the following order of priorities:

(1) distribution of fish eggs and fry to state hatcheries to hatch fry or raise fingerlings for stocking waters of the state for recreational fishing;

(2) transfer to other government agencies in exchange for fish or wildlife resources of equal value or private fish hatcheries in exchange for fish to be stocked in waters of the state for recreational fishing;

97C.205 TRANSPORTING AND STOCKING FISH.

(a) Except on the water body where taken, a person may not transport a live fish in a quantity of water sufficient to keep the fish alive, unless the fish:

(1) is being transported under an aquaculture license as authorized under sections 17.4985 and 17.4986;

(2) the stocking of waters with fish or fish eggs.

(c) The commissioner must allow the possession of fish on special management or experimental waters to be prepared as a meal on the ice or on the shore of that water body if the fish:

(1) were lawfully taken;

(2) have been packaged by a licensed fish packer; and

(3) do not otherwise exceed the statewide possession limits.

(d) The commissioner shall prescribe rules designed to encourage local sporting organizations to propagate game fish by using rearing ponds. The rules must:

(1) prescribe methods to acquire brood stock for the ponds by seining public waters;

(2) allow the sporting organizations to own and use seines and other necessary equipment; and

(3) prescribe methods for stocking the fish in public waters that give priority to the needs of the community where the fish are reared and the desires of the organization operating the rearing pond.

sunfish, orange spotted sunfish, and black, yellow, and brown bullheads taken by angling, except as otherwise ordered by the commissioner upon documentation of an emergency fish disease in Minnesota waters, as defined in section 17.4982, subdivision 9. No more than four of each species may be transported at any one time, and any individual fish can be no longer than ten inches in total length. The commissioner may, by written order published in the State Register, prohibit transportation of live fish under this paragraph to help prevent spread of an emergency fish disease documented to occur in Minnesota waters. The order is exempt from the rulemaking provisions of chapter 14 and section 14.386 does not apply.

Subd. 2a. **Acquiring fish.** (a) A private fish hatchery may not obtain fish outside of the state unless the fish or the source of the fish are approved by the commissioner. The commissioner may apply more stringent requirements to fish or a source of fish from outside the state than are applied to fish and sources of fish from within the state. The commissioner must either approve or deny the acquisition within 30 days after receiving a written request for approval. Minnows acquired must be processed and not released into public waters, except as provided in section 97C.515, subdivision 4. A request may be for annual acquisition.

(b) If the commissioner denies approval, a written notice must be submitted to the applicant stating the reasons for the denial and the commissioner must:

Subdivision 1. **Definitions.** For purposes of this section, the following terms have the meanings given:

(1) "Water body" means waters identified by a unique Department of Natural Resources public water identification number; a body of water that has defined boundaries and that has no Department of Natural Resources public water identification number; or a section of stream designated by a Kittle number, lock and dam numbering system, or to the upstream and downstream barrier.

(2) the water body is located within a viral hemorrhagic septicemia-free zone posted on the Department of Natural Resources website.

(b) Certification for individually tested water bodies is valid for one year from the date of test results. Certification of water bodies within a viral hemorrhagic septicemia-free zone posted on the Department of Natural Resources website is valid for the dates included in the posting. A viral hemorrhagic septicemia-free certification is also referred to as fish health certification.

Subd. 2. **Commercial fish defined.** For purposes of this section and section 97A.475, subdivision 30, "commercial fish" are common carp and native rough fish, except for bowfin.

Subd. 3. **Regulation.** The commissioner shall, by rule, regulate the taking, possession, transportation, and sale of commercial fish, and the licensing of commercial fishing operators in inland waters.

Subd. 4. **Licenses required.** A person may not commercially fish inland waters without a commercial fishing license. Nonresidents may only be licensed to fish waters not previously assigned to residents. In the license application the applicant must list the number of feet of seine of each depth to be licensed.

Subd. 5. **Season.** Licenses to net commercial fish in inland waters are issued to residents and nonresidents annually subject to this section and shall be valid for commercial fishing during the open season for commercial fishing in inland waters from the day after Labor Day to the day before the open season for walleye.

Subd. 6. **License invalidation.** (a) A license to take commercial fish is void upon:

- (2) cessation of commercial fishing operations within an assigned area, except as provided by paragraph (c);
- (3) conviction of two or more violations of inland commercial fishing laws within a license period; or
- (4) failure to apply for a new or renewal license prior to June 15 of any year.

(b) A commercial inland fishing license is not subject to the license revocation provisions of section 97A.421. Commercial fishing rights and area assignments covered by a license that becomes void reverts to the commissioner for reassignment.

(c) A person possessing a valid inland commercial fishing license may apply to the commissioner for transfer of an assigned commercial fishing area to another person. Upon receipt of the application, the commissioner shall notify the applicant that the application for transfer has been received and shall determine if other people are interested in the assigned area by:

- (1) notifying the Inland Commercial Fish Trade Association in writing; and
- (2) publishing notice in a newspaper of general circulation in the vicinity of the assigned area.

These notices must allow interested persons 30 days to notify the commissioner of their interest in the assigned area. Within 60 days after publishing notice, the commissioner shall review the qualifications of all interested persons and approve or deny the transfer based on the criteria in section 97C.815, subdivision 2. If the transfer is denied, the licensee may retain the license or request that it become void.

Subd. 7. **Monthly reports.** A licensed inland commercial fishing operator shall submit a report on the licensed activities the operator was engaged in to the commissioner each month. The report must be on a form provided by the commissioner and submitted prior to the 15th day of the following month. The commissioner may change inland commercial fishing area boundaries by rule prior to a new licensing period.

Subd. 2. **Assignment.** (a) The commissioner shall assign licensed inland commercial fishing operators to commercial fishing areas and each operator is obligated to fish in the area that the commissioner has assigned to them. The commissioner's assignment is valid as long as the assigned operator continues to purchase a license, continues to provide an adequate removal effort in a good and professional manner, and is not convicted of two or more violations of laws or rules governing inland commercial fishing operations during any one license period. In the operator assignment, the commissioner shall consider the proximity of the operator to the area, the type and quantity of fish gear and equipment possessed, knowledge of the affected waters, and general ability to perform the work well.

(b) Area assignments must not restrict permits and contracts that the commissioner issues to governmental subdivisions and their subcontractors for invasive species control.

Subd. 3. **Unused areas.** If an area is not assigned, or the operator licensed for the area is not fishing that area, the commissioner may issue a special inland commercial fishing permit for the area. The permit may be issued to an individual holding a valid inland commercial fishing license. The permit must describe the specific waters involved, the county, the species to be removed, the equipment to be used, and the time period of the total operation.

Subd. 4. **Inland Commercial Fishing Trade Association; license problems.** The commissioner shall consult with representatives of the Inland Commercial Fishing Trade Association when disagreements arise in the areas of license issuance, problems with performance pursuant to the license, transfers of licenses, area assignments, and the entry of new commercial fishing operators into the inland commercial fishery.

Commercial fishing licensees may harvest fish from their holding facilities at any time with their licensed gear. The commissioner may prohibit the transport of live fish taken under a commercial fishing license from waters that contain nonnative species, are listed as infested waters, or are infected with any certifiable disease.

97C.835 LAKE SUPERIOR COMMERCIAL FISHING.

Subdivision 1. **Commercial fishing license for Lake Superior.** (a) A license to fish commercially in Lake Superior shall be issued to a maximum of 25 residents. To qualify for licensing, a resident must have landed fish in the previous year with a value of at least \$1,500, and must have engaged in commercial fishing for at least 30 days of the previous year. An applicant may be issued a license, at the discretion of the commissioner, if failure to meet the requirements for the dollar value of fish landed or number of days fished resulted from illness or other mitigating circumstances, or the applicant has reached the age of 65 and has been licensed at least five of the previous ten years.

(b) A license may be issued to a resident who has not previously fished commercially on Lake Superior and has not been convicted of a game and fish law violation in the preceding three years, if the applicant:

(1) shows a bill of sale indicating the purchase of gear and facilities connected with an existing license;

(2) shows proof of inheritance of all the gear and facilities connected with an existing license; or

(3) has served at least two years as an apprentice in a Minnesota Lake Superior licensed commercial fishing operation.

Subd. 2. **Types of fish permitted.** Lake trout, ciscoes, chubs, alewives, lake whitefish, round whitefish, pygmy whitefish, rainbow smelt, common carp, and native rough fish may be taken by licensed commercial fishing operators from Lake Superior, in accordance with this section.

Subd. 3. **Pound nets and trap nets.** Pound or trap nets may be used to take lake whitefish, round whitefish, pygmy whitefish, ciscoes, chubs, alewives, rainbow smelt, common carp, and native rough fish in Lake Superior, including St. Louis Bay east of the U.S. Highway 53 bridge, under the rules prescribed by the commissioner.

Subd. 4. **Gill nets; lake trout and lake whitefish.** Gill nets for taking lake trout and lake whitefish may not be less than 4-1/2-inch extension measure mesh. The commissioner may prescribe rules to limit the total amount of gill net to be licensed for the taking of lake trout and lake whitefish and may limit the amount of net to be operated by each licensee.

Subd. 5. **Gill nets; ciscoes.** Gill nets for taking ciscoes and chubs may not be less than 2-1/4-inch extension measure mesh and may not exceed 2-3/4-inch extension measure mesh except that smaller or larger mesh sizes may be used under a permit issued by the commissioner.

Subd. 6. **Maximum amount of gill net in Lake Superior.** The amount of gill net licensed in Minnesota waters of Lake Superior may not exceed 300,000 feet of net weighted to fish in a floating or suspended position off the bottom and 300,000 feet of net weighted to fish on the bottom.

Subd. 7. **Maximum amount of gill net for each Lake Superior licensee.** A licensee may not operate more than 6,000 feet of gill net weighted to fish in a floating or suspended position off the bottom or 25,000 feet of gill net weighted to fish on the bottom. The commissioner may authorize gill net footage in excess of the individual limits when the commissioner determines that all of the gill net footage permitted for Minnesota waters of Lake Superior would not otherwise be allocated in a license year. The commissioner must allocate this excess gill net footage equitably among the licensees who have applied for it.

Subd. 8. **Special permits.** The commissioner may issue special permits to duly licensed commercial fishing operators for the purpose of taking lake trout, ciscoes, and lake whitefish in Lake Superior and adjacent waters under rules prescribed by the commissioner.
